Coe is the first one to ever appear on a body of water contained wholly within the county. It has a capacity of 30 passengers and will be operated on an excursion craft for the pleasure of all visitors to the largest artificial lake in Oregon and especially for the prospective settlers being shown over the lands of the government and the Fossil-Coe projects.

STOCK ON THE RANGE ROLL IN GREEN GRASS

People of Camas Prairie Feel Need of Railroad—People Busy With Spring Work—Other Items of Interest.

(Special Correspondence.)

Albee, Ore., March 17.—So far March has been like a lamb and it is hoped will not go out like a lion. The snow is about all gone, the grass is growing fine, some of the stock is on the range and everyone feels relieved. Never before have the people of Camas Prairie felt the need of a railroad more than they have the past winter. Had there been a road in here feed could have been shipped in instead of driving stock out through snow, wind and storm to Pilot Rock to feed. Though the winter was long and feed scarce, there has been but little loss of stock. There being no frost in the ground, the roads are drying up rapidly. People are preparing for their spring work, while a number have gone "outside" to work in lambing camps and other jobs.

J. H. Constant, J. S. Utterback and Tom Ledgerwood went out to the Rock today to bring their stock in to put them on the range.

Clark Sturdivant and others have brought their cattle in from the Rock this week.

Stanley Struthers went out to Pendleton last Friday and brought back a load of seed grain.

J. S. McLeod came in on the stage today to look after his interests here for a few days.

A. Struthers went out to Pendleton yesterday and will bring his stock in that has been wintering at the Rock.

It has become evident that this country, in order to retain its trade with China, must take more energetic measures than merely to obtain from the powers the transaction of the principles of "equal opportunity."
