THE GREATER ALEXANDER DEPARTMENT STORE

FACTS FOR FARMERS

Hints For Stock Owners.
Do not let sheep run around or eat from straw stacks.
The chaff and straw gets in the wool and injures it.
Sheep that have been chased by dogs never do quite so well afterward. Work hard to keep the dogs out.
There is more profit in a grunting pig than in a squealing one.
In some cases it may be necessary to dissolve some Epsom salts in the feed.
Be sure the sows are not constipated. Give roots, fruits and oil-meal in the feed.
There is a great shortage in the hog crop throughout the whole country, and it can only be replaced by keeping the best brood sows and growing more pigs.
You had better scour the feeding pail than lose a calf from scours.
When you hurry about milking, the cow feels uncomfortable and shortens up on you a little. That hurts you and hurts the cow as well.
Some folks get to be pretty good guessers in determining the temperature of cream, but nobody ever came within a gunshot of the thermometer in this respect.
The root cutter is almost an indispensable machine on the farm. The life of many a valuable cow would have been saved if the apples and potatoes fed had been run through a root cutter.
If the feed gets short before the pasture is ready, it is better to buy more.
There is no economy in cutting

down the feed at the freshening period.
Grow as much feed as is possible. Get the sowing crops in as early as the land will permit. Do not lose a day.
Sow a good acreage of oats and peas. All that is not eaten green can be harvested as oats-pea hay.
Go slow the first day of plowing; it will make a gain in the end.
During the first day of plowing the collars should be raised often to cool the shoulders.
A sour manger is the abomination of a really good horse. The man who forces a horse to eat from such a vile place is sure to be the loser, and will sometimes lose the horse with intestinal disorders, including colic.
Wheat bran and oats make strong bones in the colt.
When the colt is dropped it should receive nourishment from the dam within the first half hour.
An attendant should be on hand at the time of birth, for a little timely help has saved many a valuable colt.
A lazy man should never breed colts, for he must be alert and on the job if he wishes to succeed.
Start the milk with the thumb and finger if the colt is not very strong, or if the udder is at all hard.
Take the chill off the water for the mare, and feed her carefully and keep her quiet for a number of days.
—From April Farm Journal.

Poultry Pointers.
When eggs are selling at fancy price they look awful small to the consumer; that's caused by the price.
The man who can perfect a plan by which hens can be made to lay as liberally in winter as in summer could have an income as large as the president of the United States.
Don't nail boxes to the wall, clean, movable nests are good for prevention of pests.
Give the hens all the milk they can consume. It's a good ration for them, either alone or mixed with a mash.
Hens should have lime and shell-making matter. Crushed oyster shells are good for egg production.
Watch your hens' nests during the warm weather coming and see that they are kept fresh and free of pests.
Never hesitate about giving Chamberlain's Cough Remedy to children. It contains no opium or other narcotic and can be given with implicit confidence. As a quick cure for coughs and colds to which children are susceptible, it is unsurpassed. Sold by all dealers.
It is estimated that there are 3,000,000 people ill in this country most of the time, who are ill merely because they are careless and don't take care of themselves.

RESERVOIR SUPPLIES ECHOITES WITH FISH

ARTIFICIAL LAKE AROUNDS WITH FINNY DENIZENS

Fishermen Have No Difficulty in Luring Mess from Government Reservoir—Fish Are of Peculiar Species—Prominent Speaker of W. C. T. U. Lectures in Echo—Other Items.

(Special Correspondence.)

Echo, May 7.—Echo's fishermen return every day from the government reservoir with well filled baskets. There appears to be thousands of fish in the lake, for hundreds are caught every day by fishermen from the neighboring towns. The species of the fish is not known, but appears to be a cross between a trout and red fish. The meat is excellent but the majority of the people express themselves as preferring the brook trout. The fish are thought to have been in the lake before the first of the year, having come down the feed canal before the placing of screens at the intake dam.

Mrs. Ada Wallace Unruh of Portland, state president of the W. C. T. U., lectured here last night to a crowded house.

Asa B. Thomson and family left this morning for Old Mexico. Mr. and Mrs. Thomson have spent the greater part of their lives in Umatilla county and they will be greatly missed by their many friends.

Mr. and Mrs. Ed Hammer left on the local this morning for Lodi, California, on a two months' visit with Mr. Hammer's parents, Mr. and Mrs. J. Hammer.

Mrs. Rose Campbell of Pendleton was a business visitor here yesterday. Bismark School of Spokane, Wash., spent last night with his brother, Mayor Schell.

Frank Ennis, a real estate dealer of Walla Walla, was a visitor here yesterday.

Mrs. A. Reld of Stanfield, visited here yesterday with her daughter, Mrs. F. E. Everitt.

Miss Bertha Allen, who has been attending school in Seattle the past winter, has just returned home.

Mrs. F. W. Andrews and daughter Bessie, spent today in Pendleton, returning home this evening on the motor.

Mrs. R. B. Stanfield and children visited with friends in Pendleton today.

Mrs. A. H. Sunderman returned to Pendleton this morning after a two weeks' visit on Butter creek and with the Meadows.

Mrs. C. R. Lisle and Master Nelson Taylor were passengers on the motor to Pendleton this morning.

Probably none of the enumerators ever wants the job again.

HOG NOTES.

There is money in the hog business for the man who will conduct it properly. Don't forget it.

It does not cost much to sow a field in rape and it helps make pork at far less cost than can be done without it. Pig time is here and lice on little pigs keep them from doing their best. Watch out for the lice.

A small floored runway outside the sow's farrowing pen will give the pig a mighty good start on the road to huskiness.

It does not matter so much what breed of hogs a man selects so it is a good one, as getting a good breed that he likes and sticking to it and

making the most out of it that can be made.

The old idea that a hog can be fattened on nothing but corn has been abandoned, and the time will come when in the South corn as a hog ration will be abandoned for just as good and cheaper feeds.

There is not much prospect for a material increase in the stock of hogs in the United States in 1910 for the reason that high prices have caused the selling off of brood sows to packers until there are not enough left to farrow pigs enough to make good the shortage in the hog stock. Now is the time to get busy and raise more hogs.

In barbarian New York a wedding of an heiress will raise a bigger mob than a streetcar strike.

California is always beautiful, but just now she is ravishing in her beauty. Go out, brother, into the green lanes of the country—Los Angeles times. California, in big spots, is delightful, surely; but good old evergreen Oregon can beat it, for "green lanes" and "ravishing beauty," considerably.

We are willing to love our neighbors—if we can choose our neighbors, but that is just where God tests us. He gives us neighbors whom He naturally would not choose in order to teach us to act on the real neighbor rule of helping the man next to us, whoever he may be.—J. R. Miller.

Superstitious people down south will raise the destruction of their cotton crop to the comet.

One True Medicinal Whiskey

Beware of So-called Ones—Imitations

Unscrupulous dealers, mindful only of their profit and caring nothing for the health of their patrons, are offering for sale low grade mixtures, which they tell you are "as good as" Duffy's Pure Malt Whiskey.

Some go so far as to try to make you believe it is Duffy's Pure Malt Whiskey. These cheap concoctions are foisted on the people with the intent to deceive.

When a remedy has been before the public for more than half a century, has been prescribed and used by the best doctors and in prominent hospitals, and has carried the blessing of health into so many thousands of homes as Duffy's Pure Malt Whiskey has, imitations are bound to arise. They may imitate the bottle and label only—no one can imitate the contents.

Duffy's Pure Malt Whiskey

is an absolutely pure distillation of malted grain. Its palatability and its freedom from injurious substances render it so that it can be retained by the most sensitive stomach. It has been used with remarkable results in the treatment of consumption, pneumonia, grip, coughs, colds, malaria, fevers, stomach troubles and all wasting and diseased conditions.

It is sold in sealed bottles only. The Old Chemist's Head is on the label, and over the cork is an engraved seal. Be certain the seal is unbroken. Sold by druggists, grocers, dealers, or direct, \$1.00 a large bottle.

Write Medical Department, The Duffy Malt Whiskey Co., Rochester, N. Y., for doctor's advice and valuable medical booklet containing testimonials and common sense rules for health, both sent free.
