MILLIONAIRE STRIKEBREAKER

President of Portland Draymen's Association Handles Freight at Wharf.

METALWORKERS ARE WAGING BIG FIGHT

After Eight Hour Day Throughout Country—Strike Called First on Pacific Coast Because Condition Favorable—Will Extend Eastward If Strikers Succeed in Winning Out in Their Fight.

Portland, June 6.—That employers are in desperate straits for drivers to replace the 400 striking teamsters was indicated today when Sam Hermann, president of the draymen's association and millionaire head of the Oregon transfer company with his brother Edward, donned leather aprons and acted as a driver for one of his wagons. He went to the dock, loaded up from a warehouse and delivered goods to business houses. The Union pickets did not molest him. He says he will continue to drive until a system of relief is devised to move congested freight. The strikers assert they are winning and say there will be no violence unless strikebreakers are imported.

Metal Workers Strike.

Portland, June 6.—The strike of the Pacific coast metal trades unions here, at Los Angeles, Seattle and Tacoma, is but the first step in a general campaign to secure an eight hour day in every state in the union, according to William Hannon, vice president of the international union today. Hannon says the strike was called on the Pacific coast as the conditions are most favorable. The strike will move eastward as soon as won here.

At Los Angeles.

Los Angeles, June 6.—Three representatives from each of the metal-workers unions here met today in Labor temple to discuss the strike which has practically tied up every shop and foundry in this vicinity. The meeting was secret. The union leaders claim 1500 are out. Reports from San Francisco say the unionists are boycotting all non-union foundry articles.

BROTHER LOCATED AFTER SEARCH OF 20 YEARS

Beckley, W. Va.—After searching throughout the United States for twenty years, Miss Ella M. Hurley of Santa Barbara, Cal., located her brother, Peter J. Hurley, who has been working in this city for the past several weeks.

When a boy of 18 Hurley left home after a quarrel with his father. For twenty years nothing had been heard from him, although his grief-stricken parents searched throughout the nation for him. Five weeks ago his sister Ella, received a letter from a school chum whom she went to school with at Kee Mar, informing her that her brother was working at Beckley.

Arriving here this morning, the girl discovered her brother working near the depot. When they met for the first time in twenty years he stoutly denied being her brother, but after much pleading by the girl he finally broke down and a happy reunion was the result.

After leaving home Hurley stated he went to New York and embarked on an ocean steamer for England. He toured Europe and went to Africa, where he enlisted in the Boer war. He fought at the memorable battle of Ladysmith and later returned to the United States and has been working throughout the northern states for several years as a newspaperman and clerk.

Pittsburg, Pa., June 6.—At republican headquarters here today it is declared John Dalzell, regular candidate for the congressional nomination defeated Dr. Robert J. Black by a majority of 405. The count is complete except for one precinct. Black says many Dalzell votes were fraudulent and that he will demand a recount of the primaries. The regulars say such action will only delay a final victory. The fight on Dalzell was watched by the entire country as he is regarded as Cannon's right-hand man. His success is considered here as a set-back for insurgency. The only break in the state of the regulars was Schuykill county where R. D. Heaton insurgent, defeated Congressman A. D. Garner, who made his race on the Cannon platform.

WILL SAVE HOME OF THE "GOOD GRAY POET"

New York—Admirers of Walt Whitman, whom many European critics consider America's greatest poet, are planning to save his birthplace at Huntington, L. I., as a permanent memorial. The home of the "good, gray poet" was recently sold at auction, and members of the Whitman Fellowship hope to save from destruction.

Whitman was born and spent most of his life in a little old-fashioned house south of Huntington, in a section known as West Hills. It was well out in the wilderness when the poet lived there.

Several years ago, when the Colonial Dames and Daughters of the Revolution of Huntington wished to memorialize Whitman by placing a bronze tablet upon the side of the house the owner is said to have refused to permit them to do so. The young women, led by Miss Young, daughter of former Judge Thomas J. Young, appealed to the highways commissioners and received permission to erect a marble monument by the roadside, opposite the house. It reads:

To Mark the Birthplace of WALT WHITMAN, The Good Gray Poet, Born May 31, 1819.

GYMNAST FALLS TO DEATH.

Miscellaneous Speed in Stage Performance. Rome, Italy—Alberto Braglia, who figured among the world's champion gymnasts and as winner of Olympic races at Athens in 1909 and at London in 1908, met with a terrible accident recently at the Modena theater, Milan, where he was performing the dangerous feat known as the "human torpedo." Braglia misjudged the distance in leaping from the down-rushing car, and, missing the trapeze, was dashed with terrific force on the stage in a state of unconsciousness. The body was such a mass of wounds that the surgeons despair saving him. There was a stampede of the horrified public from the theater.

Everywhere it is thought Lorimer must resign."

PREDICTS FIVE MILLION BUSHEL YIELD FOR COUNTY

The usual acreage of wheat, barley and grain hay in Umatilla county is in crop this year, according to E. W. McComas, representative of the Northwestern Warehouse company and according to the same authority the usual average yield of 25 bushels of wheat to the acre or a total of 5,000,000 bushels will be harvested. Mr. McComas also looks for an early harvest saying that unless there should be much cloudy or rainy weather within the next ten days, harvest will be two weeks ahead of time.

McComas says that of the 200,000 acres in wheat this year, a somewhat larger percentage than usual is spring-sown. This is accounted for by the fact that the early winter put an end to fall sowing before it was completed and for the further reason that the early spring with occasional showers made conditions ideal for spring seeding. He says the barley prospects are also good and expects to see an average yield of 40 bushels per acre or 400,000 bushels from the eight to ten thousand acres in crop. According to Mr. McComas there will be a record crop of alfalfa. In addition to the fact that there will be three cuttings in all sections there is much new acreage in the irrigated districts. The first cutting is now being stacked, the hay harvest having come on two weeks early. The grain crop will be 50 per cent greater than last year so that the prospects are bright for an abundant supply of hay of all kinds. McComas says conditions generally throughout the county are "A-1" but that the proportionately large yields will come from the lighter soil sections. In these sections prospects were never brighter, while in the heavier soil districts the ground seems to have been baked and while the yield will be big it will not be above the average. The yield in the lighter soil sections promises to be well above the normal.

Maligned Cigarette Finds a Supporter

London.—"If a cigarette is more harmful than a pipe, I believe its danger lies in its handiness; though I must say, speaking in my capacity as a throat specialist, that remarkably few cases brought before me can be traced directly to smoking of either pipe or cigarette." This opinion was expressed by a leading specialist while discussing the evils of cigarette smoking in connection with the recent order by General Smith-Dorrien forbidding the troops at Aldershot to smoke them while on duty. "From the health point of view I can see but one advantage the pipe has over the cigarette," he continued. "The pipe acts as a filter to the number of volatile poisons—pyridine compounds—which tobacco smoke contains. In the case of a cigarette these poisons go unfiltered into the system." "Considerable misunderstanding exists about the poison nicotine. Tobacco itself contains only from 2 to 3 per cent of it—in tobacco smoke there is only the smallest trace or none. "Pyridine compounds, such as pyridine, picoline, lutidine and collidine are the principal poisons in tobacco smoke. They have the same action as nicotine, but are much less severe. But it is very difficult to make out a true bill against tobacco. It does not do nearly as much harm as might be expected."

DID WICKERSHAM AID SUGAR TRUST?

Washington, June 6.—Representative John Martin of Colorado, promises to involve Attorney General Wickersham in further connection with the sale of the Philippine friar lands to the sugar trust. Both are members of the firm of Strong & Cadwell, Railroad contracts, harbor improvements and bond issues all passed through the firm. All this time General Edwards, President Taft's close friend, had immediate jurisdiction in the islands. Martin claims the friar lands were an incident in a general scheme of Philippine exploitation.

Accompanied by Deputy United States Marshal Lathie he went to the hospital. The little girl said, "Papa why don't you come to see me, are you mad?" Thielman sobbed and Lathie decided to leave him alone. When he returned the man was gone. Thielman's wife said today, "The escape surprised me as he often told me he intended to make a complete confession, and to plead guilty and take his punishment."

RATE INCREASE CONFERENCE

President and Heads of Three Big Roads Discuss Features of Controversy.

TAFT HAS DATA—WARM SESSION PREDICTED

President Browne of New York Central Says Eastern Roads are Anxious for Settlement—Claims he Notified Interstate Commerce Commission Month Ago of Proposed Rate Advances.

Washington, D. C., June 6.—A conference between Taft, Wickersham and Presidents Ripley of the Santa Fe, Delano of the Wabash and Felton of the Chicago & Great Western, is scheduled for this afternoon at the close of the stock market. There won't be another stock slump. All three presidents of railroads declined to discuss the proposed plea that the injunction be removed which now is stopping 25 western railroads from increasing rates. Wickersham has primed Taft with figures compiled by the interstate commerce commission. He has also given him a copy of the charges preferred by the western shippers against the railroads. A warm time is expected.

Brown Has Complaint.

New York, June 6.—The eastern railroads are anxious to have the interstate commission make a decision soon regarding the proposed rate increase according to President Browne of the New York Central, so as to allow the railroads to meet the recent wage increases of \$890,000 granted the employees. He asserts he asked the commissioners a month ago to investigate the planned rate increases, but apparently they were not willing to do so. Browne says many improvements are being held up owing to lack of money the increased rates would provide.

An exhibition will also be arranged in a central gallery of pictures, portraits, manuscripts and personal belongings of the novelist. Lady Ritchie, Thackeray's daughter, while she is unable to join the centenary committee, has expressed her approval of the arrangements which are being made.
