Elections in Mexico. City of Mexico, June 25.—If President Taft should begin a campaign for re-election in 1912 by clapping his democratic opponent in prison, keeping him behind the bars until the "battle of ballots" had been decided to the satisfaction of Mr. Taft, conditions in the United States would then be similar to those now obtaining in the "republic" of Mexico.

Political partisans of Diaz are today calmly confident that the aged Mexican chief executive will be re-elected, since his opponent, Francisco I. Madero, is in jail on the charge of aiding Roque Estrada, one of his leading political supporters, to escape the service of a warrant for the alleged offense of holding a political meeting.

Madero's arrest and imprisonment caused a great stir among the people of northern Mexico, where he is well known and very popular. He is a son of Evaristo Madero Parras, one of the wealthiest men in Mexico. His father recently sold part of his landed estates for \$15,000,000 gold.

Constipation and kidney poisons show in pimples, blotches, skin eruptions and a wretched complexion. But Electric Bitters always prove a godsend to women who want health, beauty and friends. They regulate stomach, liver and kidneys, purify the blood; give strong nerves, bright eyes, pure breath, smooth, velvety skin, lovely complexion, good health. Try them. 50c at Tallman & Co.

SAYS BLEACHED FLOUR IS NOT INJURIOUS

Kansas City.—Professor L. E. Sayre, dean of the University of Kansas and a pharmacist, testified in the federal court here that he did not believe bleached flour was harmful when eaten in bread.

Further, he said, he was of the opinion that it was impossible for what ever nitrates there might be in such flour to reach the blood after it had gone through the baking and digesting process.

To investigate the alleged harmful qualities of bleached flour due to the presence of nitrates, said the professor, he had made tests upon his wife, upon friends and upon himself. His wife ate bleached flour bread and no harm came of the experiment, he said.

The witness testified that he took

12 grains of sodium nitrate in two days and suffered no injury. In the ordinary course of bread consumption, said the professor, a person would not consume this much nitrate in less than six years.

"Several of my friends," said the witness, "took eighteen grains of sodium nitrate apiece in two days and it did not injure them."

"It cured me," or "it saved the life of my child are the expressions you hear every day about Chamberlain's Colic, Cholera and Diarrhoea Remedy. The course has been specially prepared for this first annual event under the supervision of the Suffolk county superintendent of highways, Peckskill gravel, that has been rolled and hardened, has been used in the building of the road, with the result that the surface is ideal for the purpose intended. Workmen made a slight curve at the top of the hill to insure absolute safety to contestants.

The hill is 2000 feet long and has but two curves in its entire length. The average grade is 10 per cent, while the greatest is approximately 15 per cent.
