FACTS FOR FARMERS

The apple trees in many orchards. unthrifty, hide-bound, have stopped bearing and appear unthrifty, so that the branches will grow but very little if at all from year to year and the trees will yield but small crops of inferior fruit. During the summer months when

the new wood is forming it is an excellent plant to rub or peel the old back from the ground to the first cimbs, and a new, smooth and healthy bark will appear and many times this will have so salutary an effect that the old tree will go to bearing. We have seen trees treated in this manner with very satisfactory results, especially when the trees are

not too old or were not injured by

removing the old bark. night pasture for our cows by en- desired size of the house. The dirt closing one of our orchards with a may be thrown out so as to form an fence and kept from thirty to forty lows in this orchard nights and fed them solling crops out of the stable and they kept the old bark well rub-bed off from the trees and left a large amount of fertility on the land, and from this orchard we have harvested some of the best crops of ap- under as far as possible. ples that we ever grew, and we believe that it has been due entirely to utilizing it for night pasture that brought about the change.

Good Butter Making.

Every butter maker knows the importance of using a good butter worker. Without it the butter habcontains too much water probably too large a quantity of ca- feeding too much dry feed without

The chief point of the butter worker is to get the water out and also for a week. Turnips and other roots to enable the product to be made up are also good in cases of this kind. into a good and consistent sample.

But trouble is often caused by the about 2 ounces, combined with an fart of the butter adhering to the ounce of laudanum given in a little worker, arising from a want of clean- linseed gruel is a good remedy.

The Pacific northwest stands arvest a wheat crop of 42,000,000 ushels compared with 52,500,000 ushels a year ago, says Hyman H ohen, market editor of the Portland ournal. This is a decrease of 10 .-00,000 bushels from the output of ast year. This is the present indiation and will most likely be the report at the end of the harvest unless weather conditions hereafter interere greatly with the crops.

Considering conditions, the showng this year is enormous. The crops save had much to contend with. Tolay some fields that range as high as 15 bushels an acre, would not have elded sufficient grain to pay harvest xpenses on the basis of the crop two

Big Increase in Oregon ron. In this state the output of wheat will be practically 2,000,000 bushels nore than that of 1909. This is due ight land sections.

g with an estimated crop of 9.000 .bushels for 1910 compared with been paid to Mr. Sisson. 343,000 bushels last year. Had the elements been kind to Washington growers the report would

esting a wheat crop of about 18,000 .- Soil-Without Irrigation." 00 bushels compared with better han 30,000,000 bushels a year ago.

reater is due to adverse weather conerious damage to the wheat of the same causes.

Oregon lands give a greater crop there many years that we do not irri-South of the Snake river, the the statement. precipitation this season was so liberal that lands which falled to give large and red, pears and cherries so sufficient crops last year that harvest luxuriant as to break the limbs, two expenses could be paid are this season giving as high as 15 bushel yields.

One of the peculiarities of the present season, in all sections, is that the lands which have been usually classed as the best producers, gave forth their lightest showing. On the ther hand crops that average close to 15 bushels were given by lands that usually extremely lucky to give 10 bushels and some years run as low as ight bushels.

Big Crop on Light Land. For instance in the Eche district. is in the Pilot Rock country in Uma illa county, there are yields that will

go 15 bushels and better on lands that were of the extremely poor showing Then again, in the better lands of Umatilla county, close to the reservation, the showing this season is not nearly so good as generally. This latter condition is peculiar to the presen; season. Because of the may rains, the lands "run together" during the spring and late fall, and with the coming of warmer weather he ground formed a very heavy crust. This made it difficult for the fall sown grain to come through as I usually does. Therefore the crop in that district is not so heavy as during Nevertheless, Umatilla county the good or bad qualities of the cow will this year complete a harvest of the first time you milk her, but to fully 1.000,000 bushels more than last The increase is due entirely to Near. he much greater production in the

light land sections. Walla Walla "Mixed."

Over in the Walia Walla country the showing is mixed. In the Eureka good as a year ago, but in the foot-

same reason as similar lands show curtailed output in Umatilla.

in Garfield county. Wash., much the same condition prevails, and this possible." year's crop will not be as heavy as a However, Washington's greatest decrease is in the Palouse and Big Bend. Were these sections to show their normal output, the crop BE LESS THAN LAST in Washington would have been above the average this season. Instead of that it is almost cut in half as com-

pared with last year's crop. Sherman, Gilliam and Morrow counties. Oregon, will produce a better crop of wheat than a year Most of the lands in these sections are of light character and the average is considerably above recent years. In many fields of these countles the output will be close to that of 1907. when a bumper crop was shown Therefore the Columbia river countles have this year done much to bring Oregon's wheat yield far above

the average. Interior Oregon-the central portion of the state-will have better than 1,000,000 bushels of wheat more than year ago, because of the new acre-This will help the total produc on of the state to range above last

ear's record. Idaho has a greater crop of wheat While a ian she had a year ago. arge portion of the state's crop is wn in the spring, Idaho has considable fall sown grain and this brings production of that commonwealth about 9,000,000 bushets.

Along with the estimated crop of 42,000,000 bushels of wheat this season, the Pacific northwest has a carry-over of perhaps 6,000,000 bushels would of wheat and flour. This oring the total wheat available for market this season at 48,000,000 bushels, or 4,500,600 bushels less than the Knights of Columbus, which is to crop of 1909.

"IT'S THE SOIL" IS NEW LATAH SLOGAN

Moscow Idaho,-'It's the soil," proposed by C. M. WHEN COLLEGE COURSES ARE NOT WORTH WHILE

Ann Arbor, Mich. - President H. Hutchinson of the University of Michigan, in addressing the summer udents recently told them that in eneral a college course was worth -bile, but enumerated certain cirumstances under which he consider-

d it not worth while. "The man who studies the an-nouncement of his college solely for the purpose of discovering snaps and djusting his life to them is weaked mentally by his college experihe said. "He drifts also into habits that undermine and eventually destroy any manliness and force of haracter with which he may have

een by nature endowed." The speaker maintained that the college course if worth while should be an extensive one demanding the exercise of the student's best powers, but he said:

"A college course is while in this age of activity and orginal thinking, in this age of great achievements and great opportunities if it makes a man a slave to the mere learning of others."

ROME IS PREPARING TO GREET AMERICANS

Rome.-American churchmen in Rome are making elaborate preparation for the reception and entertainment of the pilgrimage of the reach Rome the latter part of August. From advices received here it is beeved there will be several hundrd eading American Catholics from all sections of the United States among the pitgrims. They are expected at Naples August 18, going from there o Genoa, where they will take part in festivities in honor of Christopher Columbus. They will be joined at Genoa by a number of Americans from Rome who will act as combinaion guards of honor fered a cash prize of \$25 which has the Holy City. They will be granted a special audience by the holy father and nothing will be left undone for comfort and entertainment their

white here.

Rome.-The trouble between vatican and Spain which it is feared by churchmen may lead to the sepmost Catholic country in the world, is credited to the intolerant spirit of Cardinal Merry del Val and given the enemies of the papal secretary of state more ammunition in the warfare which is being waged against him.
It is not believed that even the

strong personal friendship of the pope When I told them our apples were for Cardinal del Val will be able to prevent his early retirement from the secretaryship of state.

You don't have to think up a thirst--it comes frequently enough these hot days. Just think of our thirst-quenching fountain drinks -- try one -- and the thirst is forgotten. Pure, delicious, sanitarily served soda water--just the right degree of flavor just the right coldness. Plain or fancy drinks. Ice cream and fruit combinations.
