

Years of Suffering

Catarrh and Blood Disease—Doctors Failed to Cure.

Miss Mabel F. Dawkins, 1214 Lafayette St., Fort Wayne, Ind., writes: "For three years I was troubled with catarrh and blood disease. I tried several doctors and a dozen different remedies, but none of them did me any good. A friend told me of Hood's Sarsaparilla. I took two bottles of this medicine and was as well and strong as ever. I feel like a different person and recommend Hood's to any one suffering from catarrh."

HERMISTON BALL BOYS BANQUETED

MANAGER McNAUGHT IS HOST TO PLAYERS

Umpires and Other Officials in Attendance—Catcher Leaves for Wasco—Charles Holman Acquires 20 Acres—Short News Notes.

(Special Correspondence.)

Hermiston, Or., July 20.—Saturday night a banquet was given in honor of the members of the Hermiston baseball team by Manager McNaught. Those present included all players who have played in the games so far this season, President F. A. Phelps of the Irrigation league, umpires and other officials connected with the team, including Editor Reeves of the Herald. A sumptuous repast was served and followed by speeches by many of those present.

H. Guy Andrews, Hermiston's popular catcher, left for Wasco a few days ago, where he is planning to enter the real estate field. Mr. Andrews was one of the most popular catchers in the Irrigation league and deserves much credit for helping the Hermiston team win the pennant.

Charles Holman yesterday became the owner of 20 acres of land in section 34. Mr. Holman has been in the country for quite a long time and like a great many of the old timers, felt a little skeptical about the future of western Umatilla county, but has at last been convinced that he was wrong, and to show his change of heart has taken 20 acres under the ditch near Hermiston.

Lee Clark arrived yesterday from Casselton, North Dakota, with several of his friends to look over the Hermiston country with a view of locating here permanently.

A. P. Davis, one of the well known reclamation officials is spending several days here. Mr. Davis always has a good word to say for the Umatilla project wherever he goes.

TO STOCK LAKES AND RIVERS WITH FISH

Spokane, Wash.—Carrying out a plan to stock the lakes and rivers in the district with fish, as outlined in these dispatches several weeks ago, Rev. Dr. William J. Hindley, chairman of a special committee of the Spokane chamber of commerce, has sent a letter to the commissioner of the United States fish department, requesting him to send a representative to this country with a view to making a thorough investigation of conditions. Dr. Hindley says in his letter that it is desired to make fish culture a commercial success in the Inland Empire, as well as provide the people with the pleasure incidental to fishing, adding: "We need advice. We have plenty of money forthcoming to put into effect any broad plan that can be evolved. We believe we have lake and stream districts unequalled in the United States for the propagation of fresh water food fishes. We therefore ask for a representative, fully versed in such matters, to make a study of our waters and the proper fish to be planted."

OPEN WORK BLOUSES SHOCK.

Cure Forbids Women to Attend Church in Them.
Geneva.—Cure Villiger, the head of the village church of Sarmens torf in the canon of Argovie, was so shocked by the younger women of the congregation appearing in church in white openwork blouses, owing to the very hot weather which prevailed, that he changed the subject of the sermon and spoke on the vanities of the world and openwork blouses in particular. At the end of the sermon the cure stated that in future no women wearing openwork blouses would be allowed to enter the church, and that he had given orders to that effect. The men in the village support the cure, while the women are very indignant.

F. G. Mackereth asked the question: "Do school children drink alcohol?" and, answering his own query in the affirmative, gave results of investigations which he had made on the subject.

In one school alone, he said, it was found that 40 per cent of the children drank alcohol regularly. If the same proportion obtained all round there must be some 300,000 child-drinkers in London (probably in all the large towns and districts there must be some 2,000,000) who drink alcohol.

"Of all the countries in Europe only Norway and Sweden seemed to be free from the practice, and startling figures came from all over the world, the proportion in New York being, it was stated, 55 per cent.

"In one hospital in New York, Bellevue, inquiries showed that, of the 259 patients, four began to drink alcohol before the age of 6, thirteen between 6 and 12, sixty between 12 and 16, and 102 between 16 and 21—two-thirds of them under the age of 21. He was convinced that a large number of inebriates were so as the result of taking alcohol early in life.
