THE MODES OF AUTUMN.

New York.—Dame Fashion keeps her face steadily turned toward black and white effects. From the looks of the shop windows, where autumn modes are beginning to make an appearance and also from reports received from the fashion marts of Paris, London and Vienna, it is certain that the rascor for this clever combination of old favorites is only beginning.

In a sense it is practically a new vogue, for we have a wonderful supply of new fabric for fall frocks, regardless of the occasion. The tailor, house, reception, dinner and theater gowns will all appear in a wider variety of fabrics than ever. Many are familiar favorites glorified by the latest achievements of the manufacturers' art and dignified by new names, invariably French, but in most instances the fall materials are reasonably priced and the average woman with an ambition to be well dressed will be able to realize her aims in this direction.

The checked and striped fabrics are going to score heavily, whether developed into house or street gowns. All of the season's best fabrics show these patterns. They lend themselves to combinations with the new shades of color, of which there are about a dozen ultra-fashionable ones, of which mention will be made later.

Trimmed, too, with their own materials, these new checked and striped effects are delightfully smart. One of the most successful little frocks for semi-dressy wear comes from Paris, developed in black and white silk. It is a pattern easily duplicated in the less expensive fabrics and boasts no trimmings beyond bands of its own. The skirt, which is walking length has two frills at the bottom, but instead of being gauged they are laid in narrow side plaits. Each frill is headed with a narrow fold of the goods.

Bias folds, stitched around the skirt and bodice, where they are joined, serve the dual purpose of belt and bodice trimmings and there are shaped bands stitched over the shoulders to further embellish the model.

Many of these new frocks embody styles that have been seen through the summer and given new touches to make them answer the requirements for a new season's modes. Particularly smart is a model made of two-tone striped material, with plain cloth the color of one of the tones. The plain cloth makes up the front panel of the skirt and the deep band at the bottom all around. The gown is of princess style, the front panel being broken only by the odd cross-over jacket effect, which is of the stripes, and which makes the sides and back of the skirt to the deep band in a sort of long-coat semblance. The hips have a satin band outlining a jacket length, and the same bands outline the cross-over fronts of the jacket and trim the long sleeves. The deep V of the yoke is filled with shirred chiffon of the color of the plain material over white, and the shallow yoke above it is white lace.

Among the most charming of the new styles are frocks of soft materials in dainty new colors exploiting the minutest bodice combined with the panel front. Asperge, which is a beautiful new shade of green looks well in satin voile. A frock for afternoon wear in asperge satin voile has the bodice cut after the pointed effects of the minutest days, but instead of ending in sharp points at the waist line back and front, the points extend in narrow panels. The sides of the skirt are gauged to hang full from the hips to the floor, the gaugings being held in here and there with bias folds of the dress material piped with narrow folds of black satin. The upper part of the bodice is cut out to accommodate a glimpse of delicate green chiffon tucked and edged with bands of soft black satin. The little yoke is of hobe crocheted lace.

A second gown of striking effect is made in Russo blue silk nun's veiling. The bodice is gauged about the waistline where it is attached to the upper part and the yoke is simply outlined with very elegant embroidery. The bottom of the skirt is cut in deep points, held in rather closely, but by no means to the proportions of hobble lines, and stitched to a deep band of plain satin.

A number of very successful frocks for dinner and theater wear are made over striped and checked silks, while others, equally de rigueur are of thin striped smoke-grey tone is made over this pink satin and has a guimpe and undersleeves of dull gold net with an edge of Sores blue satin. This is worn with a hat in Leghorn blue satin trimmed with blue feathers.

In hats there is a host of new shapes, many of which have wide brims turning up sharply against the crown all around, though higher at one point than at another. This highest point is very frequently at the back, the width of the brim lessening toward the front; and the crown, plain or draped, usually follows the same lines, sloping forward toward the back.

As black is shown upon frocks and wraps, white is often introduced upon the new modes in millinery. This gives a little relief from the prevailing note of sombreness without detracting from the piquant simplicity toward which Dame Fashion has set her heart.

Hats both large and small are the correct thing. It is not so much a matter of taste as one of occasion. For the tailored and general outdoor wear the small hat is in demand, while the very large ones are reserved for dressy purposes. Many of the shapes are made with reference to the soft puffs and curls, etc., which have crept into the back of the modish coiffure and are quite impossible with closer hair dressings, for though a halo bandeau may keep the hat from totally eclipsing the head the crown amplitude at the back calls for hair to fill it.

Foresight is much better than first sight when love is concerned.

If Your Neighbor Has Electric Light

and you have not, just step into his house some evening after dark and compare its light with your own. Study each point of convenience, cleanliness, clearness, beauty carefully, and then figure out for yourself if it would not pay you well to have your house wired for electric light at once.

Electric light today is cheaper and better than ever before, since the General Electric Company placed its MAZDA lamp on the market. We have arranged to supply our customers with the G.E. MAZDA lamps on very favorable terms. These lamps give two to three times as much light as other lamps using the same current.

If your house is located on any of our distributing lines we shall be glad to advise you about having it wired and will give you more facts about the efficient electric lighting of your home.

OREGON AGRICULTURAL COLLEGE OPENS SOON

INSTITUTION AT CORVALLIS COMMENCES SEPT. 23

Twenty-One Instructors Added to Faculty—New Buildings on Campus—Prosperous Year Expected.

Corvallis, Ore.—On Sept. 23 registration for the new year at the Oregon Agricultural College will begin. The institution opens with an increased faculty and large additions to its equipment, including twenty-one new professors and assistants and four new buildings.

The new members of the faculty include Dr. E. G. Peterson of Cornell, professor of bacteriology; dean of women Anna Z. Crayne of the University of Virginia and the St. Louis Medical College; Dr. J. F. Morel of the Universities of Belgium and Paris, in charge of the new work in veterinary science; G. R. Samson, U. S. Department of Agriculture, instructor in animal husbandry; H. S. Marks, Cornell, instructor in mechanical engineering; J. E. Moister, Cornell, instructor in electrical engineering; G. F. Sykes, Brown University, instructor on zoology and physiology; S. M. Dolan, Notre Dame, instructor in civil engineering; Grace Campbell, Iowa State College, instructor in mathematics; and Edith Kuney, Willamette University, instructor in modern languages.

The nine new assistants appointed for the various departments include H. F. Wilson, University of Illinois and Colorado Agricultural College, research in entomology; Dr. H. H. Severin, University of Wisconsin, research in botany; F. E. Rowland, O. A. C., '07, chemistry; F. R. Brown, O. A. C., '10, and R. W. Rees, O. A. C., '10, horticulture; F. E. Pernet, O. A. C., '10, electrical engineering; Mrs. Ida R. Moore, Corvallis, commerce; F. E. Ewart, O. A. C., '10, electrical engineering; and Bertha E. Herse, O. A. C., '10, library assistant.

Miss Annabelle Lee, University of Michigan, will be general secretary of the college. Y. W. C. A., and Miss Annie Pettinelli, Simmons College, Boston, will have charge of the business management of the women's dormitory.

Four New Buildings Ready. The central agricultural hall, the armory, the heating plant and the new range and greenhouses for the horticulture department are all to be completed ready for occupancy at the opening of the first semester. Their construction has cost, in the aggregate, some \$134,000, adding greatly to the facilities for instruction and scientific research.

The agricultural hall, a \$40,000 brick and stone structure of four stories containing 42 classrooms, laboratories and offices, is south of the agronomy building which is connected

as a wing. When the horticulture building, now housed in the south end of the new building is added as a south wing, the whole will compose one of the largest and most imposing edifices on the campus. The agricultural hall also contains at present the departments of botany and plant pathology, poultry husbandry, art, zoology and entomology industrial pedagogy, and the offices of the dean of the agricultural school and the experiment station.

The new range of green houses, costing \$7,000 gives the horticulture department a total area of 6,700 square feet under glass. These buildings are constructed with a central two-story house, with five under glass, three of them 90x20, and two 33x20 feet. Hot water heating apparatus will keep any one of the houses at any desired temperature.

The \$40,000 armory, the largest of its kind in the United States is a steel reinforced concrete structure 356x126 feet, with a drill hall furnishing an unobstructed area of 3,000 square feet and facilities for 1,000 men.

A heating plant for the buildings of the south side of the campus, of reinforced concrete, contains a 250 horsepower boiler, and cost \$35,000. A considerable amount of new equipments has been added, and will greatly facilitate instruction during the coming year.

Don't Break Down. Severe strains on the vital organs, like strains on machinery, cause severe break-downs. You can't over-tax stomach, liver, kidneys, bowels or nerves without serious danger to yourself. If you are weak or run-down, or under strain of any kind, take Electric Bitters, the matchless tonic medicine. Mrs. J. E. Van de Sande, of Kirkland, Ill., writes: "That I did not break down, while enduring a most severe strain, for three months, is due wholly to Electric Bitters." Use them and enjoy health and strength. Satisfaction positively guaranteed. 50c at Koepfen Bros.

COURT HOAXED BY MAN POSING AS BARRISTER

Paris.—The court of first instance at Cherbourg has just been hoaxed by an am named Cagniard, who, posing as a qualified barrister, appeared in court and successfully pleaded in a divorce case on behalf of one of his friends.

His plan of operation was to persuade another woman to receive the legal summonses instead of the real wife, who knew nothing of what was going on and so could not fight the case. Cagniard, giving himself out to be a barrister of the court of appeals of Paris, then appeared in court in a barrister's robe, pleaded eloquently and secured the judgment.

The trick was found out, however, and the court has taken its revenge by sentencing the hoaxer to six months' imprisonment by default for he has not yet been caught.

Look, Gentlemen! Checks given on pool games at the Pastime Parlors. J. H. ESTES.

FATE OF PARIAS DOGS ROUSES HUMANITARIANS

London.—The unhappy fate of the pariah dogs of Constantinople has roused the anti-cruelty societies to action. The Royal Society for the Prevention of Cruelty to Animals is appealing for funds to have the animals mercifully destroyed, which will not be done without serious trouble with the Turkish authorities.

When the Turkish authorities decided to clear the streets of these half-wild dogs, they were obliged to respect the Mohammedan prejudice against shedding animal blood. So they took the infinitely less merciful course of shipping the dogs wholesale to the desolate island of Oxo in the Sea of Marmora. There they are existing in a terrible state of starvation and disease. They are scantily fed on bread and water which is always secured by the stronger dogs. The dogs show their intelligence by opposing the landing of every fresh boatload of exiles from the city that is brought to the island.

The stench from the "island of death" is described as unbearable.

Catarh Cannot Be Cured with LOCAL APPLICATIONS, they cannot reach the seat of the disease. Catarh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarh Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarh. Send for testimonials free. F. J. CHENEY CO., Props., Toledo, O. Sold by Druggists, price 75c. Take Hall's Family Pills for Constipation.

Call for Warrants. All general fund warrants registered during the months of April, May, June and July, 1910, will be paid at my office in the county court house upon presentation.

Interest ceased upon date of publication. Dated, Pendleton, Ore., Sept. 10, 1910. G. W. BRADLEY, County Treasurer.

Sleeplessness. You can't sleep in the stillest night if your digestion is bad. Take Hood's Sarsaparilla. It strengthens the stomach and establishes that condition in which sleep regularly comes and is sweet and refreshing.

Notice. VOTE FOR—R. W. Henneman, who stands for Statement No. 1, the direct primary and against the assembly and machine politics. (Paid Advertisement.)

NATURE TELLS YOU.

As Many a Pendleton Reader Knows Too Well.

When the kidneys are sick, Nature tells you all about it. The urine is nature's calendar. Infrequent or too frequent action; Any urinary trouble tells of kidney ills.

Doan's Kidney Pills cure all kidney ills. Pendleton people testify to this. T. F. Felton, 807 Vincent street, Pendleton, Oregon, says: "I can recommend Doan's Kidney Pills highly, having used them with excellent results. The secretions from my kidneys were too frequent in passage and I was obliged to get up several times at night. I also had backache and I was very desirous of getting rid of my trouble. Doan's Kidney Pills relieved me and after taking them I enjoyed much better health."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

EGYPTIANS AND TURKS VISIT CONSTANTINOPLE

Cairo.—There has been a remarkable exodus of Egyptians and Turks to Constantinople this summer. The land procession of carriages which used to drive every afternoon in the hot season along the famous Gezira road in Cairo or the stamish road to San Stefano, has dwindled into nothingness. It used to be one of the sights, but now these carriages are conspicuous by their absence.

The reason of this migration to the shores of the Bosphorus is, two-fold. During the regime of Abdul Hamid, neither Turks nor natives dared to enter his dominions—at any rate, Turkey in Europe—for they never knew what intrigue was on foot or whether they would ever return thence.

When the constitution was first proclaimed a few of the more venturesome spirits went to Constantinople to pay their respects to the new powers.

As they returned alive, and affairs seemed to have become normal once more, their example was followed the next year, and the exodus has gone on increasing.

This year perhaps the long stay of the khedive—a stay which is said to be in connection with concessions for the vast estates has just purchased—has no doubt attracted an extra number of visitors, but the exodus has aroused no little comment here.

Nick Longworth has reformed and won't vote for Cannon again, but so far as known Alice is still smoking cigarettes.
