THIN FOLKS MADE FAT.

The Way Samose Works Its Wonders.
 More than half the readers of the East Oregonian would give almost anything to be plump and rosy instead of thin and scrawny.
 Physicians and chemists for years have studied the problem of making a flesh-forming food, but it is only within the last few months that a bright man discovered the prescription that taken with the daily meals gave a positive increase in flesh. In fact it was so certain in its action that a guarantee was attached to each package stating that if weight did not increase as a result of using it, the purchase price would be refunded.
 This preparation is now put up in convenient form for use under the name of Samose.
 Taken with each meal, it enables the system and that in connection with its own flesh-forming and tissue building foods gives healthy flesh. The emaciated form fills out into the beautiful curves of plumpness, the scrawny limbs become round and firm, the cheeks fill out and take on the rosy bloom of perfect health and normal strength.
 Koeppen Bros. have secured the agency in Pendleton.

The "pure food law" is designed by the government to protect the public from injurious ingredients in both foods and drugs. It is beneficial both to the public and to the conscientious manufacturer. Ely's Cream Balm, a successful remedy for cold in the head, nasal catarrh, hay fever, etc., containing no injurious drugs, meets fully the requirements of the new law, and that fact is prominently stated on every package. It contains none of the injurious drugs which are required by the law to be mentioned on the label. Hence you can use it safely.

RESEEDING BURNED OVER TIMBER LAND

Portland, Ore., Dec. 7.—Nine thousand acres of burned over timber lands in the Pacific northwest will be reseeded with Norway spruce and Scotch pine, according to an announcement made by J. F. Kimmel of the forest service. Seeding is already under way and will be completed before snows set in among the mountains.
 Most of the work is being done in the Siuslaw forests in western Oregon along the coast and in the Olympic forests in Washington. The forest service plans in this way to reclaim thousands of acres of burned off lands every year. There are a million and a half year-old trees in the nurseries of the forestry department in the northwest ready for transplanting where reseedling is impracticable.

In Appreciation.
 We, the undersigned committee appointed by Pendleton Lodge No. 283, B. P. O. Elks, wish to publicly express our thanks and appreciation to the Eilers Piano House of Pendleton for the beautiful Kimball piano so kindly loaned us for the Elks' memorial exercises, held in the opera house December 4, 1910. Signed,
 JOE H. PARKES,

BREAKS UP A COLD IN SEVERAL HOURS

A FEW DOSES END MOST SEVERE GRIPPE MISERY

There is not one grain of quinine in Pape's Cold Compound, which, when taken every two hours, until three consecutive doses are taken, will surely end the grippe and break up the most severe cold either in the head, chest, back, stomach or limbs.
 It promptly relieves the most miserable neuralgia pains, headache, dullness, head and nose stuffed up, feverishness, sneezing, sore throat, running of the nose, catarrhal affections, soreness, stiffness and rheumatic twinges.

Pape's Cold Compound is the result of three years' research at a cost of more than fifty thousand dollars, and contains no quinine, which we have conclusively demonstrated is not effective in the treatment of colds or grippe.
 Take this harmless Compound as directed, with the knowledge that there is no other medicine made anywhere else in the world which will cure your cold or end grippe misery as promptly and without any other assistance or bad after-effects as a 25 cent package of Pape's Cold Compound, which any druggist in the world can supply.

WILL EXPERIMENT IN DRY FARMING

Portland, Ore., Dec. 7.—Experiments in dry farming in semi-arid sections of Oregon and in irrigation in the Willamette valley region, where the practice has never been tried systematically, will be conducted by the government in conjunction with the Oregon Agricultural College, President Kerr of that institution has just returned from the east where he secured the promise from the federal authorities to co-operate in the work and a central experiment station for dry farming will be established in Harney county.
 Results of carefully conducted experiments along these lines are awaited with considerable interest by settlers who will be most directly benefited.
Get the Genuine Always.
 A substitute is a dangerous makeshift especially in medicine. The genuine Foley's Honey and Tar cures coughs and colds quickly and is in a yellow package, contains no opiates and is safe and certain in results. A. C. Koeppen & Bros.
