

REVELATION IN AUTOMOBILE BUILDING

The 1911 E-M-F "30"

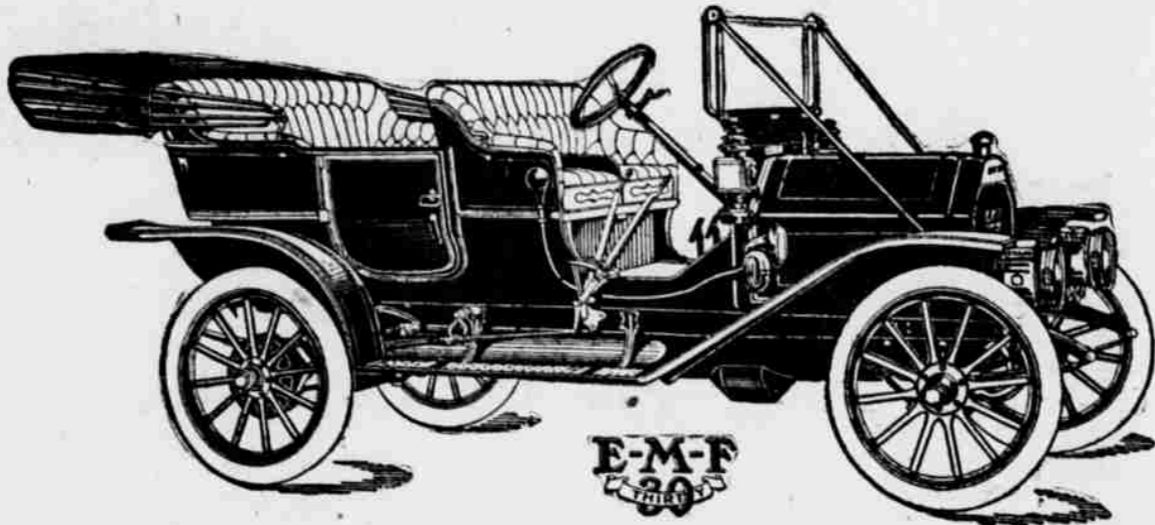

DELIVERED TO YOU IN PENDLETON FOR \$1250.00

By turning out 205 automobiles every working day of the year, in their \$7,000,000.00 plant the E-M-F Company is enabled to sell and charge on the quantity plan. The car is equal to any make of nearly twice this price, but the turning out of so large a number of machines each day enables them to reduce the price ridiculously low.

The control is standard; the frame the acme of engineering skill; the lubrication and cooling systems unequalled for simplicity and satisfactory service.

An E-M-F "30" Five passenger, 30 horsepower, 4 cylinder touring car, complete with wind shield, fine Mohair top, Magneto, 5 lamps, tube horn and generator—and guaranteed for one year—\$1250 F. O. B. Pendleton.

HERE IS THE CAR

—AND HERE IS THE GUARANTEE

THE E-M-F COMPANY

Certificate No. MANUFACTURERS OF AUTOMOBILES Motor No.
DETROIT, MICHIGAN
U. S. A. Car No.

GUARANTY

THIS IS TO CERTIFY that the E-M-F COMPANY Fully WARRANTS AND GUARANTEES the automobile covered by this certificate FOR THE PERIOD OF ONE FULL YEAR from the date of original sale by the Dealer. This Guaranty includes all material and all equipment (tires excepted) used in connection with the construction of such automobile.

Tops and Windshields not guaranteed unless bearing E-M-F Name Plate.

If any part or parts of this car break or prove defective within one year FROM ANY CAUSE WHATSOEVER, and the customer shall forthwith communicate the facts to The E-M-F Company or one of its authorized dealers giving the number of the car, and the name of the dealer from whom the car was bought, and the date of purchase, and if it shall appear that such breakage was not in fact due to misuse, neglect, or accident, The E-M-F Company will furnish such new part either at a branch house, or at its factory in Detroit, Michigan, FREE OF CHARGE TO THE OWNER.

This Guaranty does not apply either directly or indirectly to consequential damage of any nature whatsoever, or to the replacement of tires which are guaranteed by the manufacturers thereof.

ATTEST:
ROBERT W. BROWNSAN,
Secretary.

THE E-M-F COMPANY
WALTER E. FLANDERS,
President and General Manager.

GUARANTEE—The E-M-F Company's one-year guarantee which appears in this ad needs no amplification or explanation. It speaks for itself. Every E-M-F car is backed up by a definite promise—the most liberal in motordom. Not only the car but the equipment as well—aside from tires which are guaranteed by the manufacturers—are included in its provisions. Don't be misled by trickily-worked promises that warrant cars for indefinite periods. Some of these "Guarantees," carefully analyzed, really mean nothing. The conventional 90-day guarantee is a relic of antiquity—a legacy of the days when a motor car was an experiment, not a standard, staple article. The E-M-F guarantee is a definite promise for a definite period—ONE WHOLE YEAR.

Manufacture of a car like this at a figure that makes possible the quoted selling price is the industrial achievement of the age. It is an achievement possible to no other manufacturer of motor cars.

Call and let us show you the new E-M-F "30" for 1911

President Kerr's Biennial Report
Brings Out Many Important
Features—1900 Students for Year of
1911.

Oregon Agricultural College, Corvallis, Jan. 27.—The biennial report of President W. J. Kerr of the Oregon agricultural college addressed to the board of regents presents some of the most striking facts in the history of agricultural education. That upwards of 88,000 persons have been actual participants in the work of the college during the past two years and that a number who have received benefit from its innumerable bulletins, circulars and the personal correspondence of the faculty, would swell the number to surprising proportions is but one of the facts presented to show the tremendous range and value of the work of the college. Reviewing in detail the work of every department of instruction and experiment connected with the institution during the past two years, President Kerr forecasts the broadening of the work and the requirements for its conduct during the next two years.

Great Increase Shown.
In that portion of the report covering student enrollment during the past biennium, President Kerr shows that 1351 students were registered at the college during the year 1909 and that the enrollment for the present year will reach between 1800 and 1900 students. Of this increase, the greatest number has swelled the rolls of the school of agriculture and in this school, too, has been the greatest development of all its departments. Oregon has taken the lead in the tremendously increasing interest in scientific agricultural methods which has been reflected in every state in the union. The special portion of the report devoted to the school of agriculture shows that during the three years from 1907 to 1910, the number of purely agricultural courses offered in the Oregon agricultural college has increased from 18 to 123. During that same time the student enrollment has shown practically the same percentage in gain. The number of students in regular degree courses has increased 243 per cent. In the winter short courses the enrollment has increased 830 per cent. The proportion of agricultural students to the total college enrollment has increased from 10 to upwards of 27 per cent.

Of the tremendous increase in the interest taken throughout the state in the college extension work, President Kerr says: "During the biennium there have been held 143 sessions of farmers' institutes in 28 different

counties with an aggregate attendance of 28,105. Four demonstration trains, with stops at 78 different places, have been run, securing an attendance of 59,000 persons. The apple packing schools have enrolled 270 students which makes a total of 86,599 persons who participated in the institutes and the itinerant schools. In addition to this work there has been a large number of college bulletins and circulars, relating to various phases of agricultural work, distributed throughout the state. There has also been personal correspondence to the extent of approximately 19,000 letters per year. The value of such work is indicated by the fact that the demand for it has been far in excess of the available funds with which to meet the expense."

Many Improvements Needed.
As a result of the cuts of from 20 to 50 per cent which have been made in the original departmental estimates requested on the basis of absolute conservatism the amount requested in the supplies department of the budget has been reduced from \$93,792, the original estimate of the departments, to \$60,000. Similarly, the \$92,659 request for improvements and repairs has been more than cut in half and only \$40,000 has been asked for. Apart from the funds absolutely necessary for the work of the college as shown by the budget, the report shows the tremendous need of a building to house the college library, which will require an expenditure of approximately \$125,000. The need of a serviceable auditorium and a dormitory for men students, each to cost in the neighborhood of \$100,000. In other departments, the amount requested has been greatly reduced from the original estimate and the actual appropriations requested represent only the absolute necessities to the college for carrying on its work.

In the section of the report devoted to experiment stations, it is shown that the great work which has been done at the regularly established stations at Corvallis, Union, Hermiston and Moro has by no means been the extent of the actual experimental work done in the state under the direction of the main station. Experimental work of vital importance to the farmers and fruit growers of the more important agricultural districts of Oregon has been carried on in cooperation with the farmers themselves in the Willamette valley, Rogue river valley, at Hood River and at other important agricultural regions of Oregon. Dr. Withycombe of the main experiment station at Corvallis, in commenting on the report today, estimated that the experiments carried on by the entomological department of the station had resulted in discoveries which had already saved the fruit growers of Oregon several million of dollars. He further estimated that the growing of clover, vetch, alfalfa and kale in Oregon, which has received its impetus from the work of the station here, had resulted in adding ten millions of dollars annually to the agricultural products of Oregon.

That the experiment stations may bring their labors to the highest ef-

iciency for serving the farmers of Oregon and increasing its natural wealth, Dr. Kerr urges in his report the establishment of several new experimental stations throughout the state, including a 300-acre farming station in the Harney valley, a branch experiment station in southern Oregon and subdivisions in the different parts of the Willamette valley. Should the state see fit to establish these stations the department of agriculture at Washington will, according to the report, cooperate with the state to the extent of furnishing one half of the funds for the pursuit of the investigations.

A Reliable Cough Medicine.
Is a valuable family friend. Foley's Honey and Tar fulfills this condition exactly. Mrs. Charles Kline, N. 8th street, Easton, Pa., states: "Several members of my family have been cured of bad coughs and colds by the use of Foley's Honey and Tar and I am never without a bottle in the house. It soothes and relieves the irritation in the throat and loosens up the cold. I do not hesitate to recommend it highly." For a gripe cough and for delicate people use only Foley's Honey and Tar. Contains no opiates. Koepfen Bros.

Foley Kidney Pills.
Are tonic in action, quick in results. A special medicine for all kidney and bladder disorders. H. M. Beatty, Little Rock, Ark., says, "For two years I have been troubled with severe kidney trouble. The pains across my back and over my hips were so bad that they almost meant death to me at times. I used several well known kidney remedies which gave me no relief until I used Foley Kidney Pills, and these I can truthfully recommend as they have made me sound and well." Koepfen Bros.

Notice to Contractors.
Sealed proposals will be received for the erection and completion of St. Mary's R. C. church, Pendleton, Oregon, until Wednesday, March 1st, 1911, at 1 o'clock p. m. All bids must be addressed to M. P. White, architect, 610 Market street, Pendleton, Oregon.

Plans and specifications may be had from the Rev. J. M. Cataldo, S. J., Pendleton, Oregon, and from M. P. White, architect, 1917 First street, Baker City, Oregon.

Dated January 18, 1911.
The busiest and mightiest little thing that ever was made is Chamberlain's Stomach and Liver Tablets. They do the work whenever you require their aid. These tablets change weakness into strength, listlessness into energy, gloominess into joyousness. Their action is so gentle one don't realize they have taken a purgative. Sold by all dealers.

Entry Notice.
One span of sorrel geldings somewhat old. Weight about 1150 pounds. Any person notifying Chas. Lobough, Pilot Rock, or John L. Bentley, 502 Lillith street, Pendleton will be rewarded.

AUCTION SALE

FEBRUARY 8th, 1911

I will sell at Public Auction the following described Property consisting of the entire farming outfit of James H. Christopher 4 1-2 miles west of Adams and 3 miles north of Havana Station on what is known as the Christopher place
