## Newsy Notes of Pendleton

**Brings Carload of Cattle.**  
Glen McCulloch, foreman of the Stanfield ranch at Stanfield, brought in a carload of fine beef cattle this morning for Ross Carney of this city.

**Long Funeral Saturday.**  
The funeral of Edwin Long, who died Monday night at the local hospital, will be held Saturday afternoon. The hour has not yet been set.

**Hermiston Man Injured.**  
Gus Exodus while engaged in removing a pump from his well at Hermiston, yesterday had the misfortune to cut the first finger from his right hand and the whole hand was badly mashed also. He was brought to the local hospital last night.

**In the Police Court.**  
H. O'Connor was given three days in jail this morning by Judge Fitz Gerald on a charge of being drunk. Will Hiatt was arrested on a drunk and disorderly charge last night and will stand trial this afternoon. Among the witnesses subpoenaed in the case is Orton E. Goodwin.

**Leave Pendleton Tonight.**  
Mr. and Mrs. Kenneth Cooper will leave tonight for Mozier, where they will make their future home and engage in the fruit raising industry. Mr. Cooper has been one of the proprietors of the Bowman hotel for the past few years and both he and his wife have made many friends in Pendleton during their residence here.

**Make Inland Trip.**  
Gus Peret, exhibition shot for the Peters Cartridge company, and W. R. Rhinehart, eastern Oregon representative of the Marshall Wells company, left yesterday afternoon for a two weeks' trip into the interior of the state. They will return to Pendleton about March 2. Mrs. Rhinehart left on the local this morning to join her husband at Stanfield and will make the trip with him.

**Wrote Three Twins Lyrics.**  
It will be interesting to Pendleton people to know that the lyrics of the comic opera, "The Three Twins" which is to appear at the Oregon theater tonight were composed by Otto A. Hauerbach, formerly instructor of English and oratory at Whitman college and who was well known in this city. He is now in New York and is at present engaged in writing the lyrics of another light opera which is soon to be staged.

**Maloney Is Vice President.**  
At a special meeting yesterday of the new Farmers' Union Fire Insurance company, County Judge J. W. Maloney was elected as vice president of the corporation, vice Dave Nelson, who resigned on account of his increased duties in the management of the new farm which he recently purchased. Mr. Maloney has purchased a large part of the stock in the company formerly owned by Mr. Nelson.

**Cannot Use the Swing.**  
At the production of the comic opera "Three Twins" tonight the much advertised electric swing stunt will not be given according to an announcement made today by Manager C. J. Mitchell of the Oregon. Previously the appearance of this feature had been promised but upon the arrival this morning of A. L. Downing, master mechanic for the show he declared the act impossible. The stage of the Oregon is not sufficiently high for the swing, according to the master mechanic. However, Mr. Downing says that all the other features of the show will be produced.

**Fruit Companies Sued.**  
Hinkle and Warner, the Hermiston attorneys yesterday afternoon filed a suit in the local court for J. K. Shottwell against John Van Gein, Clifford L. Morgan, the Keystone Fruit company, The Pennsylvania Fruit company, the Presque Isle Fruit company and the Erie Oregon Fruit company, alleging that these Hermiston companies, through their agents, Van Gein and Morgan, contracted with the plaintiff and agreed to pay him \$10 an acre for clearing 175 acres of scruboak and seeding it. Plaintiff alleges that he performed his part of the contract but has only been paid \$1029.50 for his services. Therefore, he asks for the balance of \$710.50 with interest and costs.

A North Dakota man went into the county auditor's office after a blank marriage license. The auditor said he only had hunting licenses for sale and directed him to the clerk of court. From the fact that he wanted a blank, the chances are the hunting licenses are really what he wanted.

## PERSONAL MENTION

Mrs. F. Gerrard of Umatilla, was in the city yesterday.

F. G. Lucas was down from his home at Weston yesterday.

D. E. Kennworthy of Walla, is registered at the Hotel St. George.

Dr. Fred Lieuallen returned to his home at Pilot Rock this morning.

Joe Lindsey has accepted a position as operator at the Cosy theater.

L. E. Roy returned to his home in Pilot Rock on the local this morning.

B. Bannister of Athena, was in the city yesterday transacting business.

G. M. Lewis came in on the local this morning from his home at Adams.

D. B. Watson took the local this morning for the west end of the county.

Frank Gardiner of Baker, was registered at the Hotel Bowman yesterday.

Mrs. L. G. Pell was an incoming passenger on the Walla Walla local this morning.

Dr. D. C. McNabb, the veterinarian, was an outgoing passenger on the local this morning.

J. M. Hodges was in the city yesterday from his home at Stanfield. He is town marshal.

Ed Peters, the local brick mason, returned from Stanfield on the local yesterday evening.

Zoe Houser, formerly county sheriff, came up from Stanfield on the local last evening.

Pete Murray, the well known Adams resident, came in this morning on the Walla Walla local.

H. C. Means, the Umatilla hotelman came in from the railroad town yesterday to transact business.

E. C. Clark of Minneapolis, Minn., representing the Standard Gauge company, is in the city today.

Dr. M. S. Kern, the local lumberman, went to Hermiston this morning to attend to business matters.

R. W. Fletcher, circulation manager of the East Oregonian, went to Stanfield this morning on business.

J. T. Mayo, superintendent of bridges and building for the Oregon-Washington company, is in the city today.

M. L. Watts, the Athena miller, is transacting business in the city today, having come in on the local this morning.

Carl Engdahl, the young warehouseman from Helix, was an incoming passenger on the Northern Pacific this morning.

Perry Myrick, who just recently returned from California with a bride, left yesterday afternoon for his home at Helix.

Earl Williams of Milton, came down from that place last evening to attend the meeting of the poultry association last evening.

Gus Smythe, prominent Gilliam county sheepman and brother of Dan P. Smythe of this city, arrived last evening from Portland.

Miss Ida Boyd, the well known booster for the Woman's League, went to Portland this morning to visit with her niece, Mrs. C. S. Jackson.

Mayor H. R. Newport was in the city yesterday, having returned from Hot Lake where his father is slowly recovering from the wound on his head.

E. P. Dodd, the Hermiston real estate man, returned to his home on the local this morning, after visiting over night on his way back from Hot Lake.

Miss Daphne Leasure arrived last evening from Portland to visit several weeks at the home of her grandmother and aunt on South Main street.

## PRESIDENT-ELECT IS FOR PAID MANAGER

Enthusiastic over the work that will be before the Commercial association this year and possessed of much information gathered on his trip, Dan P. Smythe, president-elect of the Pendleton Commercial club, returned home yesterday. While away Mr. Smythe visited in Portland, Astoria and Seattle and needless to say he devoted much time to visiting the commercial organizations in those cities and to talking to the men who are carrying on the work in the various organizations.

Returning home, Mr. Smythe says he is more impressed than ever with the belief that the local association should get busy at once with the employment of a paid secretary or manager so as to get the organization upon a better working basis. He is anxious to see this reform brought about before any other considerable work is undertaken by the association. With a paid manager-secretary he believes that the club membership can be greatly increased and the association placed upon a far stronger footing than at present. Then other work for local improvements such as a new theater, can be undertaken.

Mr. Smythe is now recovered from his recent illness and is in much better health than before he left upon his trip.

## WELL PROTECTION TO PREVENT TYPHOID FEVER

**Report of the United States Geological Survey.**

The menace of typhoid fever in country districts—a menace arising from polluted drinking water—is thoroughly considered in a report by Myron L. Fuller, of the United States geological survey, in which the various sources of pollution are indicated and suggestions are given for means of protection.

Typhoid-fever rates are usually greater in the country than in cities, despite the prevailing belief that farms, isolated as they are from areas of congested population, are ideally situated for obtaining pure and wholesome water.

**Wells Unprotected.**

Failure to protect adequately the wells in farming districts is given in the survey's report as the most common reason for their pollution, and ignorance of the manner in which ground water circulates is the cause of the faulty protection. Chemical analysis is not rated high by Mr. Fuller as a means of detecting polluted water, for he asserts that a careful commonsense inspection of the district is usually more to the point.

**Radius of Danger Zone.**

Sources of pollution in the vicinity of a well or spring should be noted wherever possible, and drinking water should not be drawn except at a safe distance from them. The distance required for absolute safety varies greatly with the character of the rock. For wells sunk in sandstone, slate and shale, 1000 feet may be sufficient; where the surface stratum is composed of fine sand 200 feet should be allowed; and where it is limestone or granite much greater distances will be necessary. Water may run polluted in limestone for miles so that wells in regions where limestone makes up the greater part of the surface rock should be carefully examined after rains for mud

and floating matter, for these are pretty sure indications of pollution.

**Suggestions for Protection.**

For protecting wells, springs, and cisterns Mr. Fuller advocates, first of all, a water-tight lining to keep out surface water. Wells and springs should always be covered and protected from animals, dust and falling leaves. Watering troughs should always be located a safe distance away, though the custom prevails in country districts of having well and trough side by side.

Mr. Fuller's report is printed as Water Supply Paper 255, which may be obtained free by applying to the Director, U. S. Geological Survey, Washington, D. C.

**Russian Wool Clip.**

The September wool clip of South Russia in 1910 was medium in quality and reduced in quantity as compared with 1909. In places this reduction is alarming, and seems to indicate that unless unforeseen changes take place wool growing in South Russia will soon be a thing of the past.

In the Don territory, including some of the adjoining districts of the cis-Caucasian region, the total quantity of the rough wool clip is about 180 tons. Last season it was double that quantity. In the Crimea the clip seems to aggregate about 125 tons, against 324 to 360 tons in 1909. In other parts the decrease is not so marked. In Bessarabia it is inappreciable and in some minor districts there may be even an increase. The general trend, however, is downward.

The results per sheep vary surprisingly, running from 1 pound to nearly 10 pounds. The staple is very much mixed. The quality of pure wool in the hundredweight of the fleece runs from 27 pounds up to nearly three times that. As a rule, the wool is elastic and durable. At the annual fairs, where the bulk of the wool is exposed for sale, prices varied from \$2.06 per 35 pounds for inferior and unwashed wool to \$12.88 for a cleaner and better article.

Consistent diplomacy must defend a consistent cause.

For Infants and Children.  
The Kind You Have Always Bought  
Bears the Signature of *Dr. J. C. Fletcher*

## Wheat Land. Stock Ranches

640 acres all seeded, well improved, fine water system.  
480 acres, part in crop, no better land in the county.  
320 acres, all in stubble, plenty of water.  
320 acres all in wheat, fair improvements, plenty of water.

I know the prices on the above lands are correct according to other land values, and the amount they produce.

See me about stock ranches, diversified farms, suburban homes, all kinds of city property and business chances.

## TRAINS TO RUN ON NEW TRACK

### PASS THROUGH COE TUNNEL TOMORROW MORNING

Bridge at Coe Completed and Four Mile Stretch Is Now Open for Traffic—All Steel Laid.

Tomorrow morning trains running between here and Portland will be routed over the first section of the new track of the Pendleton-Yoakum improvement. The bridge at Coe has been completed, which makes four miles of straightened track ready for use, and as the tunnel is included in this stretch, it means that the trains will hereafter avoid the big Horseshoe curve. This stretch will be turned over tonight and a number of officials, among them A. H. McKeen, block signal engineer, Robert Charlton, superintendent of the block signal system, and A. Buckley, assistant superintendent, are on hand for that purpose.

Practically all of the steel along the whole fourteen miles has been laid and nearly all of the ballasting is done. That which remains is being hurried at the rate of 65 carloads a day so that when the other two bridges are constructed, the entire million and a quarter improvement work will have been completed. It is the present intention of the company to leave a mile or two of track at both Pilot Rock Junction and Barnhart to be used as passing tracks.

Twohy Bros., who have had charge of the grading on the line, are all through with their work in this community and Commissioner Ryan and the other men who have had charge of operations here, will leave for Portland tonight.

### SAFES FAIL TO STAND FIRE TEST

During a recent fire in this city eight safes were put to the test and found wanting. Six of these were of English make and two German. The building was two story, of brick, only the flooring being of wood. It was occupied mostly by merchants, and contained considerable quantities of tobacco, cotton cloths, and opium. A large amount of this stock was saved. On opening their safes, however, the merchants discovered that all the papers and inflammable matter contained in them were entirely consumed.

This incident has caused much comment here, and the consulate has been asked whether American safes exist capable of resisting a moderate fire and of preserving from destruction

tion papers, bank notes, etc. There should be an opening here for a safe of this kind.—From Consul George Horton, Saloniki, Turkey.

### AVIATION FEATURE OF RUSSIAN EXPOSITION

The department of state is in receipt of a note from the charge d'affaires of the Russian embassy at Washington stating that the committee organized at St. Petersburg, with his highness Grand Duke Michel Alexandrovitch for its chairman, for the creation in Russia of an air fleet is preparing an industrial exposition to be held at St. Petersburg in March of the present year. The exposition will include an important section of aviation.

### Australian Smoke Consumer.

A practical demonstration has been made in this city of an apparatus for the consumption of smoke and the economizing of fuel.

The appliance consists of a patent fire-box door cast in the form of a deep box, with a sliding grid in front by which the admission of air is regulated. The deep furnace becomes a hot-air chamber in which the air is rarified, after which it passes through a series of breakers formed in the shape of T irons, placed so as to give a proper distribution of air over the furnace fire from the front. The back air box is placed at the end of fire-bar area and is built in so as to admit of the air being distributed over the fire from the back, and by this method of admitting and regulating the air a perfect combustion can be obtained, thereby bringing about a great saving of fuel. As a result the gases are consumed and the smoke discharged from the smoke stack is reduced to an absolute minimum.

The demonstration showed that the smoke from the furnace, which was charged with a full load of slack coal was cut off within half a minute after closing the doors. According to a recent test, the saving in coal amounted to a little over 25 per cent, while the water evaporated per pound of coal was increased by over 40 per cent.

### Cotton Batting Little Used.

Vice Consul General Carl R. Loop, of London, states that cotton bats, as such, are not yet extensively used in the United Kingdom for quilts or comfortables, slider down being the equivalent material used in the manufacture of quilts. If British merchants and dealers are convinced that batting is just as good and that it can be supplied as cheaply as, or more cheaply than, the down, American cotton batting should find a desirable market.

The new dental regulations in the Australian state of New South Wales are forwarded by Consul General Bray, and are filed for public reference at the bureau of manufacturers.

### CUT RATES

## Pendleton Dye Works During February

WILL CLEAN AND PRESS

Men's suits for \$2.00	Ladies suit pressed	1.00
Ladies suits for 2.00	Men's suit pressed	.75

## SOLICITING FUNDS FOR POULTRY SHOW

At the urgent request of Pendleton people who are anxious to keep the annual exhibitions of the Umatilla-Morrow County Poultry association in this city, a committee is today making a stock subscribing canvass of the town with a degree of success which indicates that past deficits will be wiped out and the show retained for Pendleton.

**Cost of Fire in Canada.**

In the last two years Canada has lost \$7,000,000 by fire. Consul General James W. Ragsdale, of Halifax, says that this means a per capita tax equal to \$3.35 per annum for every man, woman and child, and if the census ratio of one adult man for every five of population is considered, then it means an annual loss equal to \$16.75 for every Canadian family. This is a loss far greater than that of any other country. In Austria the per capita loss during the same years was 29 cents; Denmark, 26 cents; France, 30 cents; Germany, 49 cents; Italy 12 cents; and Switzerland, 30 cents.

Victor records from the "Three Twins" at the Snyder Music Co.
