

The Open Door SCIENTIFIC NEW DISCOVERIES.

By the electro-magnetic telegraph an operator can exactly locate a fracture in a submarine cable nearly 3000 miles long. A few fossils sent to an expert geologist enable him to accurately determine the rock formation from which they are taken. This he can describe as perfectly as if the rocky formation was before him on the table.

So, also, in medical science. Disease has certain unmistakable signs or symptoms. By reason of this fact the physician and specialists connected with Dr. Pierce's Invalids' Hotel and Surgical Institute at Buffalo, are enabled to accurately determine the nature of many chronic diseases without seeing and personally examining their patients. In recognizing disease without a personal examination of the patient, they do not claim to possess miraculous powers. They obtain their knowledge of the patient's disease by practical and well-established principles of modern science. Certain diseases display certain peculiar traits. Subjected to scientific analysis they furnish abundant data to guide the judgment of the skillful practitioner. This method of treating patients at a distance, by mail, has been so successful that there is scarcely a city or a village in the United States that is not represented by one or more cases upon the records of practice at the Invalids' Hotel and Surgical Institute. Such rare cases as cannot be treated in this way, which require surgical operations or careful after-treatment, or electrical therapeutics, receive the services of the most skillful specialists at the institution.

Dr. R. V. Pierce long ago established this Invalids' Hotel and Surgical Institute with a full Staff of Physicians who were expert in their specialties. These physicians may be consulted, by letter, free and without charge whatever. If you wish a specialist's advice upon any chronic malady, the same system of "specialties" is observed as in the departments of a medical college. The professor who would assume to lecture in all departments with equal ease and proficiency would be severely ridiculed by his colleagues, and it is just as absurd to suppose that the general practitioner can keep himself informed of the many new methods of treatment that are being constantly devised and adopted in the several departments of Medicine and Surgery.

People who have been patients at Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., have much to say in regard to this wonderfully equipped Sanitarium, where all the latest electrical apparatus, as well as electric water baths, Turkish baths, static electric machines, high-frequency current, and other most modern and up-to-date apparatus are used for the cure of chronic diseases. The treatment of the chronic diseases that are peculiar to women have for many years been a large factor in the cures effected at the Invalids' Hotel and Surgical Institute.

The violet-ray treatment, which is another interesting proceeding, is carried out by concentrating the light, rich in the violet or chemical rays, from an arc light with a specially treated carbon, upon some portion of the body that may be the seat of pain. Sufferers from neuralgia, sciatica, rheumatism, strains, sprains, also from those obscure exhausting pains the origin of which cannot at times be accurately determined frequently find immediate relief from a single treatment and usually with a little persistence in the use of this aid, comfortable health or perfect recovery is obtained.

Then, there is the incandescent light bath, consisting of a cabinet in which the patient is bathed in the combined rays of many electric lights. It has produced really wonderful results in diabetes, sciatica, rheumatism, obesity, anemia, and some forms of kidney and heart trouble. It has also proven valuable in chronic bronchitis, laryngeal asthma and the various skin diseases. As a general hygienic measure its efficiency can scarcely be over-estimated.

In medicine there has been rapid and real progress during recent years, and Dr. Pierce has kept up with the times in that he has had the manufacture and ingredients in his well-known remedies improved in a modern laboratory by skilled chemists, the greatest care being exercised to make the ingredients entering into his well-known medicines Dr. Pierce's Favorite Prescription as well as the "Golden Medical Discovery" are extracted from the best variety of native medicinal roots, gathered with great care and at the proper season of the year, so that their medicinal properties may be most reliable.

Great care is exercised not to over-encourage those who consult the specialists of this institution that no false hopes may be raised.

Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send 31 cent stamps for the cloth-bound.

Write the Invalids' Hotel and Surgical Institute, Dr. R. V. Pierce, President, at Buffalo, N. Y.

A Reliable Remedy CATARRH

Ely's Cream Balm
Is quickly absorbed. Gives Relief at Once. It cleanses, soothes, heals and protects the diseased membrane resulting from Catarrh and drives away a Cold in the Head quickly. Restores the Senses of Taste and Smell. Full size 50 cts., at Drug-gists or by mail. In liquid form, 75 cents. Ely Brothers, 50 Warren Street, New York.

SHORT NEWS NOTES FROM PILOT ROCK

(Special Correspondence.)
Pilot Rock, Ore., March 1.—The Messrs. Thomas and Jaques, "Bill" Brown, Rev. Warrington, Henry Castee and Joseph Lynch attended the encampment of the I. O. O. F. lodge at Pendleton Thursday evening.

Merwyn Gilbert of Ukiah, spent a few days last week at Pilot Rock.

Ada MacInnis returned to her home in Portland Saturday after visiting a few days with relatives and friends.

Esther Sturtevant spent Monday evening in Pendleton on business.

Miss Hazel Beattie left Monday for Nye where she visited for a few days.

Mr. Gilbert left Tuesday morning for Pendleton on business.

Master Erceel Lynch spent Friday evening in Pendleton.

Dr. Leucallen was a Pendleton visitor Tuesday.

Erin Ivy of Missouri, returned to Pilot Rock after spending some time in California.

Miss Maude Koontz of Pendleton, is spending a few days in Pilot Rock with relatives.

Mr. Merwyn Gilbert spent Thursday in Pendleton.

Jules Mathews of Stewart creek, who has been on the sick list for the last two weeks was able to spend Sunday in Pilot Rock.

Mrs. Walter Smith and Dewey Jacques are on the sick list this week.

CROP RESULTS ON IRRIGATION PROJECT

Huntley Enterprise in Montana Makes Good Showing for Reclamation Service.

Statistics are usually dry reading, but a recent census of crop results on the Huntley irrigation project in Montana for 1910 is exceedingly interesting to those who have been watching the development of the west.

It was on May 21, 1907, that the project of 29,000 acres was formally opened. Since that date 429 farmers and their families have settled on the land, four towns have been established, and ten school houses have been erected.

Farmers are not prone to boast of their success and it is usually difficult to secure statements from them of crop yields. The project engineers who sent out requests to the settlers on the Huntley project for crop reports received 283 replies covering an area of about 7,500 acres.

A compilation of these reports shows crop yields for 1910 valued at more than \$158,365 or an average of \$25 per acre exclusive of revenue from dairy or poultry products or increase and sales of live stock. It is probable that the gross returns from all sources averaged more than \$30 per acre.

These returns are remarkable in view of the conditions on the Huntley project. The lands in 1907 were absolutely virgin desert. Untouched by plow, unpruned by rain, they were most unpromising. A large percentage of homeseekers proved to be men without experience in farming and totally unfamiliar with irrigation.

It has therefore been a matter of exceeding gratification to the reclamation service that the number of actual failures has been really negligible.

A perusal of the letters from the farmers furnishes very interesting reading to those whose thoughts are turning from the city toward the open country. C. O. Stout, formerly a clerk in the post office at Washington, D. C., writes as follows:

"I filed on 47 acres in July, 1907, and am delighted with the country. My expenditures for buildings and water right have been about \$2000. In 1909 I realized from crops taken from 22 acres a gross return of \$11,235. In 1910 I received from the sugar beet factory the sum of \$3,170 for my crop of sugar beets on 31 acres. I believe the well cultivated land in this project is worth from \$200 to \$250 per acre."

John Harrison, formerly a miner from Arizona and California, has a 40 acre farm near the town of Huntley. He estimates that he cleared \$1200 this year from the farm.

Alex Kinmouth, a former Iowa farmer who never saw an irrigating ditch before 1907, now has 11 head of horses worth \$1,600; 15 head of cattle, \$600; 20 head of hogs, \$500; 10 head of sheep, \$200; chickens, \$50; a farm worth \$8,000 and is out of debt.

TO CURE A COLD IN ONE DAY.

Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

People will never be heavy if you put in two tablespoonfuls of corn-starch with the flour.

PURE RICH BLOOD.

Tallman & Co. Sell a Prescription That Means Vigor, Vim, Vitality.

Because MI-O-NA causes the blood to get better and more nourishment it is at all times a valuable tonic. It puts vigor into the muscles, clears up the improperly nourished brain and makes strong nerves that will stand the severest test.

Men who feel that their vitality is slipping away; that the vim and energy that they formerly put into all their work is lacking; that ambitious impulses and clever ideas do not come as they used to—are the kind of men that need MI-O-NA.

BRITISH AMBASSADOR PRAISES THE CANAL

Enthusiastic tribute not only to the skill of American engineers on the Panama canal but to the United States for its devotion to the vast project is found in the recent words of Ambassador Bryce of Great Britain. The Ambassador pronounced the canal: "A magnificent work which stands alone in the annals of the world."

With the approach of the time for the opening of the canal, and the discussion of the part it is to play in the future history of the world, Washington has been listening eagerly for some expression of opinion from the European powers. Ambassador Bryce is the first of European statesmen to respond.

When asked for a statement of his views regarding the canal the Ambassador declared that he could not violate his rule, adopted when he became Great Britain's representative here, of never giving an interview. He added, however, that at a recent dinner in this city, he had presented his views on the Panama canal. Quoting from memory, he repeated his remarks, as follows:

"On my recent visit to the canal, where I was shown every courtesy by the officials there, I was profoundly impressed by the grandeur of the work and by the amount not only of labor, but skill which has been applied in its construction."

"All of the appliances at work for digging and building the canal were striking instances of the progress of modern science, and of the extraordinary capacity American engineers have developed for turning the results of science to the best advantage."

"All England admires the zeal and energy with which the United States is devoting itself to the completion of this magnificent work, which stands alone in the annals of the world. It may have most important results in its effect on the great lines of international commerce."

SON OF MEXICAN SECRETARY OF WAR IS STENOGRAPHER

Ruben Mier, son of the secretary of war of Mexico is holding down a job as stenographer at the monthly salary of ten dollars per week. Young Mier is not worrying about his income but he is keeping an anxious eye upon the maneuvers of the rebel army across the border.

Heavy business responsibilities will some day burden the shoulders of his father. His father, the secretary of war, is heavily interested in a \$10,000,000 smelter at Monterrey. It is called the Pandion de Hierro y Acero de Monterrey. In plain United States this means the Smelter of Iron and Steel of Monterrey. There is also an \$8,000,000 mint at Monterrey.

Senior Mier, the war secretary, is also interested in agricultural pursuits. He favors the installation of agricultural schools in Mexico. Young Mier says: "My country is not so far advanced in agriculture and farming as is the United States. But we hope to get schools established. We have vast resources that are as yet untouched. We want to teach our people and better their conditions."

In the meantime he is serving as an inexperienced stenographer in the office of a Houston real estate dealer for the sole purpose he declares of obtaining an experience that will be of value to him when the war clouds pass away and he enters upon a business career in old Mexico.

STRONG EFFORTS NECESSARY TO MAINTAIN NEUTRALITY

With Mexican insurgents active along the Texas border and half of the United States army of the department of Texas patrolling the Rio Grande strenuous efforts are being made to preserve neutrality but a spirit of sympathy for the rebels and against President Diaz of Mexico has begun to make itself so strongly felt in Texas that Governor Colquitt has felt called upon to issue a warning against any overt act on the part of the people. He points out that any citizens of the United States who accept and exercise a commission to serve a foreign state when that country is at peace with the United States is guilty of a high misdemeanor and liable to a fine of \$2000 and three years imprisonment.

To check any disposition to raise an armed force on this side of the river, Governor Colquitt threatens to invoke the federal statutes which provide a fine of \$5000 and three years imprisonment for all who participate in such an expedition. This proclamation has been given the widest circulation and that some drastic action may follow is indicated by the fact that the mere mention of the name of a rebel leader was applauded in the court room at Brownsville when government officials were looking into alleged violations of the neutrality laws.

WHALING RESULTS ON SOUTH AFRICAN COAST

Consul Edwin S. Cunningham advises that the total output of whale oil at the South African port of Durban for the season beginning May and ending in December, 1910, was about 2,000 tons. Of the two whaling companies one disposes of its output to another concern for manufacturing into glycerin, which the other company also expects to do for the 1911 season. The two Durban whaling companies have stations at Saldanha Bay and on Kerguelan Islands, one is being installed on Bazaruto Island, and another at Inhambane, Portuguese East Africa.

Takes Three More Cougars to Wallace.

Wallace, Idaho.—By bringing three more cougars to town today Nell Leroy of the Big creek section has cinched his title of champion lion hunter of the Coeur d'Alenes. This makes five cougars brought in by Mr. Leroy this month and the animals have netted his \$15 each in bounty.

When You BUILD, Build to STAY!

Re-enforced concrete and concrete blocks are cheaper in the end; are prettier, more substantial and far more comfortable in either cold or warm weather.

Concrete stands unsurpassed for Basements, Foundations, Walls, Fences and Curbing. It looks better and lasts longer than stone

See my many beautiful designs in concrete blocks before you build your home.

I will furnish your estimates for any class of work on application.
