## TRACK IS DONE GRANDSTAND BEGUN

Today marks the close of the first installment of work in the creation of Roundup Park and the beginning of the second. By tonight the last bit of surfacing on the track and arena will have been finished by Superintendent Heine and turned over to the association and men are already at work on the forms for the concrete piers upon which the great grandstand is to rest. The first shipment of lumber for the grandstand, consisting of two cars, arrived this morning from Tacoma and is being taken to the grounds. By Monday the piers will have been set and the work of erecting the best grandstand in the inland empire will be under way. People who have not visited the park since work on the track has been under way should saunter out West Court street some afternoon and take a look at the finished job. The windstorm of last Saturday carried away some of the surface dirt but not enough to do any material damage. The showers of yesterday were a godsend to the grounds for the loose dirt was packed sufficiently to keep it from raising in a wind. It is the intention of the directors, however, to put a sprinkler at work so that the ground becomes properly packed. The arena will be seeded down in order to hold the soil and also to re-

lieve the barrenness of the park, so that when the first exhibition of the 1911 Roundup is put on the audience will gaze down upon a track and arena that will reflect great credit upon the association and the city.

**No Mules for Panama.**  
Instead of the familiar old tow-path mule giant electric locomotives will haul the shipping through the world's largest canal. No steam locomotive could hope to budge such a giant steamer as the Mauretania, which weighs 45,000 tons. The largest and most powerful electric locomotives will be used, and to prevent them from slipping on the rails a third rail will be laid between the other two. This rail will be geared to fit a large cog-wheel which will give the engines a powerful leverage.

**TAFT'S MESSAGE URGES RECIPROCITY**  
(Continued from page one.)

available information explaining his action in ordering the troops to the frontier.

**Navy Report Submitted.**  
Washington, April 5.—Taft today submitted to congress reports of the state and navy departments admitting as true charges by LaFollette that secret plans of the American navy have been furnished to battleships built in the United States for Argentina. The information submitted is in response to LaFollette's resolution passed by the senate at the last session.

**Navy Department Explains.**  
The reports of the navy department said that the secret plans given to Argentina related to the fire control and submarine torpedo tubes. The reports of both departments said in 1908 the American shipbuilders reported that Argentina had appropriated eleven million dollars for two battle ships, that the American firms could not compete with foreigners seeking orders except for fire control and torpedo tubes. Secretary Knox referred the matter to the naval bureau ordinance and as a result an exchange of communications with the Argentine navy department supplied the general plans of the battleships, which were ultimately ordered of American builders.

A new ordinance makes it a misdemeanor to burn anything but electric incandescent lamps in Chicago dry-cleaning establishments where large quantities of naphtha, gasoline and benzine are used.

## Newsy Notes of Pendleton

**Returned from Idaho.**  
R. A. Holte, cashier of the First Bank of Stanfield, was a Pendleton visitor yesterday, having stopped off here on his way home from Twin Falls Idaho, where he had been on a business trip.

**Buys Indian Land.**  
Earl A. Dudley has purchased a quarter section of wheat land on the reservation from Charles McQuirk for \$18,000. The land in question is the allotment made to McQuirk by the government.

**Judge Calls the Docket.**  
Judge Phelps assembled the members of the local bar this afternoon in order to call the docket for the regular term of court and to set the cases. Court will be convened Monday morning.

**160 Acres for \$9600.**  
The Bank of Milton has disposed of 160 acres lying in the east end of the county to J. W. Hall, W. F. Korts and C. M. Hall for a consideration of \$9600. The deed was filed with the recorder today.

**County Court in Session.**  
The regular monthly session of the county court convened this morning at the court house and has spent most of the day in auditing bills. Several important matters concerning good roads are to come up before adjournment.

**Man Almost Dead With Drink.**  
Frank Parr, a mixed blood who is an old offender, was sentenced to three days in the city jail this morning on the old charge of being drunk. When taken into custody, he was lying in a drunken stupor and Officer Kearney at first thought he was dead.

**Find Cache of Stolen Goods.**  
Constable McReynolds of Pilot Rock yesterday succeeded in finding the cache of goods stolen from the Pilot Rock stores on Sunday night and they are now in the hands of Sheriff Taylor. The cache was found near Sparks station and contained a large number of pocket knives and other articles.

**Ellis Sells Property.**  
Ex-Congressman W. R. Ellis and wife have sold to Ralph C. Swinburne for a consideration of \$3100 lots 12, 13 and 14 in block 3 of Jacobs addition to Pendleton with the exception of 42 feet frontage on Lee street on the south side of lot 12 extending back 70 feet.

**Old Resident Near Death.**  
Mrs. Charles Lane of this city, has received word that her aunt, Mrs. L. A. Bozarth, formerly a resident of this city, has suffered a stroke of paralysis at Portland with chances of recovery very doubtful because of her old age. Mrs. Bozarth has many friends among the pioneer people here who will receive this news with sorrow.

**Mrs. W. R. Graham Very Low.**  
Mrs. W. R. Graham, wife of W. R. Graham, the furniture man, who has been very ill since suffering a stroke of paralysis, is lying near death at her home in this city and the end is expected at any time. The immediate relatives of the family are either here or on their way to her bedside.

**Must Pay to Get Divorce.**  
Although Judge Phelps this morning handed down a decree of divorce in the case of Gottlieb Miller vs. Esther Miller, it will not be entered on the records until Clark Saling is paid the two dollar trial fee. The clerk states that in the past, many lawyers have neglected to pay this fee and he has accordingly established a cast iron rule which will be in force hereafter. By the judge's decree, Esther Miller is given \$1500 and must relinquish all claims upon all other property of the plaintiff.

**Judge Lindsey Is Here.**  
Judge Ben Lindsey, the eminent Colorado juvenile judge, arrived in the city this afternoon and will lecture on his work in reclaiming delinquent boys and girls tonight at the Methodist church. During the afternoon Judge Lindsey has been entertained by a committee from the Commercial association and took advantage of the calling of the docket for the April term of court to meet the members of the local bar. Judge Lindsey is perhaps the best number on the entertainment course and his lecture this evening will be both interesting and instructive.

**LINDSEY AND HIS COURT.**  
We instinctively incline to discredit it or at any rate to discount much that is written nowadays on political and economic subjects, because we cannot believe the writers impartial or unprejudiced. No such reservation can be made, however, in regard to Judge B. Lindsey's straightforward and powerful account of the genesis and development of the Denver Juvenile court. His stirring story, written in collaboration with Harvey J. Higgins, was first published in Everybody's Magazine. It was then brought out in book form by Doubleday, Page & Company, under the title, "The Beast."  
**No Time for Election.**  
Dayton, Wash.—Although the election of school officers in the 43 districts of Columbia county was scheduled to be held two weeks ago and in a few of the districts the farmers were too busy with farm work to give any attention to the elections. The result is that directors will probably have to be appointed by the county school superintendent.  
It is more profitable for you to advertise to the man with a home than to the man in general. It is the home that requires your goods. It is the home which gets the necessities and then the luxuries, and which is the backbone of trade.

## NAME IS WANTED FOR BASE BALL TEAM

Here is a chance for some ingenious fan to secure a season pass to the local ball games absolutely gratis. Manager Nelson wants to christen his team with a name that will be significant of the city. Last year the boys in the blue uniforms were called the "Colts" and they have been thus referred to this year but the name is not popular. "Indians" too has been applied but it is apt to be confusing because of the fact that the redmen on the reservation have a baseball aggregation also. Therefore, it has been decided to ask any one with an idea for a name to submit the same to Secretary John Dickson and to the one who suggests the appellation that is finally adopted, a season pass will be issued.

## JAMES PRESTON ELECTED MAYOR OF BALTIMORE

Baltimore, April 5.—Complete returns today show that James Preston, democrat, is elected mayor over Clay Timanus, republican. Timanus was mayor in 1904.

## FROST DANGER PERIOD.

(Lewiston Teller.)  
This is the critical time for fruit in the northwest. The warm days are bringing out the fruit blossoms, though the spring season is not yet far advanced. This fine weather is liable to be followed soon by storms which may be succeeded by severe cold waves, with belowfreezing temperatures and perhaps ruin of the fruit for the season.

The prevention of loss from frost by the use of orchard heaters is now a well recognized measure of practical utility, but it has not yet been given a general and thorough test in this locality. Many orchardists have not yet obtained any equipment for such work in the way of heaters and fuel. Even those who have the needed supplies ready may be taken by surprise and may not be prompt in applying emergency measures.

The weather bureau is preparing to cooperate with fruit growers by giving them frost warnings. The bureau has already announced that the three conditions which during the early spring months may be regarded as signs of frost are a clear still night; a moist soil and a high barometer. Lewiston is one of the four weather bureau districts in the northwest where the fruit growers will be warned when the night is cold enough to render smudges necessary. The proper use of smudges raises the temperature of an orchard from 5 to 6 degrees. The killing frost comes when the temperature falls below 25 or 26, and smudges should be started when it gets below 31 or 32. From 100 to 120 smudge pots per acre are needed, it is said. The fruit growers should be forewarned against frost dangers by being forewarned.

## A GOOD FOOLER.

E. H. Sothorn, apropos of April 4, told at a dinner in New York a story about his famous father.  
"My father in his youth," he said, "was once playing in a romantic drama, wherein he made a tremendous leap—a leap from his lady love's tower to a mattress behind a wooden rock on the stage far below. It was a thrilling leap and my father no doubt enjoyed the applause it won him; but one night he sprained his ankle and vowed he would leap no more."  
"So the manager hired a professional acrobat to do the leap, made up as my father's counterpart, while my father would slip back under cover of the tower wall and descend to his dressing room by means of a hidden ladder."  
"The afternoon the acrobat came to the theater to rehearse he made the leap, and then he set up a loud complaint."  
"What's the matter?" asked a young member of the company, who happened to be in the theater.  
"Why," said the acrobat, in a disgusted voice, "this here leap is too tame. It's too easy. A man with glass eyes and cork legs could do it. Now, if they'd let me throw two fillopians in the air as I came down—"  
"Splendid!" cried the young actor.  
"The very think!"  
"You don't think the boss would mind?" said the acrobat doubtfully.  
"Mind? Why man, he'll be tickled to death. Ten to one he'll raise your salary."  
"That evening when the great leap scene began, my father was gratified to see the acrobat, a perfect picture of himself, crouching in the shadow of the window."  
"Love, good night—good night!" my father cried.  
"Stay!" moaned the heroine, and she threw herself on his neck. "Stay! That leap is death."  
"Nay, nay, my own; 'tis honor, I leap, 'tis true, but there is that within my heart will bear me up—thine image, love. And so, good night, good night!"  
"He kissed her madly on the brow, tore himself from her clinging arms, and rushed across the open space into the shadow."  
"Jump!" he hissed between his teeth.  
"And out, straight out into the air, shot the acrobat. Twice his lithe shape whirled round like a great fly-wheel. Then he lit lightly and easily on the topmost point of the wooden rock."  
"Roars of laughter and thunders of applause shook the theater. The acrobat bowed stiffly and strutted off into the wings with his arms folded. But the remarks of my poor father on his ladder have not come down to us."

Consul Benjamin F. Chase states that an Englishman at Wakefield has invented a heel grip for ladies' shoes; samples thereof which he sent to the bureau of manufacturers may be seen by interested persons.

## PRICES CUT TO PIECES ON MEN'S SHOES

## NEW BOSTON STORE

Consul Henry S. Culver notes that experimental shipments of frozen rabbits and lamb have recently been received at St. John, New Brunswick, from Australia. Cargoes of butter also reach Canada from time to time from ports in Australia. If the venture proves successful, it is understood that direct cargoes of these commodities will be brought to St. John.

William L. Washington, retired capitalist of New York, is a descendant of John Augustine Washington, brother of General George Washington. He served as aide de camp on the Staff of General Joseph E. Johnston of the Confederate army, throughout the war.

## MOVE LAUNCHED FOR GREATER COMMERCIAL CLUB

(Continued from page one.)

This action of the association was taken following the announcement by Postmaster Brown that the postoffice department had received any requests from churches and other organizations to close postoffices on Sundays that the matter was being seriously considered. At present the carriers' window and the general delivery window are kept open from 9:30 a. m. until 10:30 and this service has given both farmers and townspeople an opportunity to get their mail on Sunday. The arrangement has been especially convenient to the farming people who in the busy seasons can hardly spare the time during the week to come to the city. Postmaster Brown is perfectly willing to continue the present service and thinks the remonstrance will have the effect of securing its permanency.

Strongly condemning any movement towards the invoking of the referendum on the bills passed by the last legislature appropriating funds for the maintenance of the University of Oregon and the Oregon Agricultural college, the association last night adopted a resolution introduced by T. C. Taylor, having for its purpose the discouragement of the attempt being made to refer these measures to the people. The association took the attitude that such an attempt if successful would mark Oregon as a state that does not stand for higher education which would have a great deterring influence on prospective settlers.

It was also decided that hereafter no firm memberships will be allowed, each partner in a firm being required to belong to the association as an individual. However, it was decided to allow all present members to remain in without the payment of initiation fees. Twenty-four new members were added to the association last evening by the votes of the members.

**Invite New Secretary Here.**  
The association voted to join with the Portland and Hermiston Commercial clubs in extending an invitation to Walter L. Fisher, the new secretary of the Interior, to pay Oregon a visit and particularly to inspect personally the west side Umatilla project. If such an invitation should be accepted, Pendleton would have the honor of entertaining Ballinger's successor in office for a short time.

**To Go After Colonists.**  
Another action taken by the association and which may have a very beneficial effect upon Pendleton and vicinity, was the decision to join with Hermiston or any other city in any reasonable proposition to secure more colonists for Umatilla county. The method suggested by the project town is the sending of a competent booster as far east as Pocatello to distribute literature on the trains coming west. The matter was referred to the committee on advertising and publicity for final settlement.

**Judge Lindsey Recognized.**  
The Commercial association took official recognition of Judge Ben Lindsey, the eminent Coloradoan who will speak in the city tonight. A committee consisting of W. L. Thompson, J. P. Winter and A. J. McAllister was appointed by President Smythe to assist the committee on entertainment in welcoming him to the city and extending other hospitable courtesies to him. Mr. McAllister was personally acquainted with the great juvenile judge a number of years ago.

**Other Business.**  
Among the other small matters attended to by the club last night was the instructing of the house committee to put the billiard and pool tables in repair and to renew present magazines and subscribe for any others which members desire.
