Sick headache results from a disordered condition of the stomach, and can be cured by the use of Chamberlain's Stomach and Liver Tablets. Try it. For sale by all dealers.

Not Opossum Nor Kangaroo.
Chicago.—What is regarded as an important scientific achievement was announced at Field museum yesterday, when Wilfrid H. Osgood, assistant curator of zoology, arrived in Chicago, after a four months' trip to South America. Mr. Osgood succeeded in capturing 10 specimens of an order of mammalia marsupial, other members of whose family are extinct. "It is a small mammal, of course," Professor Osgood explained. "It looks something like an opossum, except that it is smaller and its fur is brown. The tail is rat-like, but square, instead of round. The pouch is rudimentary, not large enough to carry the young as the kangaroo does. The bones of extinct members of the same family have been found in Patagonia, but there are no other living members of the family."

HE'S NOT AFRAID OF BEES.

Texas Man Allows Them to Swarm Over Him.
San Antonio, Tex.—Charles Potcheneck, employed by the Maverick aparies near this city, appears to have unusual control over bees. He handles them with as much apparent ease as one would in playing with kittens or a harmless pet. He is used to their ways and appears absolutely oblivious to the fact that they can sting.
While working with them he goes bare-armed and bare-faced and pays no attention to the insects as they crawl over his exposed hands and arms or pile up in great clumps on his face.
Recently he had a picture taken holding a small limb in his teeth on which a swarm had settled. The bees formed a kind of long board hanging below his waist and his entire face was covered with those that crawled from the limb. Old beekeepers say that his feat in handling bees are the most remarkable in the world. He claims that he has not been stung in two years.

ADAMS HAPPENINGS TOLD IN PARAGRAPHS

(Special Correspondence.)

Adams Ore., May 13.—J. T. Llewellyn made a business trip to Walla Walla Monday.
Mrs. E. G. Marquis was a Pendleton visitor Monday.
Mrs. E. C. Bowling was the guest of Mrs. Dr. McFall of Pendleton Monday.
T. C. Ried of the Commercial hotel of Adams was a business visitor in the city of Pendleton Tuesday.
Bert Kirby of the Inland Mercantile company, was a business visitor in the city of Pendleton Wednesday.
Mr. and Mrs. E. A. Meritt left Monday for Athena where they will make their future home.
Mrs. J. Geiss and daughter, Winifred, were Pendleton visitors Wednesday.
Mrs. J. Winn was a Pendleton visitor Wednesday.
E. G. Marquis, city druggist at Adams, was a business visitor at the county seat Wednesday.
Dr. McKenny of Helix, was an Adams visitor Wednesday and Thursday.
Fred Collins, one of Helix business men and a former resident of Adams, was a visitor in Adams Thursday.
Mrs. John Gless and daughter Winifred left Thursday for Milton to visit friends and relatives for a few days.
Miss Eva McBane and Mrs. Pamern returned to their homes in Adams Tuesday after visiting for a few days in Pendleton.
Some four weeks ago Mrs. Mary Picard set their incubator with 39 duck eggs and today there was 99 of the 99 hatched and no cripples, all healthy little ducks.
Mr. and Mrs. G. Morrison and Mr. and Mrs. B. A. Marquis went to Athena Thursday.
Miss Susie Dupuis of Pendleton, is an Adams visitor for a few days this week.
Memorial services will be held in the Baptist church Sunday morning for mothers, by the Rev. Mr. Stockton. All mothers are invited to come and wear a white flower and write to some mother in a distant city on that day.
G. M. Lewis made a business trip to the city of Pendleton Thursday.

START TO SEA IN BASKET.

Balloons Fall Into Delaware Bay—Head for Ocean.
Philadelphia.—Blown over the waters of Delaware bay and heading rapidly for the Atlantic ocean, two men and a woman, passengers in the basket of the balloon Philadelphia, were rescued today by a tug and towed up the Delaware river. The occupants of the basket were: Thomas E. Eldredge, president of the Philadelphia Aeronautical Recreation society; John H. Niggle, president of a chemical company, and Mrs. Adel Turner Kurtz, all of this city. The balloon, still 150 feet in the air, was towed to Delaware City, where a landing was made. The passengers nearly drowned when the basket sank in the bay.

TO SHORTEN TIME ACROSS BIG POND

New York.—Sir Edward Morris, premier of Newfoundland, who is in New York on his way to the coronation, is taking advantage of his brief stay here today to discuss with a syndicate of capitalists, the proposed construction of a railroad from Quebec to a point on Cape Sir Charles on the coast of Labrador.
The railway, according to the premier's plans, will connect at its Labrador terminal with a proposed new line of steamboats of the Lusitania type, running between Sir Charles and Liverpool, making possible a three days' trip across the Atlantic.
"I see no reason in the world," declared the premier, at his hotel here, "why such a route should not be successful and I believe the proposal will meet with the favor of both the Quebec and Newfoundland governments. The route would be open all the year round."
"From Cape Sir Charles to Quebec is about 1000 miles and with a line of standard gauge, this could be covered at 60 miles an hour, which means that passengers could be landed in lower Canada and in the center of the United States 24 hours earlier than by the biggest liners to New York today. The ocean passage would be 1000 miles shorter."

A Philadelphia firm is equipping the new college of engineering at Port Arthur, Manitoba, with standard electrical measuring instruments.

INTERESTING NOTES FROM UMATILLA

(Special Correspondence.)

Umatilla Ore., May 13.—Mr. and Mrs. J. W. McVey, who had been on a visit to New York have returned.
John Lennox and R. Lingo have gone to Portland on a business trip.
D. C. Brownell is in Spokane this week.
J. H. Chung has returned from a business trip to Walla Walla and will remain a few days.
Mrs. I. N. Haines and family arrived a few days ago from Shawnee, Okla., to join her husband who has a responsible position at the O.-W. R. & N. round house.
The city council had a very busy session on Monday night and passed many new ordinances; also passed on the grading and also of new sidewalks of several streets.
H. C. Means has made some decided improvements to the extension of the Cottage hotel which adds greatly to the appearance of the building.
Jones-Scott of Walla Walla, have acquired a large tract of land beyond the city adjoining the present sand and gravel pits of the O.-W. R. & N. The consideration paid is said to be large yet could not be ascertained. Jones-Scott will establish a permanent office in Umatilla and a larger force of men will be used on their work here this season than in former years.
In an interview with a prominent O.-W. R. & N. official your correspondent is assured that the much talked of Coyote cutoff is farther away than ever. The developments in the west end of Umatilla county have a great deal to do with the postponement of the work by the Harriman people and as it won't be many years before the all-water grade from Huntington to Portland will be used for all trans-continental trains, the cutoff may "never" be built.
Old Umatilla is coming to her own after many years. "The gateway of all eastern Oregon" affords transit of freight over the Columbia river route to Portland. This week two heavily laden boats of the Open River Transportation company had shipments for the eastern parts of Oregon and Washington and on their return they were laden with wool to be shipped direct to the New York market.
A representative of a wealthy land company of Spokane spent the greater part of the week here and was highly pleased with the work on the Hermiston and this project. He, however, that the large town of the west end could not help being Umatilla as the location on the Columbia and her fine railway facilities were an asset no other town could have in eastern Oregon. "Ye old timers" take heed—develop, improve, and don't let the "new blood" do all that work.
G. M. Boer and wife of Portland are here the past few days looking after their property interests in this locality.
W. O. Hendricks, T. Duncan Portland, F. W. Troxbridge, Spokane are here today.
Dr. B. Monkman paid a professional visit here today.
J. M. Hindman, wife child of the W. L. and O.-W. R. & N. companies, has gone on a short vacation to Hot Lake. M. L. Connell, the Huntington former chief here, is relieving him and is accompanied by Mrs. Connell and little son. They have a host of friends here who are glad to see them.
Mrs. Dodge of Kennewick, has taken a position at the Cottage hotel as housekeeper.
Mrs. Bullard and son have returned from a visit to Walla Walla.
Mrs. Galloway of Pendleton, has opened a dressmaking and cleaning parlors in the Switzer building.
Sam Kee has leased the building on Main street recently acquired by John Switzer and is having it fitted up for a restaurant.
Mrs. H. M. Dryer has gone on a visit to Walla Walla.
Miss S. Pound has gone on a visit to her brother in Wallawa.
The Social club held a very enjoyable dance Friday evening.

CONCERNING RAG SIGNS

What Lewis Has to Say About Plastering Stores With Cloth Signs.
The store is decorated with signs to attract transients as the city and country people can all be reached through the newspapers. The city man gets his newspaper every day, and nearly every rancher in and around Pendleton takes the daily papers. Now, if it were not for the transients, printers' ink would be the only class of advertising I would use, but I am after the man who just landed in town just as much as the local people. I am selling goods cheap and I want the traveler who just arrived to know it, therefore I resort to rag signs on the front of the building.
Should the city object to their own merchants trying to secure a little foreign money
Does any other city in the United States object to the merchant using cloth signs to attract the man who probably just got off of the last train and will go out on the next. Now some other city may have such an ordinance but I never visited that city and have conducted sales all over the United States and Canada for the past fifteen years.
Since the forced cash raising sale opened we have probably sold over a thousand dollars worth of merchandise to out of town people. Do these people read the local papers? Well, some of them may but they probably feel just like you do when it comes to your out of town papers. You know that if you were in Walla Walla you would go to the news stand and try and secure a Pendleton paper and if you could not get it you would probably go away without any.
You know every man gets wrapped up in his home paper and takes it as he would his daily meals. I mean he must have it and read it clear through every day or he don't feel just right.
Now I wish to repeat that I don't need cloth signs to run a sale if you will fence in your town and the surrounding country. Printers' ink will answer the purpose, but as long as so many transients visit this city cloth signs will be a necessity.
I am not trying to show you how to run your town, but was asked the reason for telling you the use of them.
Merchants, I hope you do a good business during the Roundup this fall. You know rag signs will help some there.
Friendly yours,
C. G. LEWIS.

DOOLY & CO., General Agents.

Help for All

Andrew Carnegie once suggested as an epitaph for his own tombstone what he said was the secret of his success: "Here lies a man who surrounded himself with men abler than himself."

Many able people are working for you, scientists, inventors, manufacturers, all trying to make something you want. Do you use their brains and their efforts—surround yourself with them—or do you plod along by yourself, years behind the times?

Take your own home. Have your share of modern improvements there—money-saving, labor-saving, health-promoting? One of the most important of these is a New Perfection Oil Cook-stove. A New Perfection stove never overheats a kitchen. It saves your strength. It saves fuel and time. With the New Perfection oven with the glass doors you can go on with your ironing or any other work, and still be sure at a glance the joint is roasting properly.

Made with 1, 2 and 3 burners, with long, turquoise blue enameled chimneys. Handily finished throughout. The 2 and 3 burner stoves can be had with or without a cabinet top, which is fitted with drop shelves, lower racks, etc.

Dealers everywhere; or write for descriptive circular to the nearest agency of the
Standard Oil Company
(Incorporated)
