### An Ideal Power Plant.

Installed recently at the Bentley Ranch, McCormack, Ore., is a light and power plant which is considered to be the most modern and best equipped of its kind in Oregon.

The power is furnished by a 10 H. P. gasoline engine which operates a 250 volt and 42 volt generator. The larger generator runs a 3 H. P. motor which operates a pump that supplies the various buildings with water. The pump is located a mile from the ranch and is so connected that it can be operated from the house and no time is lost in going back and forth as is usually the case with the average plant.

The 42 volt generator is used for charging the storage batteries which furnishes the light for the various buildings. On top of the barn are two 40-watt tungsten lamps which throw quite a light and can be seen for miles around the country.

The plant was installed by Mr. H. J. Keogh of Pendleton, and the motors, generators, lights, etc., were furnished by the J. L. Vaughan Electrical company of this city.

### Water Users Meet.

A number of Pendleton attorneys went to Pilot Rock this morning to attend the meeting of the water users in that section for the purpose of discussing the suits which have been brought by the government against them.

### TROUBLE ENDS AMONG REBELS

(Continued from page one.)

lutionary spirit, and that the insurgents in the field were rapidly increasing in number.

To Attack Chihuahua. Chihuahua, Mexico, May 13.—Via El Paso, Texas, May 15.—This city now is in fear of immediate attack and many citizens feel that resistance is hopeless.

The 2,000 insurgents approaching from the south today reached Escalon, a few miles below Jiminez. As they proceed, the insurgents are tearing up the railroad to prevent any pursuit by federal troops in their rear. The federal troops south of here all are retreating to this city, having found it impossible to stem the onward march of the insurgents.

An armed train filled with federal troops which went south to open the railroad returned with the report that the enemy were in overwhelming numbers and to attack them from the train would have meant annihilation.

It is believed that the insurgents will take Jiminez, capture the branch railroad running to Parral and then will camp around Chihuahua to attack the city in conjunction with part of Madero's forces to be sent from Juarez.

A high stone wall enclosing 30 acres of land around a Philadelphia saw plant is built entirely of grindstones worn out in the place.
