

New Rays of Light

One of the most wonderful electrical appliances is the X-ray which may be used both in the treatment of various diseases and in the diagnosis of many obscure conditions. With its aid the interior of the human body is no longer the sealed book it has been heretofore. Abnormal states of the bones, gall stones, stone in the bladder or in the kidneys, are shown plainly by what are known as X-ray photographs. Internal tumors, and the enlargement of the deep-seated organs, are also discovered by this means and in the diagnosis of tuberculosis of the lungs this agent has proven a most valuable aid. When applied to some of the less fatal chronic ailments of germ origin it has proven very effective as a curative agent.

Another interesting proceeding is the violet-ray treatment produced by concentrating the violet or chemical rays from an arc light with a specially prepared carbon upon any portion of the body that may be the seat of pain. Sufferers from neuralgia, sciatica, rheumatism, strains, sprains, also from those obscure exhausting pains (the origin of which cannot at times be accurately determined) frequently find immediate relief from a single treatment and usually with a little persistence in the use of this curative health or perfect recovery is obtained.

The incandescence light bath, consisting of a cabinet in which the patient is bathed in the combined rays of many electric light globes, has produced really wonderful results in diabetes, sciatica, rheumatism, obesity, anemia, and some forms of kidney and heart trouble. It has also proven valuable in chronic bronchitis, bronchial asthma and various skin diseases. As a general hygienic measure its efficiency can scarcely be over-estimated.

Those who have been patients at Dr. Pierce's Invalids' Hotel, in Buffalo, N. Y., highly commend this wonderfully equipped Sanitarium, where the above mentioned electric machines, high-frequency current, and other most modern and up-to-date apparatus are used for the cure of chronic diseases. The treatment of the chronic diseases that are peculiar to women have for many years been a large factor in the cures effected at the Invalids' Hotel and Surgical Institute.

In erecting the Invalids' Hotel, Dr. R. V. Pierce's idea was to make it a genuine home, not a hospital. Such cases as rupture, hydrocele and varicocele are usually cured in ten days, and the patient is able to return home. The terms are moderate and the rates at the Invalids' Hotel comparatively low. In the examination and treatment of patients the practice is divided into specialties. Each member of the Faculty, although educated to practice in all departments of medicine and surgery, is here assigned to a special department only, to which he devotes his entire time, study and attention. Not only is superior skill thus attained, but also rapidity and accuracy in the diagnosis of disease.

Specialists connected with this Institute at Buffalo, are enabled to accurately determine the nature of many chronic diseases without seeing and personally examining their patients. This method of treating patients at a distance, by mail, has been so successful that there is scarcely a city or a village in the United States that is not represented by one or more cases upon the records of practice at the Invalids' Hotel and Surgical Institute. Such rare cases as cannot be treated in this way, which require surgical operations or careful after-treatment, or electrical therapeutics, receive the services of the most skillful specialists at the Institute.

In medicine there has been rapid progress during recent years. Dr. Pierce has kept up with the times by continually improving his laboratory by skilled chemists and exercising care that the ingredients entering into his well-known medicines Dr. Pierce's Favorite Prescription as well as the "Golden Medical Discovery" are extracted from the best variety of native medicinal roots. These are gathered with great care and at the proper season of the year, so that their medicinal properties may be most reliable.

These extracts are then made soluble in pure triple refined glycerine and bottled in a hygienic and scientific manner. Thus the World's Dispensary as established by Dr. Pierce is supplied with every known apparatus and means of cure, for its aim is to avoid surgical operations whenever possible.

Great care is exercised not to over-encourage those who consult the specialists of this institution that no false hopes may be raised. Many thousands are annually treated both through correspondence and at this Institute. Every one consulting by letter or in person receives the most careful and considerate attention. All communications are treated as strictly confidential. No charge whatever is made for consultation.

Write the Invalids' Hotel and Surgical Institute, Dr. R. V. Pierce, President, at Buffalo, N. Y.

Starting from Fulton, Mo., with Cincinnati as the terminus, a pigeon race for young birds will begin tomorrow under the auspices of the Ohio Valley Flying club. A 400-mile race for old birds will also start tomorrow from Sheldon, Ia., to Milwaukee.

BILLY PAPKE WINS FROM JIM SULLIVAN

London, June 9.—Billy Papke, the American middleweight, last night took the measure of Jim Sullivan, the middleweight champion of England, in nine rounds of fast fighting. Again it was the fighter against the boxer, and the fighter won with ease.

The contest was for the middleweight championship of the world, a purse of \$10,000 and a side bet. It was held in the Palladium, one of London's noted music halls, before a large crowd.

Throughout the fight was a grueling one. Sullivan proved the cleverer at long range work but Papke excelled at infighting. There was much clinching and hitting in the clinches, and the referee, Eugene Corri, had difficulty at times in separating the men. He warned Papke twice.

Notwithstanding that the fight had been advertised as "America against England," Papke ruled a strong favorite, at odds of 3 to 2 and 2 to 1. Sullivan showed nervousness when he climbed into the ring, but after a few rounds seemed to recover confidence. For a time he was able to stand off Papke who roughed it from the beginning, cleverly dodging slashing swings of the American, which had they landed, would have ended the fight.

Sullivan used his left and right with good judgment but without affecting the stamina of Papke, who was able to take unlimited punishment.

When the call for the ninth round sounded Sullivan was unable to stand up and Corri awarded the fight to the American amid great applause.

ROSEBURG MAN GETS FIRST LICENSE

Prof. Potter of O. A. C. Begins Issuance Under New State Station Law.

Oregon Agricultural College, Corvallis, Ore., June 9.—Today the first station license, under the new state station law, was issued by Prof. E. L. Potter of O. A. C., secretary of the station board, to Frank E. Alley of Roseburg. Mr. Alley has been especially anxious to have the honor of receiving the first license issued by the station registration board, and to this end he put in his application immediately after the law was passed, before the board had formally organized. He has, in fact, the first four licenses issued, one for his standard bred trotting horse "Bonaday," and for three others. The work of issuing the licenses will now be pushed rapidly, as some 600 applications have been received and filed, and the office is prepared to handle the immense correspondence incident to the licensing of the Oregon stallions.
