

# S.S.S. CURES BLOOD POISON

Contagious Blood Poison manifests itself in the most loathsome symptoms, such as ulcerated mouth and throat, copper-colored spots, and even sores and ulcers on different portions of the body. The poison causes the hair to fall out, and sometimes the glandular system is attacked. No medicine can cure Contagious Blood Poison which does not rid the circulation of every particle of the insidious virus. The least taint left in the blood will break out afresh when treatment is left off. S.S.S. is the real and certain cure for Contagious Blood Poison; it goes into the circulation, and by removing every particle of the poison, and adding, rich, healthy qualities to the blood, forever cures this powerful disorder. All who suffer with this disease may cure themselves in the privacy of their homes by using S.S.S. and following instructions contained in our Home Treatment Book, which we will send, together with any medical advice desired, free of charge. S.S.S. is for sale at drug stores.

### PRELIMINARY WORK STARTED ON DREADNAUGHT

Workmen in Brooklyn Navy Yard Prepare to Begin Construction on Largest Battleship in the World.  
New York.—Preliminary work on the Dreadnaught New York which will be the largest and most powerful battleship the world has ever seen, is already under way at the Brooklyn navy yard.

The cradle in which the huge frame will rest has been prepared, the traveling cranes are in position and workmen are busy placing in position the plates that are to form the outer bottom of the 28,000 ton battleship.

The keel will be laid with simple ceremonies early next month, and a year later some favorite young woman to be designated by Governor Dix, will smash a bottle of wine on her bows and christen her.  
Early in the fall of 1913 the New York will take her place as the flagship of the Atlantic fleet.

### HAS TOOTHACHE; SUES RAILROAD FOR DAMAGES

Man With Pevvish Molar, Put Off Train and Walks 24 Miles to Dentist.

Spokane, Wash.—Jurors in the Spokane county superior court, to be convened the first week in September, will be called upon to decide what is a reasonable pain when a passenger, suffering from toothache, is ejected from a train and forced to walk 24 miles to enlist the services of a dentist.

John H. Larson, who is the central figure in this hard luck story, wants \$20,000 from the Great Northern railway company for what is described in his complaint as "humiliation, shame, disgrace and physical pain." Counsel for the company has asked for details.

Stripped of its legal verbiage, the complaint sets forth that Larson boarded a Spokane-bound train in Lincoln county on June 29, 1911. He was told by the ticket agent to pay the conductor, as there was not sufficient time to sell a ticket. On the train Larson tendered a \$20 gold coin but Conductor Stedman refused to accept it in payment of fare, saying the coin was spurious.

Larson had \$3.15 in silver, but that amount was not sufficient to pay his fare to Spokane, so the train was stopped and the passenger ejected. He sought the agent in the station at Waukon, pronounced "walk on," and was told the next train would be along in 14 hours, so he decided to follow the "tip" on the sign.

Meanwhile, the pain of the aching tooth became more aggravated and when Larson reached Spokane, following the long hike on the grade, his jaw was swollen so his friends failed to recognize him, and this continued until the offending molar was extracted.

Moreover, Larson found the gold coin was one of Uncle Sam's own make and he readily obtained \$20 when he tendered it at a local bank. This and a few other things prompted him to enter the action against the corporation, which will contest the suit.

### SIXTH SENSE IS DISCOVERED

So Says Founder of New Cult in New York.

New York.—"One moment, please." The interview is delayed. Mme. Adèle Marie Rique, founder of the Circle of Universal Soul Freedom and president of the University for Soul Cultivation, Mental and Material Elevation, pauses and listens.

"My friends are talking about it in Germany," said she. "I must know what they are saying. I have discovered and am cultivating the sixth sense. It is located in the base of the brain. Through it I can hear all the voices in the world. Only yesterday at luncheon I said to a friend, 'Wait! I am being discussed by some women I know, friends of mine. They are about to bring something to me and are wondering if I shall choose purple or yellow.' They decided in favor of purple, as that was more my shade. Within an hour the friend came and offered me a beautiful purple pany. It was all true, and soon the whole world will know how to eliminate space.

"I have discovered the location of the soul as well," she remained. "It is here, in the upper part of the lungs, and its spiritual nerves connect with the dome of the temple. The body is the temple and the dome or top of the forehead is the workshop of the soul."

Mme. Rique wore a Grecian robe, cut square at the neck, giving the soul an open field for expression. She explained that if anything bound the throat the spiritual nerves were handicapped in sending currents to the brain, or dome, and the whole scheme of cultivation and elevation was materially hurt thereby.

Thus it becomes apparent that a man's collars may make him grouchy.

### Attack Like Tigers.

In fighting to keep the blood pure the white corpuscles attack disease germs like tigers. But often germs multiply so fast the little fighters are overcome. Then see pimples, boils, eczema, salt-rheum and sores multiply and strength and appetite fail. This condition demands Electric Bitters to regulate stomach, liver and kidneys and to expel poisons from the blood. "They are the best blood purifier," writes C. T. Budahn, of Tracy, Calif., "I have ever found." They make rich, red blood, strong nerves and build up your health. Try them. 50c at Koepfens.

### EIGHTY-BUSHEL WHEAT FOUND

Government Completes Threshing 400 Varieties of Grain.  
Chico, Cal.—The threshing of 400 varieties of grain has just been completed at the government's big plant introduction gardens at this place, says Superintendent Seagles. Some varieties of wheat yielded at the rate of eighty bushels to the acre. This is about twice the average yield of common wheat throughout California's grain growing district. The varieties producing especially heavy ears are Priests and Chut wheats. H. F. Blanchard is the expert in charge of experiments in this department.

The propagation and budding of deciduous fruits are now being followed. Corn breeding is also under way. The distribution of plants is on. The pistachio nut, which is largely used by confectioners, is being shipped to Newman, Fresno and other plants.

A water system was lately installed on the grounds and electric power
