TRAINED DOG AIDS THIEVES.

It Takes All the Risk While Masters Elude Detection. Glenolden, Pa.—The mystery of the long-continued thefts of chickens redoubled since the town council offered a reward of \$50 for arrest, is solved. The deprecator is a trained dog in the hands of the thieves, so well educated that all they have to do is to single out a place to be looted, remain in the background and let the dog take all the risk, and get the fowls. The discovery was made a few evenings ago, when neighbors saw the big dog break into the coop of Charles B. Savage, in Logan avenue. The animal displayed great intelligence, taking one of the top boards in its mouth and raised it up. As soon as Savage went outside the dog was suddenly called off by a low whistle and disappeared. At a meeting of Glenolden residents plans were made for coping with the thieves, and a vigorous campaign will be waged. Suspicion is directed toward four persons, and it is believed that with the combined efforts of the Glenolden Poultry Protective association, council and indignant citizens, the wave of chicken theft will be stopped.
