NEWS NOTES FROM ADAMS AND VICINITY

(Special Correspondence.) Adams, Ore., Nov. 8.—F. M. Whitely was a Pendleton business visitor Saturday and Sunday.

Miss C. Blake spent the week end in Pendleton.

Mr. and Mrs. G. M. Morrison were Pendleton visitors Sunday.

Pete Murray was a visitor in Athena Monday.

Mrs. E. G. Marquis was a Pendleton visitor Tuesday.

Mr. and Mrs. T. A. Lluellen have moved to Weston for the winter so their son, Otis, could attend the Weston school.

F. Blake came to Adams this week from Pendleton to spend a few days at home.

John Gless was a Pendleton visitor Saturday.

Mrs. John Winn visited in Pendleton Saturday.

Mr. Simonson and daughter Cella, were Pendleton visitors Saturday.

Mr. and Mrs. M. A. Baker went to Pendleton Monday to do some shopping.

Miss Lola Rogers of Walla Walla came to Adams Tuesday night to spend Sunday at home.

Frank Wallan was a Pendleton visitor Saturday.

Mrs. M. P. Card returned to her home in Adams Sunday after visiting in Portland.

ROUGH HANDLERS IN OXFORD.

Rich Scholars Have Their Places in University Taken by Work Folks.

London, Eng.—While the undergraduate young gentlemen of Oxford have been enjoying the "vac" and forgetting their lectures, their places have been taken by men and women whose hands bear the marks of toil in the workshops of English life.

A chimney sweep, a navy, many weavers, bootmakers, soap packers, engine drivers, bootmakers, soap makers, engine drivers, signalmen, grocers' assistants, tailors' cutters and laborers have during the last weeks plunged with zest into the realm of knowledge as it is contained in the halls and colleges of Oxford.

Ten workmen specially favored have actually been living in the college rooms of Balliol and, with their comrades have dined in the famous hall. These students belong to classes in connection with the Workers' Educational association, which conducts tutorial classes covering a three years' course during the winter months in various industrial centers.

One of the great advantages offered to the workmen and women was the assistance of a tutor, who gave at least three hours' personal coaching to each student every week.

Social and economic history attracts the students most, and as each lecture is followed by a discussion there are ample opportunities for plain speaking and direct questioning. It is not too much to say that by this means the workmen students give often almost as much knowledge to the professors as they take away from them.

Undoubtedly most of the students come with strong and preconceived ideas of socialism and they do not attend these classes at Oxford merely for the sake of "culture" and the atmosphere of religious peace. They want to know the principles which underlie the theories of social philosophy. They want to find out the science of life as it is taught by men of learning in the upper classes. And they never take anything for granted, but put it to the test of their own experience.

Among them are men of remarkable strength of mind and character, and it is a tribute to them that after they leave Oxford they go back to chimney cleaning, bootmaking, weaving or whatever their trade may be, not discontented and restless, but ready to do their job honestly and eager in spare time to pursue their studies.

"H" NOW HAS FEDERAL O. K.

Pittsburg Adds to Name by Action of the Government.

Washington.—National recognition of the repudiation of simplified spelling by the home town of Andrew Carnegie, one of its erstwhile foremost advocates, has been given.

The United States board on geographic names has given its sanction to the use of the "h" sometimes left off the geographic title of the "Smoky City" by economists of space. Evil disposed persons, so Pittsburg believes, started the smothering of spelling a few years ago. Pittsburg let it run its course and then passed an act of the legislature putting the "h" on again.

Senator Oliver put the act in his pocket and came to Washington to get the customary O. K. of the government. Now that's been done.

INDIANS WILL SECURE VALUABLE HOMESTEADS

Spokane, Wash.—Poor Lo is coming into his own. He and his fellows and their squaws and offspring will be rich in their own name instead of living off the bounty of Uncle Sam.

Chas. Hunt, United States allotment agent, now in Spokane, reports that of the 200,000 acres of desirable agricultural and grazing lands to be allotted on the Colville Indian reservation north of here, practically every

State of Ohio, City of Toledo, Lucas County—

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 9th day of December, A. D. 1886.

A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for test coupons free.

F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists.

Take Hall's Family Pills for constipation.

LAKE REPLACES MINING TOWN

ROOSEVELT UNDER MANY FEET OF FLOOD WATER

Was Once Hopeful Mining Camp, But Landslide Dooms It and Large Body of Water Forms Over All But Three Houses of Place.

Spokane, Wash., Nov. 8.—Roosevelt, the principal town in the Thunder mountain district in central Idaho in 1902, today is covered by a lake 600 yards in length and 200 yards in width and of an average depth of 25 feet. It was the scene of a gold strike nine years ago and thousands braved the hardships and hazards of the trail. It proved a disappointment, though much pay ore was developed nearby.

The circumstances which wiped the town of Roosevelt from the map was peculiar. It resulted from a landslide two years ago, starting near the source of Mule creek, a mile and a half from the settlement. The great avalanche of earth and stone ploughed its way through a virgin forest with a roar that was heard for miles. Twenty-six hours after the break occurred the mass stopped abruptly across the lower part of the town, forming a dam for Monument creek, which has now formed a lake where the townsite stood.

GRANDMOTHERS USED SAGE TEA

It is easier to preserve the color of the hair than to restore it, although it is possible to do both. Our grandmothers understood the secret. They made a "sage tea" and their dark, glossy hair long after middle life was due to this fact. Our mothers have gray hairs before they are fifty, but they are beginning to appreciate the wisdom of our grandmothers in using "sage tea" for their hair and are fast following suit.

The present generation has the advantage of the past in that it can get a ready to use preparation called Wyeth's Sage and Sulphur Hair Remedy. As a scalp tonic and color restorer this preparation is vastly superior to the ordinary "sage tea" made by our grandmothers.

This remedy is sold under guarantee that the money will be refunded if it fails to do exactly as represented.

If your hair is losing color or coming out, start using Wyeth's Sage and Sulphur today and see what a change it will make in a few days' time.

This preparation is offered to the public at fifty cents a bottle and is recommended and sold by special agent, Pendleton Drug Co.

There were few residents in the town at the time of the slide and all escaped with their possessions, owing to the slowness of the avalanche. A log school house and two cabins out of its patch, now stand as silent sentinels to mark the vanished town. The buildings are situated above the water line and as the lake has risen to a point that it has an outlet, it is not likely the water will become deeper. Roosevelt camp today is deserted, the residents having moved to other holdings. The mines are closed and the prospectors and miners have sought newer and more promising fields in the tributary country, which is rich in mineral resources. It is hardly probable that the camp ever will be resurrected, as it is isolated and off the line of transportation, besides which it would take a fortune to drain the water off to make it fit for habitation.

MORE THAN SKIN DEEP.

More Than a Skin Salve Is Needed to Cure Piles Permanently.

Don't be disappointed if you fail to get a lasting cure of piles with salves. The cause of piles is more than skin deep. It is sluggish, flabby veins—pockets filled with thick, bad blood.

HEM-ROID, a tablet tonic remedy, is taken inwardly, acts on the circulation and cures all kinds of piles thoroughly.

\$1 for 24 days' supply at Pendleton Drug Co. and all druggists. Dr. Leonard Co. Station B, Buffalo, N. Y., mail a free booklet.

TO PLANT 20,000 BUSHES OF WHITE PINE SEED

Spokane, Wash.—Seeds from 20,000 bushels of white pine cones, recently gathered on the Kaniksu national forest reserve, in northern Idaho, will be planted on the Coeur d'Alene, St. Joe, Lolo and Cabinet forests next spring in districts swept by fire in the summer of 1910. A seed extracting machine is being installed by the government at the Falls ranger station and it is expected to secure 14,000 pounds of seed at a cost of \$1 pound. Henry H. Farquhar, chief of planting of the United States forest service, who is in Spokane, reports that the cones were collected entirely from squirrel caches. Operations were spread over a territory 2 miles in length and five miles in width 100 men being located in four camps, each with two cooks and a camp foreman. The men were paid by the day with a bonus if they averaged a certain number of sacks each day. Several collected more than ten two bushel sacks a day during the 30 days they were at work.

STAY AT HOME CLUB FORMED IN SPOKANE

Spokane, Wash.—Strengthening the family ties and weakening divorce temptations is the primary purpose of a nation-wide movement launched in Spokane by the formation of a Stay at Home club for married men. The national organization is to be known as the Stay at Home League of Am-

erica. E. Potter Hall, formerly an English clergyman, now a member of the editorial staff of the Spokesman-review, who originated the idea, says the only obligation of the members will be to stay at home with their families at least three nights a week. George A. Forbes, secretary of the Young Men's Christian association of Spokane, declared in an interview that no more important work can be undertaken at this time, when engagements and amusements taking men from their homes are so varied and attractive, than by every means strengthening the home ties. Home-loving and home-keeping men are not those who become candidates for divorce, Mr. Forbes said, adding: "I think a league on these lines will do good and help to bring back those sanctities of the American home which obtained in the earlier and simpler times of the nation."

ONE R. R. MAN OUT OF EVERY 458 KILLED

Washington.—It's 1 to 458 that a railroad man will be killed on his job and 1 to 13 that he will be injured. The Interstate Commerce Commission report of American railroad accidents in the twelve months ended on June 30 shows that ratio.

In that period, 19,356 persons were killed and 159,159 were injured. However, only 286 passengers were killed. More than one-half of the total number killed were trespassing or stealing rides on the trains.

The Soothing Spray of Ely's Liquid Cream Balm, used in an atomizer is an unspokeable relief to sufferers from Catarrh. Some of them describe it as a Godsend, and no wonder. The thick, foul discharge is dislodged and the patient breathes freely, perhaps for the first time in weeks. Liquid Cream Balm contains all the healing, purifying elements of the solid form, and it never fails to satisfy. Sold by all druggists for 75c, including spraying tube, or mailed by Ely Bros., 55 Warren street, New York.

PAUPERS NEED PIANO MOST.

Court's Interesting Ruling Sustains County Commissioners.

Erie, Pa.—Judge Emory A. Walling has decided that a piano is a necessity in a poorhouse. Early last spring the county auditors surcharged the county commissioners for \$265 which they had paid for a piano for the county house. The commissioners appealed pointing out that if a piano is needed in any place it is in a place where there is distress and discontent. Judge Walling sustained this view.

Grl. 5. Kills Sister, Age 3.

Missoula, Mont.—While playing with a .22-caliber rifle which she had found in the house Elizabeth, the five-year-old child of Mr. and Mrs. E. Harmon of Lolo, shot and instantly killed her 3-year-old sister, Ruth. The rifle had been left loaded by one of the men of the household. The tragedy occurred in the yard of the Lolo ranch house.

ery homestead worth he while will go to the Indians, leaving little or nothing for prospective white settlers. The reservation contains about 1,400,000 acres of land, and of this 1,169,000 acres are mountainous, mineral and timber lands and grazing lands 100 rough and stony for practical purposes. The Indians receiving allotments are those who are living on the reservation and the children of the red men who received allotments on the north half of the reserve in 1906. Many of the Wenatchee Indians, who have established tribal rights, also received choice lands. Twenty-five hundred allotments will be made, the average allotment being 120 acres.

BLOOD TRANSFUSION OFFSETS DEADLY POISON

Spokane, Wash.—Possibly without precedent in the annals of medical practice is the direct transfusion of blood to counteract bichloride poisoning performed upon Margaret Scully, a nurse in training at the Sacred heart hospital in Spokane. Her mother, Mrs. J. B. Valentine, 1748 Eleventh avenue, said that the patient is improving rapidly. Miss Scully by mistake used bichloride tablets for a headache, but before the poison began its work she was able to summon a physician. The pump and the usual treatment were applied, but she continued to fall. Blood tests showed only 50 per cent of the normal number of corpuscles and a transfusion of blood was decided upon. The patient's brother, Edward Scully, living at Mansfield, Wash., volunteered and a direct transfusion was made. Dr. R. D. Cashatt, who performed the operation, reports that a quart of fluid was taken from Scully and that this saved his sister's life. Physicians declare the case is entirely new to the medical profession and that it marks an important discovery.

ISHI, LAST OF HIS TRIBE, LOOKS FOR WHITE WIFE

Squaw Will Do If Anglo-Saxon Cannot Be Found, Says Captured Yana.

San Francisco.—Ishi, last of the cave dwellers, is on the lookout for a wife. He has told Professor Kroeber that he prefers a white wife, although an Indian one will do if no white woman can be found.

Owing to the large crowds that have been visiting the Anthropological Museum for the purpose of seeing Ishi and to hear the lectures, it has been found necessary to use the auditorium of the museum for demonstrations.

Yesterday afternoon Ishi gave demonstrations with the bow and arrow. The lectures, which were delivered by Professors Kroeber and Waterman, were illustrated and lasted for about twenty minutes.

Facts About Motherhood

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at the time of child-birth, but many approach an organism untried for the trial of strength, and when the strain is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, women will persist in going blindly to the trial. It isn't as though the experience came upon them unawares. They have ample time in which to prepare, but they, for the most part, trust to chance and pay the penalty.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy, and strong.

Any woman who would like special advice in regard to this matter is cordially invited to write to Mrs. Pinkham at Lynn, Mass. Her letter will be held in strict confidence.

Yesterday afternoon Ishi gave demonstrations with the bow and arrow. The lectures, which were delivered by Professors Kroeber and Waterman, were illustrated and lasted for about twenty minutes.
