### DIFFICULT WARPLAY FOR ATLANTIC FLEET

Search Problem and Secrecy to Be Features Off Guantanamo.

Washington.—Somewhere off the coast of Guantanamo during the next few weeks the entire Atlantic fleet of about 21 battleships, four armored cruisers and about a dozen torpedo-boat destroyers will be engaged in one of the most difficult games of mimic warfare ever devised for American naval commanders. For reasons best known to those in charge of the battle practice, not an inkling of the plans to be worked has been made public.

The search problem will have some part in the war play. The commanding officers of the various vessels have no particular dates for sailing, but will leave their home station at their own discretion.

A number of the battleships and cruisers and smaller craft are now at Hampton Roads, and the third division sailed from Philadelphia Tuesday. When these vessels put to sea they probably will spread out and proceed to the scene of battle singly or in divisions, probably arriving in the vicinity of Guantanamo about January 11.

The new battleships Florida and Utah, which have been making "shaking-down runs" since they were commissioned recently, will join the fleet and engage in maneuvers for the first time.

Coal enough to wpm a good-sized city will be consumed by the fleet in the winter drills. Just 73,500 tons of coal have been purchased for the exercises. Already 21,500 tons of the fuel have reached Guantanamo on the colliers Mars, Vulcan and Hector, which arrived at that port yesterday. The colliers Cyclops, Brutus and Caesar, with a second consignment of about 22,000 tons, will sail for Guantanamo about January 20, and the third consignment of about 30,000 tons will be sent in naval colliers to that port the latter part of February.

### RIDS THE SYSTEM OF SCROFULA

Scrofula is a disease usually manifested in childhood, though some who are victims of the trouble reach manhood or womanhood before there is any manifestation of the trouble; but no matter at what age it shows, the disease germs are in the blood, and until they are removed there cannot be a healthy condition of the body. The ordinary symptoms of Scrofula are swollen glands about the neck, scalp diseases, skin affections, poor physical development, etc. S. S. S. has cured thousands of cases of Scrofula. It is the greatest of all blood purifiers, and by going down into the circulation and removing the germs and poisons, and enriching the blood by the creation of nutritive corpuscles, S. S. S. makes a permanent cure. S. S. S. is a purely vegetable remedy, made entirely of health-giving roots, herbs and barks, and is perfectly safe for persons of any age, or those in delicate conditions of health. No one need fear to give S. S. S. to a child, following directions, and the health it will bring to frail, delicate children will be a blessing to their parents. If you or your child have Scrofula, write for our book on the blood and ask for any medical advice; no charge for either. S. S. S. is for sale at drug stores.

### ALIEN RUSH TO U. S. SHOWS DECREASE

Government Reports Give Fewer Immigrants During Fiscal Year Than in Past Like Periods—Many More Leaving.

Washington.—Statistics gathered by the immigration bureau and bureau of statistics of the department of commerce and labor show that the alien population of the United States is being increased more slowly than before.

During the fiscal year 1911, 878,587 immigrant aliens entered the United States as against 1,041,570 during the fiscal year 1910—a difference of 162,983.

In the addition of the immigrant aliens 151,713 non-immigrants landed. During the year there departed from the country about 500,000, about 300,000 being of the immigrant class and about 200,000 of the non-immigrant class. During the previous year about 380,000 aliens, both immigrants and non-immigrants, left the United States.

The actual increase in the alien population of the United States during 1911 was 512,085, as compared with 317,619 for 1910 and 543,843 in 1909.

The ages of the 878,587 aliens entering in 1911 are of interest. The ages of 714,907 of them ranged between 14 and 44 years, while 117,837 were under 14, and 46,041 over 45. Of these over 14 (182,273 could neither read nor write, and 2930 could read but not write, a total of 185,203. The total amount of money shown to inspection officers by arriving aliens was \$29,411,488.

While trying to teach and illustrate success, the Success Magazine could not succeed itself.

### WOULD HAVE AGRICULTURAL SCHOOL FOR EACH TOWN

Spokane, Wash.—"An agricultural school or an experiment station should be established in the outskirts of every large city in the United States," declares R. J. Maclean, secretary of the Spokane chamber of commerce. He believes this would, in a measure, solve the cost of high living and would direct attention to the production of basic researches. Continuing he said: "I do not agree with the president of the Washington Educational association when he says that more attention should be devoted in the schools to commercial lines. I believe we should first devote our attention to education in agriculture and mining. These are the pursuits from which all wealth emanates and on which all other pursuits are dependent. Increase activity in these lines and you, therefore, must increase activity in commercial and other lines.

"If the schools teach agriculture, agriculture will become more popular. We will then have more farmers, and naturally more production and more valuable resources.

"If I had my way about it there would be an agricultural school or an experiment station in the outskirts of every large city to educate young men in things pertaining to the farm. The difficulty now is that the city man who wants to learn something of agriculture must usually go a long distance away, entailing great expense. In the cities there are thousands of people who merely eke out an existence. How much better they would be if they were on farms.

"The country boy who comes to the city for the first time is very green with respect to city ways. But there is nothing greener than the city boy on a farm for the first time. Our city people do not know enough about farming, and if they knew more we would be able to solve, in a measure, the high living cost."

There's a fine chance now to buy 'em early for next Christmas.

### FLIGHT ACROSS ATLANTIC IS AMBITION OF ATWOOD

Noted Aviator Expects to Gain Ireland From Newfoundland in Thirty Hours.

Lynn, Mass.—Harry N. Atwood will make an attempt next April to cross the ocean in a hydro-aeroplane in thirty hours. An improved type of hydro-aeroplane of his own design is was learned, is to be constructed by the Burgess company at Marblehead, Mass.

Atwood has designed a machine larger than any yet built, to be driven by two engines of not less than 150 horsepower. Atwood declares that with ordinary climatic conditions he will make the trip in thirty hours without difficulty. He will start from the east coast of Newfoundland and land on the west coast of Ireland, a distance of approximately 2,450 miles 600 miles less than that traveled by ocean liners.

He plans to start at 8 o'clock in the evening, accompanied by one mechanic, and fly by compass until morning, when he will pick up the wake of an ocean liner.

### YANKEE SEAMEN SLAY HEADHUNTERS IN WOOD

Seven Terry Duckhunters Vanquish Bolo-Armed Savages in Philippine Jungle.

New York—How seven American sailors fought and worsted a party of head hunters in the heart of a Philippine forest, killing six of them, was told by the crew of the Muncaster Castle, just in from a five months' cruise.

"We were a Cebu, taking on cargo, when seven of us thought it would be fine to spend a Sunday duck shooting," said Chief Officer Charles Bonner. "We got in the jungle about miles when a band of 15 or 20 natives attacked us. We had rifles and shot-
