YOUTH IN FEMALE ATTIRE STARTS LAUGH IN CHURCH

Steamboat Springs, Colo.—Because he could not find a girl who would go to church with him, Harry Love, a high school student, induced his chum, Daniel Gooding, to don female attire and enter the Methodist church last Sunday night while Rev. O. T. Gatley was in the midst of his sermon. The disguise of Gooding was immediately penetrated by the members of the church, who began to laugh so loud and long that the minister was forced to stop his sermon for the time being. The next day Rev. Mr. Gatley asked the city marshal to have Love and Gooding arrested, but that official refused. This ended the matter.

Discovery is Made While Rigging for Detroit Building.
Detroit.—Workmen excavating yesterday for a new "skyscraper" in the heart of the business district at Fort and Griswold streets unearthed, nearly six feet below the street level a portion of the palisades of old Fort Shelby, which occupied that site when Detroit was a frontier village. The section unearthed is about six feet long and formed a half circle.

PAID SALARY TO "DEAD" MAN FOURTEEN YEARS

New York.—After paying a salary for fourteen years to William P. Larkin, the Metropolitan Life Insurance company has just made the interesting discovery that it paid on a policy on his life and recorded him as dead in 1898.

During all the years he had been

thought dead Larkin was working under his own name in the printing department of the insurance company's offices. It never occurred to him, he says, that his life had been insured or that his wife had collected his policies on the supposition that he was dead.

INSECT EATS STEEL RAILS.

Italian Engineers Find Strange Creature in Piedmont.
Rome—Italian engineers have discovered a destructive insect that bores into the steel rails and seems to have the digestion of an ostrich. The railroad line in Piedmont became extremely rusty so quickly recently that the engineers examined the rails microscopically. They found in the steel a dirty gray in color and about one-numberless worm-shaped creatures, a dirty gray in color and about one-third of an inch long. Iron rust was found in the animal's interior, so the engineers concluded that the almost impalpably fine powder it produces by boring into the steel rails is its food.

LIFE DESPAIRED OF; NOW 103.

Man Alive 78 Years After Doctor Pronounced Him Near Death.
West Royalston, Mass.—Seventy-eight years ago Donald Davis, a native of this town, was dropped from the Boston police force on the advice of a physician who said that he had but a year to live and if he wanted to die at home he had better return there at once. Mr. Davis has celebrated his one hundred and third birthday and he maintains that he hardly yet begins to feel old. He backs up the assertion by going almost daily with his gun into the woods and it is seldom that he comes back without game. His wife, whom he married in 1842, still presides over his household at the age of 95.

YANKEE DOES EUROPE ON LESS THAN \$100

Chicago Student Spends Week Visiting Five Countries on This Limited Amount.
London.—How to see Europe for \$100 is a problem that has been solved by William Grant, a Chicago student, who has just left London after visiting five European countries.

"I had six weeks to do it in, and it will take me just to the end of the seventh. It has been a good holiday, and I have learned a lot of geography I had forgotten; but of course, I had to rough it a bit."

Like many other American students he saved his Atlantic fare by sailing on a cattle boat, and this was really the means of making the tour possible. Although the work was hard, Grant admits he enjoyed the trip.

Meeker, Colo.—A report comes from Pyramid that Adam Johnson choked a lobo wolf to death. This species stands as high as a yearling calf, weighing as much, and has always proved more than a match for not only the range cattle and horses, but of any other predatory animal that roams the forest.

The Best Breeds of Jacks!
Before buying it may interest you to know that the best producers are bred and raised right here in Eastern Oregon--it will pay you to investigate.

I have at the Commercial Barn in Pendleton a fine lot of Jacks, acclimated, bred and raised in Eastern Oregon, on the "Eastern Oregon Jack Farm" in Morrow county. These Jacks are of the best breeds and best producers in the United States. Jacks that stand undefeated in the show ring in both Oregon and Washington. They have produced mules that have taken all first and second premiums, with one exception, for the past 13 years. I have been breeding and selling for many years, and can say what no other seller or breeder can truthfully say, that I have never yet sold a Jack that has failed to give satisfaction.

I have with these Jacks the largest yearling mule in the United States. I will pay \$500.00 for his equal regardless of color, that will make a mate. This mule was sired by Black Night, Jr., that heads my herd of Jennets, and is also the sire of all my young Jacks under 5 years of age. All prices are right, and all Jacks guaranteed and registered in the Standard Jack Register of America.
