T. R. Addresses Small Crowd. Milwaukee, March 30.—En route to Chicago, Colonel Roosevelt spoke to a small crowd at the railroad station here.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, announced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & Co., Toledo, Ohio. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

AT THE PICTURE SHOWS

Orpheum. An exceptionally good program for Sunday's change. Four full reels of the best pictures:

1. "Carr's Regeneration." Vitagraph. How an ungovernable temper was brought under control.

Later Mildred's sister marries Dick, his eyesight is restored and he is made happy. Mildred returns home, having found her husband was unworthy.

OREGON THEATRE

some amusement when they meet in a grove and disagree.

At the Grand. Another Orpheum feature act, Bibebe & Connelly, the great western mimical act of culture and refinement. This is the best and only act of its kind that ever visited Pendleton; it combines the features of a vaquero with the refinement of the accomplished musician. Mr. Bibebe in swinging the rope and playing at the same time puts our cowboys in the shadow. Another change for our cowboys to learn a new trick for our next Round-Up. These people are booked for the eastern time and this is the last chance to see them.

Another act a little out of the ordinary run of sketches is Rogers & Kuhnle in "Seminary Girl." This is a little comedy full of original jokes and comedy.

The motion pictures are extra good for this change. Special mention need be made to the Gaumont feature, "The Maid of Argos." This is a hand-painted, clear and steady picture and worth alone the price of admission.

Don't fail to see this show, as it is sure to please everybody.

Entire change next Monday when another feature act will be on the program.

"Laurel" Ranges are Different---and Best

Large ornamental check draft.

Behind this end wall an extension to the length of fire box is provided for extra long wood.

Pouch feed door for coal. Allows equal distribution of fuel full length of fire box.

Combination end draft full length of fire box. Convenient for stirring up fire with poker.

Duplex grate for wood or coal. Easily removed.

Drop feed door, particularly convenient when burning wood.

Oven door steel lined thus preventing the nickel from turning dark from heat.

Laurel covers heat quickly and are strongly braced in spoke-like fashion.

Smooth perfectly level oven bottom. Strongly keep-braced from below.

Warming oven.—Extra large and heavy, richly ornamented with nickel. Lift-up roller door.

Division strip, making two flues. In this case the fire is circulated under the six covers before entering smoke pipe. This is one of the Laurel special and patented features.

The oven top is protected by a heavy cast iron grate which is filled with fire proof cement that protects the steel and will not wear away like sheet asbestos.

Direct draft damper conveniently located in front of range.

All copper reservoir. Does not sweat, rust or corrode and will last for years.

Showing flues under reservoir. Another exclusive Laurel feature (patented). By means of this flue circulation an equal quantity of water will heat almost as quickly in this reservoir as in a teakettle and can be seen until easily kept hot with damper closed by the contact heat with end flues of the range.

When this damper is turned down the full strength of the fire is circulated beneath the entire bottom of reservoir tank.

Oven door balanced by spring. Heavily equipped door and swung from heat; which might weaken it.

Opposite this point the clean out door is located and gives access to both flues under oven as well as back flues of range. Care is taken to make this door air tight on every range.

White aluminum oven shelf and oven door lining.

Bottom of oven flue strongly braced and protected with thick asbestos board.

Division strip under oven, making two flues. Insures an equal distribution of heat under entire oven bottom. Another exclusive Laurel feature.

Air space between oven bottom flue and the floor.

Range body one piece. Highest grade polished steel.
