NEW-ORDER MADE IN SPOKANE CASE

Washington, April 17.—Commenting on the order of the interstate commerce commission yesterday in the Spokane rate case, fixing May 3 as the date for further hearing as to why the rate found to be unreasonable by the commission June 7, 1910, should not be forthwith established, Jos. N. Teal said this morning: "It will be remembered about two years ago the commission made an order establishing reasonable commodity rates from eastern points of origin to Spokane. Thereafter the fourth section was amended and another hearing was had and an order made under it. This was contested in court and is now pending in the supreme court, having been argued once there and being now reassigned for argument October 15. As to when it will be decided is uncertain, but it is evident the commission intends to establish reasonable rates to Spokane without waiting for the supreme court to pass on the fourth section order. That is, it will decide on the question of reasonableness and not on the fourth section and the Reno and Phoenix cases will be dealt with at the same time and rates will probably be fixed on basis of the Salt Lake case. "It has also been stated, of course unsuccessfully, that on this same hearing the railroads purpose suggesting advances in rates to the coast from eastern points of origin. Just what cannot be said but probably on those claimed by roads, not to be subject to water competition.

SCENT TRADE RESTRAINT IN NEW BELL-W. U. CONTRACT

Government Agents Investigating Agents Using Telephone, and Suspect "Rebates." Philadelphia, Pa.—Attorneys and special agents of the department of justice are in Philadelphia investigating the latest move of the Western Union Telegraph company in getting business. They are trying to prove restraint of trade in violation of the Sherman law and the creation of conditions that will eventually lead to a monopoly. It is the plan of the Western Union company to induce subscribers of the Bell Telephone company to become agents of the telegraph company. The Bell company controls the Western Union. Telephone subscribers are asked to become agents under a contract by which they will receive 10 per cent of the present sending cost of every telegram they telegraph to the telegraph office over their phones. The plan is objectionable to the government men, in that large business houses would get what virtually amounts to a rebate on every message they would phone to the Western Union. Thus a 50 cent message would cost only 45 cents, a large item when the volume of a month's business is considered. The opposition telegraph line, the Postal, has no telephone ally to drum up business, and, indeed, it has recently charged that the Bell company was diverting messages intended for the Postal to the Western Union. Don't look for a needle in a haystack of you want to patch up a quarrel. There will be no occasion for the patch by the time you find the needle.

The \$15 Watch for Business and Professional Men

Doctors, lawyers, preachers, merchants, bankers, editors, politicians, candidates for offices and traveling men—take notice.

A dollar alarm is good enough for measuring your sleeping hours but if you want other folks to respect the value of your time you must give them some evidence that it is valuable. Don't measure your real life, your working hours, with a miniature alarm clock fitted in a tin case, with a paper dial.

Own a real watch. You'll find a many sided satisfaction in it. I don't know where you can buy more watch value for \$15.00 than I offer.

Your future watch is an Elgin, guaranteed by the makers and me.
