Woman and Her Varied Interests

Bed Comforters.

The woman who makes her own bed comforts has something superior in workmanship and material at much less cost. Pretty comforts may be made of fine white lawn, even the cheapest being suitable, says the Cleveland Plain Dealer. "Select something with a small flower. The ragged robin design, wild roses or purple clematis make neat covers. The edges can be bound with cotton ribbon or cotton insertion of a Persian or Balkan design. A neat comfort may be made of checked blue and white sateen in large pattern. The blue checks should be knotted with blue.

Cake Batter.

When it is necessary to make several cakes at once save yourself the heating of the butter by putting the required ingredients in their usual order into a small ice cream freezer, says the San Francisco Call. A few minutes of turning the crank results in a fine smooth batter necessary for a successful cake.

Luncheon Favor.

A dainty bonbon box, suitable for a luncheon favor can be made of crepe paper in the form of a rose, or daisy or any flower, which successfully carries out the color idea. A rose is perhaps the easiest flower to make, although almost any flower could be fashioned with a little ingenuity, says the New York Press. To make the rose, cut petals from crepe paper and curl them around the edges of the center curving outward. The center is one of the little pined paper cups that come in candy boxes. The petals are made long enough so that they can be wrapped under the cup with wire. The rose cup is then fastened to a green stem made by twisting crepe paper around wire. Crepe paper leaves are added and the rose is complete. A large bonbon is placed in the center of each rose and the effect is very pleasing and charming.

Wrapping Paper.

White paper should not be used for wrapping around articles that are to be put away for the chloride of lime in it will destroy the color of the fabric. Yellow or blue paper is far better for that purpose—Los Angeles Express.

Summer Data.

The fashionable hostess has her stationery used from her country place engraved with the name of the country place, that of the local station for telegrams and trains and the number of her telephone, says the New Haven Journal Courier. The engraving is so effectively done that it is almost decorative.

Saves Sauscians.

To save iron saucepans, turn each one up on the kitchen range once a week and give the outside a coating of black lead, says the Pittsburgh Sun. This will not only make the saucepans last longer and add to their appearance, but it will also prevent any-

thing cooked in them from adhering to the saucepans.

Novel Hosiery.

Wonderful ingenuity is exercised in the matter of smart hosiery, and for women who like novelties in any form there is plenty to choose from, says the Cleveland Plain Dealer. Curious effects are contrived with stripes in lace or silk stockings, varying from about an eighth of an inch to a fine hairline.

PERFECT HEALTH WOMAN'S CROWN OF GLORY.

Did you ever observe a woman who has reached the age of sixty or even seventy in perfect health and say to yourself, "I hope I may grow old as gracefully as she does?" In order to reach a lovely old age women should guard against woman's diseases, as they are the greatest menace to joy and gladness. Lydia E. Pinkham's Vegetable Compound is nature's own remedy for organic derangements, safe and certain. Nearly forty years of success is a grand and peerless record for any one medicine.

MOTHER HIDES IN SHAME.

Mrs. Schirck, with Japanese Son-in-Law, Fears to Tell Husband. LOS ANGELES, Aug. 18.—For four months, during which a nationwide search for her was made, Mrs. William A. Schirck was sequestered in a cottage a few blocks from her home guarding the secret of the marriage of her 16-year-old daughter to a Japanese. This became known today when Mrs. Schirck returned to her husband and other children. When she heard of the wedding, she lacked courage to tell her husband and secluded herself in the residence of her Japanese son-in-law.

If you sit in a cool draft when you are heated and get a stiff neck or lame back, you will be looking for something that will ease the pain. Fix your mind on BALLARD'S SNOW LINIMENT and don't be talked out of it because it is the best pain relieving liniment you can get anywhere. Price 25c, 50c and \$1.00 per bottle. Sold by all dealers.—Adv.

UNION SCALE OF WAGES TO BE PAID BY STATE

SALEM, Ore., Aug. 18.—The decision of State Printer Harris to pay the Portland union job scale, which is \$25.50 a week in the state printing office, is backed up by an opinion of the attorney general. The question was submitted to him to determine whether Harris had authority to pay a higher scale than the present wages of job offices in Salem, which is \$21 a week.

Constipation is the starting point for many serious diseases. To be healthy keep the bowels active and regular. HERBINE will remove all accumulations in the bowels and put the system in prime condition. Price 50c. Sold by all dealers.—Adv.

CUPID WORKS ON HIGH SEA.

SAN FRANCISCO, Aug. 18.—Since leaving here two months ago on the

liner Siberia, Caroline Dorsten, stewardess, has changed her name. Although she still is carried on the ship's papers as Stewardess Dorsten, her name now is Mrs. J. C. Tapscott. She is the wife of a wealthy Chicago commission man.

Tapscott was a passenger on the outward trip of the Siberia. He met the stewardess and they became engaged. During the day that the liner stopped at an island port, they were married. Tapscott remained in the Orient and his bride returned as stewardess of the steamer. Her husband will arrive here on the next China liner and they will go to Chicago to live.

GIANT COUGAR IS ABROAD.

CENTRALIA, Wash., Aug. 18.—The residents of Hannaford Valley, located a few miles north of Centralia, are being terrorized by a monster cougar. The beast made its first appearance two weeks ago when it attacked a Mendota physician who was riding through the valley. The cougar was repulsed by the horse after the rider had been thrown but since that time it has reappeared in various parts of the valley. Children are kept indoors and the farmers of the valley are going about armed. Numerous hunting parties have gone out from Centralia in search of the beast, but as yet it has eluded capture.

EXTENSION WORK PLANNED.

Agricultural Department to Co-operate with Oregon College. OREGON AGRICULTURAL COLLEGE, CORVALLIS, Aug. 18.—That the United States Department of Agriculture, through the division of farm management, will co-operate with the Oregon Agricultural College in developing the agricultural extension work in this state, was definitely decided at a conference held at the Agricultural College recently between resident W. J. Kerr, E. D. Hetzel, director of extension work of the college, and C. B. Smith and Byron Hunter, representing the federal government.

The present arrangement calls for co-operation between the state and the federal department in providing for the overhead supervision of the field and demonstration work. This agreement will have the advantage not only of financial aid from the federal government, but of bringing the help of the great federal organization and the information in its possession directly to the farmers of Oregon. The agreement will take effect as soon as the federal government is able to make the necessary adjustments. H. T. French will have immediate supervision of this department of the extension work.

QUAKE SPOILS OIL WELL.

Subterranean Explosion Results in Flow of Gas from Gusher. LOS ANGELES, Aug. 18.—In the ocean field at Summerland, near Santa Barbara, the Duquesne Oil company has a well, which, in the past, has produced considerable oil but following a recent earthquake shock the oil ceased to flow and the well commenced to yield gas—irregularly at first.

After what appeared to be a subterranean explosion, the well became a regular gas gusher and the flow seems to be constantly increasing. The well is only 200 feet deep.

LIGHT BURNING OF PINE FORESTS

The effect of light surface fires on pine timber is to kill or damage more than half of the mature trees, according to findings just announced by the U. S. forest service.

The studies were made on the Wal-lowa and Whitman national forests in the Blue mountains of eastern Oregon. Several typical stands of western yellow pine were selected, where surface fires had recently burned. The region had been periodically run over by such fires for a long time. The most recently burned areas were carefully surveyed and all the trees individually studied to find the effect of the fire.

As a result of this survey the following facts were verified: A surface fire kills from one to three merchantable trees per acre, by eating out basal fire scars; it makes fire scars at the base of 42 per cent or nearly one-half of all the merchantable yellow pines; it actually burns to death more than 3 per cent of the trees—that is, they are killed by the heat of the light surface fire at their bases. In short, of the mature trees more than one-half of the total suffer more or less damage.

The stands were selected to insure results representative to the region, according to the forest service investigators, who draw the conclusion that deliberate light burning in such localities to remove brush and undergrowth is distinctly uneconomical, particularly since successive surface burnings only heighten the injury to the trees and make it cumulative.

VICTIM WIFE OF AUTO MAN.

Centralia Woman Victim of Two Motor Accidents.

CENTRALIA, Wash., Aug. 18.—Mrs. Rose Winchell, the Centralia woman who was killed in an auto accident in Seattle was the wife of E. E. Winchell, who conducts an auto business in this city. Mrs. Winchell was struck last September by an auto driven by M. C. Hancock, local manager of the Centralia-Chehalis Gas company, and later filed suit for \$12,500 damages against the gas company. The suit is still pending.

GERMANY POSITIVELY NOT TO EXHIBIT

BERLIN, Aug. 18.—The semi-official North German Gazette states positively that Germany will not participate in the San Francisco exposition. It declares German industries are overwhelmingly opposed to the plan, not being able to see any benefits.

WOMEN READY FOR POSTER.

SPOKANE, Wash., Aug. 18.—If an attempt is made in Spokane to display Portola posters bearing the figure of a dancing woman only partly clad, there will be quick action on the part of the Federated Women's Christian Temperance Union of the city, according to information given out. The posters of the San Francisco

Festival, which have been creating so much comment in other sections of the west, have not as yet made their appearance here, but several leaders of the local Women's Christian Temperance Union bodies expressed themselves as only waiting for a chance to see the pictures, when strenuous measures will be put forth to keep them from the city, if they are found wanting.

"I am not ready to say what action will be taken with regard to the posters if they are brought here," stated Mrs. Jessie Atkinson, president of the Federated Women's Christian Temperance Union. "I have not seen a copy of them, but from what I hear they deserve close attention. Our organization most undoubtedly will come out strongly against them, and take measures to keep them from the city, if they are found to be in any sense vulgar."

KNIFE MAY MAKE BOY GOOD.

VANCOUVER, Wash., Aug. 18.—A surgical operation for the cure of wayward tendencies will be performed upon Randall Perkins, 9 years old, by local physicians who have become interested in the case. The boy cannot be kept at home.

It is believed that when Randall recovers from the operation for the removal of a severe case of adenoids, that he will be a normal child and that he will then be contented to live at home with his yellow dog, which he has taken with him on all of his escapades.

The boy was adopted by a woman living near Orchards, when he was 14 months old, and has been given the best of care. Officers had decided to send the boy to the State Industrial School, but E. H. Wright, probation officer, became interested in the case, and after an examination by physicians, it was decided that his trouble would disappear if the operation is performed.

Suffered Eczema Fifty Years — Now Well.

Seems a long time to endure the awful burning, itching, smarting, skin-disease known as "tetter"—another name for Eczema. Seems good to realize, also, that Dr. Hobson's Eczema Ointment has proven a perfect cure.

Mrs. D. L. Kenney writes: "I cannot sufficiently express my thanks to you for your Dr. Hobson's Eczema Ointment. It has cured my tetter, which has troubled me for over fifty years. All druggists, or by mail, 50c. Koeppe—Adv.

PEPPER CHEMICAL CO.

St. Louis, Mo. Philadelphia, Pa.

JAP COAL IMPORTATION SAUSES INDIGNATION

VANCOUVER, B. C., Aug. 18.—Public-indignation over the forced importation of Japanese coal as a result of refusal of the operators to arbitrate the strikes in mines east of here, is liable to affect it was declared today, the opening of government mines in Alaska. Mine operators declare they will import Japanese coal until the strikers return to work and the owners today are being bitterly denounced as responsible for this situation when there is unlimited supply 45 miles from Vancouver.

Telling the truth accidentally is more or less embarrassing.

WATER POWER FOR LUMBERING

Acting Secretary of Agriculture Galloway has just granted a final water power permit to E. P. Ash and Sam Samson of Stevenson, Washington, the power to be used in logging operations in the vicinity of Wind River. This final permit succeeds a preliminary one granted to the same parties on March 1, 1912.

The water power project, which utilizes the flow of Wind River, is located entirely on national forest land of the Columbia forest and is about 30 miles northeast of Stevenson.

By means of a timber crib dam, about 10 feet in height, water will be diverted into a wood-stave pipe 4 feet in diameter, in which it will be conveyed a distance of about one mile to the pressure pipes and the wheels. At the power house there will be installed one 750-kilowatt unit, direct connected to a Pelton wheel.

A FALLING OUT.

May was in love with an aeronaut; it's a cinch he could have copped her.

But without the slightest provocation The horrid fellow dropped her.

Not every man has the face to raise whiskers.
