

HARD CRUST ON BABY'S HEAD

Little Pimples All Over Body. Fretted All the Time. Itched So Could Not Sleep. Used Cuticura Soap and Ointment One Month and He Was Entirely Well.

Prineville, Ore.—"My baby had a hard crust on top of his head. It started by little sores and all over his body he had little pimples. His body was one mass of sores and he fretted all the time. It itched so badly that he could not sleep. I tried so many remedies and they all failed; none helped him. The trouble had lasted for three months before I used Cuticura Soap and Ointment. As soon as I used them it was only an hour when he felt relief, he went to sleep and slept sound. I only used Cuticura Soap and Ointment one month and he was entirely well." (Signed) Mrs. Alice Racher, Sept. 24, 1912.

FOR PIMPLES AND BLACKHEADS
The following is a most effective and economical treatment: Gently smear the affected parts with Cuticura Ointment, on the end of the finger, but do not rub. Wash off the Cuticura Ointment in five minutes with Cuticura Soap and hot water and continue bathing for some minutes. This treatment is best on rising and retiring. At other times use Cuticura Soap freely for the toilet and bath, to assist in preventing inflammation, irritation and clogging of the pores. Sold throughout the world. Sample of each mailed free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. T, Boston."

Invites you to inspect the Electric Starting

1914 BUICK

The 1914 Buick gives more real value for your dollars than any other line of cars. You can buy cars cheaper than the Buick, but you can't buy them better.

- 28 H. P. Roadster \$1135
- 35 H. P. Roadster \$1435
- 28 H. P. Touring \$1235
- 35 H. P. Touring \$1535
- 6 Cylinder 55 H. P. Touring \$2185

These prices are f. o. b. Pendleton, with full equipment, including a \$50 speedometer, eight-day clock, Delco electric starter, and lighting system, wind shield, top, electric horn, extra tire to carry on rear, extra rim, tube and tire cover and set of weed chains

Remember, these cars are equipped with the famous Delco lighting and starting system, and include many features in finish and construction that easily supports our claim that no line of Motor Cars at any price can show more value than will be found in the Buick line for 1914.

The models B 36 and B 37 have new body lines, that not only add to their attractiveness, but increase the comfort of the occupants.

The same underlying principles of construction are followed in the building of every Buick. No matter what its price, a Buick car must and will give the maximum of that service for which it was intended.

Call and see the car itself and be convinced that Buick cars are "Built up to a Standard and not Down to a Price."

WELFARE WORK ACTS AS BRAKE

REPORTS SHOWS THAT IT HAS BEEN MEANS OF PREVENTING BIG STRIKES.

(By Burton K. Standish, Written for the United Press.)
WASHINGTON, Oct. 18.—"Welfare work" has not kept down the level of wages in the industrial plants where it has been introduced, according to a bureau of labor report just issued by Dr. Elizabeth Lewis Otey. It has, however, acted as a brake against strikes and other expressions of discontent on the part of the employees. It has greatly strengthened the influence of the factory manager over the factory hands. It appeals to the uneducated and illiterate class of workers whose gratitude for the parks, restrooms, dining rooms, baths, or other special considerations is shown in loyalty to the employer.
Dr. Otey defends the welfare system as "settling a higher standard of comfort for the average employee, to which all industrial plants will gradually be brought by pressure of public opinion or by legislation." She reasons that since welfare work has proven "good business" for some time, employers who have tried it, the public has a right to demand that all employers adopt its essential standards. The report deals with 50 of the largest plants in which welfare work has been organized. These include various metal, textile and food factories, stores, hotels and public utilities. Mutual benefit societies, pension funds, libraries, outing clubs, saving banks, medical service and other items are illustrated. In each instance the employees appear to have approved the scheme.
"Along with the welfare work, however," remarks Dr. Otey, "the employer might show a further recognition of his obligations to society by trying to crystallize the higher standards in his own mill or factory through legal enactment, and not by opposing the passage of laws which tend to secure these benefits for all workmen."

Avoid Sedative Cough Medicines. If you want to contribute directly to the occurrence of capillary bronchitis and pneumonia use cough medicines that contain codeine, morphine, heroin and other sedatives when you have a cough or cold. An expectorant like Chamberlain's Cough Remedy is what is needed. That cleans out the culture beds or breeding places for the germs of pneumonia and other germ diseases. That is why pneumonia never results from a cold when Chamberlain's Cough Remedy is used. It has a world wide reputation for its cures. It contains no morphine or other sedative. For sale by all dealers.—Adv.
