Another interesting innovation! miniature electric disc stove

Small disc stove is only 4 1-2 inches in diameter, but is highly efficient, and heats up very quickly. Requires much less current than the larger, heavier discs; nevertheless gives excellent results. The cooking plate is made of pressed steel, blued. The heating element is clamped closely against the under side of this disc. Deflecting plates below the element prevent waste radiation.

Does all light cooking, especially useful for travelers and in the sick-room.

Base and legs are of pressed steel; the feet, fiber-tipped. A one-foot extension cord with separable plug and socket is permanently attached. Seven feet of flexible cord for connecting to any lamp socket.

Price \$3.50 or 14 pages T. P. W. stamps.

EL STOVO—Electric disc stove. Made in a wide range of sizes and wattages; probably one of the most widely used and handiest appliances made. Certainly would make a most acceptable Christmas gift. The 4-in. and 6-in. sizes operate from an ordinary lamp socket. 4-inch size costs \$4.00 cash or 16 pages of T. P. W. stamps.

Also new! a cook set to use with the Hotpoint electric iron

Two dishes and a stand for inverting the Hotpoint Iron which enables you to use your iron as a stove. Both boiling and frying operations can be successfully accomplished.

The large dish holds more than one quart; and will bring water to a quick boil. Does all stewing operations; and poaches, scrambles or boils eggs.

Seamless aluminum dishes. Stand is pressed steel, blued. Interchangeable ebony handle. Legs of stand fold up, and stand telescopes into dish.

Using the Hotpoint Iron as a stove does not interfere with the regular 10 year guarantee.

Cooking set complete \$2.00 or 8 pages T. P. W. stamps.

Stand 50¢ or 2 pages T. P. W. stamps.

Dish \$1.50 or 6 pages T. P. W. stamps.

Iron \$3.50 or 14 pages T. P. W. stamps.

The Cost of Operating Hot-Point Appliances is Small

In applying the following, keep in mind the fact that but few of these appliances are connected continuously while in actual operation.

THE COST TO OPERATE HOT APPLIANCES WITH CURRENT AT 10¢ PER KILO-WATT HOUR IS AS FOLLOWS:

3 POUND IRONS will cost 3 1-3¢ per hour.

5 POUND IRONS will cost 5¢ per hour.

6 POUND IRONS will cost 5 3-4¢ per hour.

UTILITY SET will cost 3 1-3¢ per hour.

EL BAKO will cost 6¢ per hour.

EL BOILO will cost 3 1-2¢ per hour.

EL GRILLO will cost 6¢ per hour.

EL STOVO, if turned on full force will cost, according to the size from 6¢ to 11¢ per hour; if turned on medium will cost from 3¢ to 5 1-2¢ per hour, and if burned on low will cost only 1 1-2¢ to 2 3-4¢ per hour.

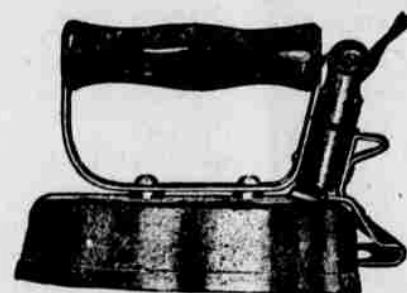

EL TOSTO costs 6¢ per hour.

EL TOSTOVO costs 5¢ per hour.

EL PERCO costs 4 1-2¢ per hour.

EL CHAFO costs 4 1-2¢ on high or 2 1-4¢ on low.

So you see the cost of operating appliances is almost nothing, cheaper than building a fire and much handier.
