

TIME TO RE-TIRE

(BUY FISK)

FISK TIRES

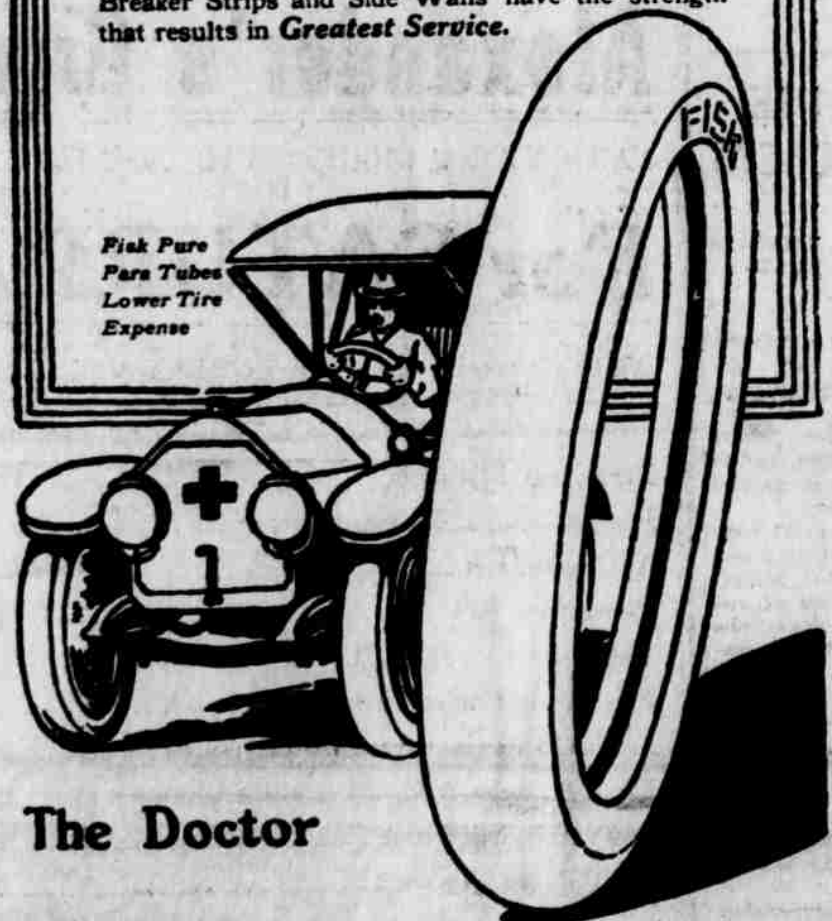

HEAVY CAR TYPE FISK TIRES

Stronger Tires For Light Cars

HEAVY CAR TYPE FISK TIRES IN SMALL SIZES are the greatest buy on the market. They have the advantage of a construction primarily designed to carry heavy cars. The margin of safety in the Fisk small sizes is so great that their use eliminates tire troubles.

Why They Are Stronger

The Fisk Rubber Company is, we believe, the *only* company which has held consistently to four plies of fabric in 3-inch tires. It stands practically alone in the making of smaller size tires with the same proportionate strength found in the larger sizes. If you use a tire 4 inches or under, try a Fisk and profit by its *Extra Heavy Construction*. Treads, Breaker Strips and Side Walls have the strength that results in *Greatest Service*.
