NEWS OF THE NORTHWEST

EUGENE, Ore., Aug. 19.—Mrs. Harvey Cox and a wheel from the automobile in which she and her husband had been riding alighted together on a pile of ashes in a vacant lot almost 50 feet from the point where the Southern Pacific locomotive struck the motor car at a street crossing today.

She arose without assistance, and an hour later walked out of a physician's office where her injuries had been dressed.

PORTLAND, Ore., Aug. 19.—Paper money, which has never been used to any great extent on the Pacific coast, is to become more and more the medium of exchange here, according to the opinions of leading bankers.

This change in the medium of exchange, say the bankers, will result from the establishment of a federal reserve bank on the coast, as then the banks will be able to keep supplies of fresh currency on hand.

WALLA WALLA, Wash., Aug. 19.—The \$100 mine imposed on J. O. Fenton of Spokane, because he sold obscene literature on the Walla Walla-Pendleton passenger train was paid yesterday morning with a purse made up by traveling men now in the city. Fenton has been a news "butter" on the run for the past 10 years. He was arrested upon complaint made by a local school teacher who paid \$4.50 for two small books and eight post card pictures.

INDEPENDENCE, Or., Aug. 19.—Hoppers are beginning to arrive in large numbers and it is expected that all trains will be crowded by the end of the week. Picking will commence this week in one or two early starts, but it will not be generally started before September 1. The hops show promise of being clean and of good quality. The hot weather has worked its damage and it is certain now that there will be more than three-fourths of a crop. The estimated crop is 100,000 to 110,000 bales, against 151,000 bales last year.

EUGENE, Ore., Aug. 19.—Arrests and prosecution of men suspected of starting fires in the Siuslaw forests, west of Eugene, are expected by the state deputy game warden, and an example will be made if possible to warn hunters, whom the forestry officials say, have been maliciously responsible for scores of fires this year.

VANCOUVER, Wash., Aug. 19.—Voters of Vancouver will be required in November, to vote for or against local option in the city and statewide prohibition. A local option organization has been formed and petitions have been circulated. W. P. Connaway, ex-cashier of a bank here, is president and William C. Bates, progressive candidate for county representative, is secretary. The finance committee includes W. Foster Hadden and Charles W. Hall.

SALEM, Ore., Aug. 19.—Attorney General Crawford said today that he probably would file an amended complaint in the test suit to recover school lands alleged to have been obtained through fraud in the Benson-Hyde deal.

Circuit Judge Harris of Eugene, sustained a demurrer to the complaint filed by the state on the ground that there had been delay in filing the action. He said that the statute of limitations would not bar the action if the state could show good reason for its delay in starting suit.

GERMAN WIRELESS FOUND IN BELGIUM

BRUSSELS, Aug. 18.—A secret wireless apparatus was discovered concealed beneath a statue on the roof of a German store in this city. The antennas were shrouded by flags. A detachment of twenty English nurses arrived here to assist in nursing the wounded.

YOUNG GERMAN BARON VON BIEBERSTEIN SLAIN

PARIS, via London, Aug. 18.—Lieutenant Baron Marshall von Bieberstein, son of the Baron Marshall von Bieberstein, who was formerly German ambassador to Constantinople, was killed in a fight near Genoa, in the French Department of Haute-Et-Moselle, on August 5.

Milwaukee gets an additional school house.

Woman and Her Varied Interests

Social and Club News, Personals, Fashions, Home Hints and Other Items of Interest to the World Feminine.

SOCIAL

A large number of friends of Mr. and Mrs. William M. Blakely called at their home, 221 South Main street, last evening to celebrate with them their golden wedding anniversary and the occasion was a most happy one. The "bridal couple," young despite their years, received the congratulations of their friends with as much pleasure as they did fifty years ago in Brownsville when they were joined in the union destined to remain unbroken for more than a half century.

The house was aglow with golden appointments. Gold-tinted flowers, part of the sent from Vancouver by Mrs. Blakely's sister, east their beauty from nooks and corners while gilded candles burned about the rooms. Everything was done to make the rooms an appropriate scene for such a celebration.

During the evening punch, ice cream, cake, coffee and candies were served to the guests. Mrs. J. J. Roulstone and Mrs. Lina H. Sturgis presided at the serving tables and were assisted by the Misses Thelma, Zella and Katherine Thompson, Laura Jerard and Pauline Rice. The host and hostess were assisted during the evening by their two daughters, Mrs. G. M. Leser and Mrs. Sam R. Thompson, and their granddaughter, Mrs. Merle R. Chessman.

From an alcove Victrola music entertained the guests at intervals but the feature of the evening was the serenade from the lawn by the Round-up band. The band, which had been holding rehearsals, came as a surprise and their old airs "Here Comes the Bride," "Auld Lang Syne" and "Home Sweet Home" were thoroughly enjoyed.

Altogether the golden wedding of Mr. and Mrs. Blakely was celebrated most fittingly and the assemblage of so many friends testified to the esteem in which the elderly couple is held in the community which has been their home for forty-six years.

Mrs. Lee D. Drake arrived home last evening from an extended summer visit at Lehman Springs.

Mrs. G. M. Leser, who has been here for several weeks and who attended the golden wedding anniversary of her father and mother, Mr. and Mrs. William Blakely, left at noon for Portland from which city she will take train for Los Angeles.

The most successful dance of the season was given last week at Lehman Springs by the ladies encamped at that resort. It was a "suffragette" affair and the men for once were not given the opportunity to choose their partners.

GOLDEN WEDDING BELLS. The fifty years of married life for William Blakely and his wife, Of wedded bliss and peace and strife, As they have passed along.

So like an ancient love romance It is a wondrous circumstance, We give it thrice, or twice a glance To get it full and strong.

For married life is full of stuff To make us think the past is rough, That many of us cry "Enough!" Ere Death can sound the gong.

Progressive marriage is a fact That William and his wife have lacked. They seem to keep the steady tact Unsusited to the throng.

And yet they speak in highest praise Of William and his wife, and ways, And wish that many happy days Be added to their song.

C. S. TERPENING.

August 19, 1914.

Complimenting her daughter, Mrs. E. Scharpf, of Pilot Rock, Mrs. G. Fanning presided at a handsomely appointed luncheon at the Portland Hotel last Wednesday. The large round table, on which covers were laid for 12, was decorated with sweet peas and maiden hair fern. Mrs. Fanning's guests were Mrs. Scharpf, Mrs. Arthur Schaffer, Miss Lucy Appleby, Mrs. W. Ris, Miss Scharpf.

Home Hints and Recipes

DICTATES OF FASHION.

Hats and gowns for autumn will be of somber tones. Fashionable trains are merely scarfs ends, that look precisely like scarfs when thrown over the arm for dancing.

Muslins, chiffons and voiles have never been so pretty as now, and they come in dark as well as light color. Nothing in the way of headresses is incorrect if it recalls those of the ancient Greek and Roman women.

For every day there is no better method of dressing a child's feet than in brown, black or white shoes, with socks to match.

One of the features of the season is a touch of color in white dresses. Sometimes this touch is in the form of black velvet.

Fur fashions are already decided. Small neckpieces of fox, marten and lynx, also fur fancies in ermine and white cone, are to be in great demand. Broad stoles of seal or muskrat are to be worn.

CONCERNING WOMEN.

Queen Mary of England is an expert judge of laces.

Utah has the lowest divorce rate in the union.

Lotta M. Crabtree is the richest actress in the world.

The New York university has just graduated thirty-six women as lawyers.

Clubs for servants will be organized by influential women in New York.

The French courts have decided that women cannot vote in that country.

There is a shortage of daughters among the royal families of Europe.

Most of the conductors on the street cars in Valparaiso, Chile, are women.

London has a woman who can detect a spider in a room, although she does not see it.

Mme. Calve, the opera singer, will shortly establish a traveling school for the teaching of singing.

Ten to twelve drops of tincture of camphor in a glass of water makes a good daily wash for the teeth.

To remove a soft corn apply a piece of cotton wool that has been soaked in castor oil and keep it in place overnight with a bandage.

Don't forget that glycerine and rose-water are excellent for keeping the skin of the hands smooth and soft.

Don't breathe through the mouth, and don't form the habit of keeping your mouth wide open. Not only your health, but your looks will suffer if you do.

If your face lacks intellectuality, the only way to remedy it is by exercise of the mind. Take up a course of reading and study beyond that which you have hitherto attained. To put it figuratively, cultivate the muscles of the brain as you would cultivate the muscles of the body. It is the action of the brain that will influence the expression.

HEALTH AND BEAUTY.

BENEFITS OF SWIMMING.

(By Abagail Moore.)

"Not the least of the many benefits derived from swimming," says Miss Ideal, the international woman champion, "is the encouragement it gives to the singing voice. Each of the various movements required for swimming tends to free the muscles around the lungs and to increase

the working capacity of the diaphragm and the respiratory organs. In accomplishing these things the muscles of the throat (through regular, directed breathing) necessarily become strengthened and are rendered more flexible and able to perform their functions with ease.

"Each stroke also tends to strengthen and render elastic the muscles back of the lungs, muscles which ordinarily are not exercised.

"Even more important is the fact that the exercise of swimming reaches the muscles that are close to the spine. Many of the severe headaches caused by undue tension of these muscles, and to persons so afflicted swimming is especially recommended.

"This tension, besides the discomfort it causes, forbids easy action of the respiratory and other vital organs, rendering it quite impossible to produce a full, clear tone, even in speaking, much less in singing.

"The position of the head in the rudimentary swimming movements is another factor in helping the voice. The head is held up, chin raised and throat muscles are lengthened and developed. Throat and neck assume a shapeliness and fullness of contour that would come about in no other way, and what is as much to the point a continued practice of swimming will do more than any other agent toward retaining that contour when age might otherwise show itself in stringy, flabby muscles and wasted tissue.

"Half filled lungs, faulty breathing, beget a weakened voice. Swimming corrects this, inducing both regularity and depth of respiration. As the swimming strokes are rhythmic, rhythmic respiration follows, the lungs take more air as the strokes become more vigorous. This cause and effect is helped on by the surging of the water, which in itself tends to stretch the lungs like an accordion. In turn this provides for more volume to the voice and makes production of clear, round tones comparatively easy and natural."

WAR MAY UNITE NORWAY AND SWEDEN

CHRISTIANA, Aug. 18.—The exchange between Norway and Sweden in connection with the war situation, of what were spoken of as "obligatory assurances," was regarded here as the first step toward a reunion of the two countries.

The "assurances" bound the two governments only to refrain from hostilities with one another, but they were considered preliminary to a defensive alliance. It was thought the expected combination would be rather in the nature of a federation than a merging of governments.

Denmark, many believed, would join the group.

RESINOL STOPS SKIN TORMENTS

How This Wonderful Ointment Ends Itching and Heals Skin Eruptions.

The soothing, healing medication in Resinol Ointment and Resinol Soap penetrates every tiny pore of the skin, clears it of impurities, and stops itching instantly. Resinol quickly heals eczema, rashes, ringworm, and other eruptions, and clears away disgusting pimples and blackheads, when other treatments prove a waste of time and money.

Resinol is not an experiment. It is a doctor's prescription which proved so wonderfully successful for skin troubles that it has been used by other doctors all over the country for more than eighteen years.

No other treatment for the skin now before the public can show such a record of professional approval. Every druggist sells Resinol Ointment (50c. and \$1.), and Resinol Soap (25c.); but for trial size, free, write to Dept. KK, Resinol, Baltimore, Md. Look for the blue package and avoid worthless "substitutes."
