"T.P.W. PURE FOOD SHOP"

CLEANLINESS, ECONOMY, SERVICE

Demonstration all this week TRU BLU CRACKERS, COOKIES and WAFERS. You are invited.

SWEET GREEN PEPPERS direct from the grower, 2 pounds 25¢

Look to your needs now for those extra dishes, etc., for "The Round-up."

Phones 17; all other departments 22.

WATERMELONS—Choice, ripe melons from Southern Oregon, pound 2¢

PEACHES, THOSE FAMOUS STAN-FIELD ELBERTAS, box 65¢

BARTLETT PEARS, just right for canning. Box \$1.75

The Peoples Warehouse

Where It Pays to Trade. Save Your T. P. W. Trading Stamps

Albany Laundry Raided.
ALBANY, Ore., Aug. 31.—Raiding a Chinese laundry in this city, S. B. Sandifer, of Portland, special investigator for the Oregon Board of Pharmacy, confiscated two opium pipes, an opium lamp, a can of engine oil, two engine knives, two Chinese scales of the type used in weighing opium, two bowls and six opium spoons. He destroyed the lamp and

pipes and took the other paraphernalia with him.
No one was found smoking and the raiders think Albany Chinese were warned by Chinese of Eugene, where Sandifer made successful raids Friday night.

Food boosters are the guerrilla bands that do not care what the cause be so long as they get the loot.

For some reason the struggle between the Teuton and the Slav has been crowded into the background.

Recuperation—there is not so much in the ordinary vacation as there is in a single bottle of Hood's Sarsaparilla, which refreshes the tired blood, sharpens the dulled appetite, restores the lost courage. Take Hood's Sarsaparilla this summer.—Adv.

FIRST PHOTOGRAPH OF RUSSIAN WAR PRISONERS IN GERMANY

The above photograph, which has just been received in the United States, shows Russian prisoners of war at Doepert, Germany, forming in line for dinner. They carry basins into which the food is placed by the cooks. These men were placed under arrest when war was declared on Russia. They were taken in the vicinity of Berlin and transferred to the barracks at Doepert, where they will be held until the end of the war.

SOCIETY

SOCIAL NEWS SHOULD BE PHONED BY 10 A. M. EACH DAY

Mr. and Mrs. Westbrooke Dickson and baby daughter, Mary Louise, arrived home yesterday morning from Tokeland, Washington where they had been for two weeks. Mrs. Dickson and the baby had previously been visiting in Portland and at Long Beach.

Mrs. Sam R. Thompson and Miss Thelma Thompson left yesterday for Portland for a short visit.

Dr. and Mrs. Guy Holsington and daughter, Marion, arrived home yesterday from Garibaldi, Washington, where they had been enjoying the seabeaches for a fortnight.

Mrs. Charles F. Colesworthy and daughter, Miss Margaret Colesworthy, arrived home last evening from an extended visit in Portland and at the coast.

Mrs. Edward J. Murphy, daughter, Miss Jennie Murphy, and mother, Mrs. Nelson, arrived home yesterday evening from a sojourn at Seaside.

Mrs. Clinton E. Roosevelt and daughter arrived home this morning from Seaside where they had been for several weeks.

This evening in the auditorium of the eastern Oregon state hospital, quite a number of Pendleton people will have the privilege of listening to Miss Doris Reber, daughter of Dr. D. N. Reber, who is a highly accomplished vocalist. Miss Reber has also been induced to sing next Friday evening at the open air band concert.

Miss Ida Hinderman arrived home last evening from a vacation visit in Portland and Seaside.

Miss Gwendoline Weaver, formerly of this city, arrived last evening from Portland to be the guest of Miss Laverne Wissler.

Miss Florence Frazier, daughter of Mr. and Mrs. Charles Frazier of Colfax, returned to her home yesterday after spending the summer at the Nelson ranch near Lehman Springs.

Mrs. James S. Johns entertained a few friends last Friday afternoon, complimenting Miss Mabel Bickers, whose wedding to Otto Smith will be an event of this week.

Mr. and Mrs. Adam Ruppe, formerly of this city, left Portland last week for Alberta to visit at the home of their son, Herbert Ruppe.

Reuben Beckwith, son of Mr. and Mrs. J. S. Beckwith, returned today to Seattle after a visit of a week with his parents and friends. He has been working in Seattle during the summer but will re-enter the University of Washington this fall.

Mr. and Mrs. Adam Ruppe, formerly of this city, left Portland last week for Alberta to visit at the home of their son, Herbert Ruppe.

Reuben Beckwith, son of Mr. and Mrs. J. S. Beckwith, returned today to Seattle after a visit of a week with his parents and friends. He has been working in Seattle during the summer but will re-enter the University of Washington this fall.

Mr. and Mrs. Adam Ruppe, formerly of this city, left Portland last week for Alberta to visit at the home of their son, Herbert Ruppe.

Mrs. James R. Perry and Miss Jennie Perry arrived home yesterday morning after spending a delightful three weeks at Seaview.

Home Hints and Recipes

Dictates of Fashion.
Buttons are peculiarly decorative this season.

Slip-on blouses are a little like middy blouses.

"Lace sweaters" are sheer, all-wool garments.

Pure apple green is often seen in evening frocks.

White craquelé mesh veils are an important feature.

Normandy Medici and cowboy collars are worn by all women from 16 to 60.

Small panama hats are trimmed with scarfs of heavy white chiffon or richly colored ribbon.

The low, broad crowned derby is the best hat for riding, though some women wear sailor hats in summer.

Jique in the now soft finish is very fashionable again for tennis frocks, and also as facings for washing shirts.

Glazed straws are still smart, especially in the black and colored effects, but the trend is toward the unglazed all-white midsummer hats.

The new sailor usually has some queer treatment of the crown. Either the crown is sloped off, dented, ridged or else shaped so as to appear rather lopsided.

An attractive feature of the new waists is that the backs are as pretty as the fronts. All waists have the loose blouse effect and are fitted in very slightly under the arms. A fine quality of white French voile is the material usually used.

Flowers Bought to be Enjoyed.
Some women are able to keep flowers a week in presentable condition. They simply give the flowers care.

To begin with, the water in which the flowers are put should be fresh. The stems should be cut off a quarter of an inch when the flowers are received and then another quarter of an inch each day.

A little salt should be put in the water. The flowers should spend the night in a moderately cool room, which has been aired just before they are put in it.

It would be better for the flowers, of course, if they need never stay in a close, overheated room, says the New York Times. But the flowers are bought to enjoy, and if they are removed from the living or drawing room as soon as it gets comfortably warm—to be sure, they will last longer, but, on the other hand, they will be enjoyed much less.

before however and always comes up again, and his friends believe that the present case will prove no exception to this rule.

New York yachtsmen and expert yacht-designers had little chance to examine the Shamrock IV in detail. In fact, about the only remarks which they were able to make about the challenger for the American cup were that she is probably the homeliest and most freakish yacht which has ever been sent here and that she looks to possess much speed.

The challenger has already been hauled out onto the dry dock and screened in with cloth, somewhat resembling a petticoat. As soon as minor details are attended to, she will be boxed in, to lie until such a time as developments in Europe make the sailing of the races possible. The two American boats will likewise be laid up.

An agreement is being forbidding radical changes in any of the boats and that no new defender will even be talked of, because the New York yachtsmen think that the Resolute or the Vanite can defend the cup successfully.

That the position of New York as a municipality is of much importance in connection with the European war is indicated by the statement of the Comptroller, that New York City now owes \$32,000,000 abroad. All of this is in notes, and all of the notes fall due in Europe within less than six months, the bulk of them, amounting to some \$28,000,000, falling due in November. Most of the obligations held abroad are revenue bills issued in anticipation of the payment of taxes. That the taking up of these notes will mean much to the countries in which they are held while supplying them with over \$28,000,000 reach cash for the conduct of the war, is a significant development, which probably was never dreamed of on this side, when the notes were issued.

There is now no peace in Europe but the peace of death.

The Case of L. L. Cantelon.
The case of L. L. Cantelon, Clarendon, Texas, is similar to that of many others who have used Chamberlain's Colic, Cholera and Diarrhoea Remedy. He says, "After trying a doctor for several months, and using different kinds of medicine for my wife who had been troubled with severe bowel complaint for several months, I bought a 25c bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy. After using the second bottle she was entirely cured." For sale by all dealers.—Adv.

Boneless Fish Caught.
LOS ANGELES, Cal., Aug. 31.—Long Beach has added a new fish to its list of curiosities, caught from the pier. It has these specifications:

Six inches long, two inches wide, same width whole length. No bones except rib. Mouth of a toad. Nears where tail ought to be. Fills with water when it swims. Long Beach pioneers "never saw the like."

NEW YORK IS SOLVING HIGH FOOD PRICES
(By Carlton Ten Eyck, Written for the United Press.)

NEW YORK, Aug. 31.—New York has found one way to beat "those food-vultures," as they have been appropriately called, who have grasped upon the great European conflict as a "reason" for boosting above the reach of New York's poor. The middleman and the jobber are to be done away with. There will be no need of a middle profit if the plan of Borough President Marcus M. Marks, of Manhattan, can be carried out.

The plan put into effect in a preliminary several days ago, has been so successful that there is little if any doubt that it will be a great success.

Here's the way Borough President Marks figures he can beat the "needless middle profit." He sent out a call to all farmers within a radius of fifty miles of New York City, telling them that he has prepared market spaces in four of the most congested districts of Manhattan.

To these places the people will go to deal direct with the farmers. The city is to boss the whole business. Comptroller Prendergast was so imbued with the idea that this was the best way to solve the "high food price scare" that he detailed a corps of his best men to act as market masters.

President Marks' idea was born of the wise retrenchment policy Mayor Mitchell adopted when the European war first broke out. The board of estimate had just appropriated \$42,000 for the development of the city's markets. This \$42,000 had to be held back as one of the items in the retrenchment measures. Borough President Marks was told he would ultimately get the money, but that he'd have "to wait for it."

Borough President Marks is not of the waiting kind. He bethought himself of the many open spaces in his borough which were lying idle. He thought they would be the very places for the temporary city markets he had in mind. He believed that the growers of food stuffs and the buyers could get along pretty well at these places even if they were not "improved." He therefore threw them open as markets.

The points now open as city markets are beneath the Manhattan and Queensboro Bridges, at Third Avenue and East One Hundred and Twenty-ninth street, where the people have long wanted such a center, and at the Fort Lee Ferry. The farmers, from the opening day, have fallen in with the idea in enthusiastic fashion. The people, too, have shown their approval by flocking in hundreds and thousands to buy direct. The arrangement, is eminently satisfactory to everyone concerned. The farmer gets better prices from the consumer than he would from the middle man and the consumer pays less for a little more of the same goods than he would if he bought from the retailer.

The gladdest persons in the world are those who are struggling back through New York from war-torn Europe. The same scenes are being enacted with the docking of each refugee ship. The marooned ones, many bereft of clothing, baggage and forced to pay extortionate prices for travel out of the war zone, are nevertheless happy to be back. It is worth the price, they hold. Men and women who therefore have never been satisfied in their voyages unless they are coming the pick of staterooms, are occupied in second class, or even steerage—and never murmuring, so glad are they to get back. A special committee of men and women appointed by Mayor Mitchell meets each refugee ship to render aid whenever necessary. The thing for which many of the returning passengers are particularly grateful is that this committee carries checks.

Speaking of the war and returning travelers recalls that railroads, coast and lake steamship lines and travel resort boomers in the United States are looking forward to their most successful season next year. They figure that the war will continue long enough to make European travel next season impossible, or, if the war is ended, that conditions will not be comfortable, and that American "cures" and resorts will get the European voyagers and their money. Meanwhile the losses to the steamship companies continues piling up. Tying up here of the liner Vaterland means the Hamburg-American line is losing interest on that \$10,000,000 every day her earning power is destroyed.

Be sure to get real Resinol
If you want to get rid of eczema, pimples, or other distressing skin eruption, you will accept no "substitute" for Resinol. Preparations similar in name or appearance are not "just the same as Resinol." Although a few unscrupulous dealers may offer them at or for Resinol, they are often crudely made, of little healing power, and some may even be dangerous to use. Buy in the original blue package.

WORLD'S GREATEST SWIMMER TO PERFORM AT TRISCO

Duke Kahanamoku
LOS ANGELES, Aug. 31.—Duke Kahanamoku's joining the Los Angeles Athletic club insures his taking part in the swimming races at the Panama-Pacific exposition of 1915 at San Francisco. The duke is the world's greatest sprint swimmer. George Freeth, the club's swimming instructor, is enthusiastic over the club's latest addition. He says, "The duke will be added to the squad before the meet on August 27, and with him I hope to build up a team that should take the lion's share of the international water carnival to be held in connection with the San Francisco exhibition."

How to Cure a Sprain.
A sprain may be cured in about one-third the time required by the usual treatment by applying Chamberlain's Liniment and observing the directions with each bottle. For sale by all dealers.—Adv.

Bears in Berry Traps.
KANE, Pa., Aug. 31.—While Mrs. Earl Davis was out picking blackberries in the wilds surrounding Lay City she was horrified to see two black bears coming down the mountain toward her.

Too frightened to run, she took a handful of berries from her pail and held them out to one of the bears. Bruin sniffed a couple of times, ate the berries from her hand, licked his chops and walked away, followed by the mate.

System Awakens With Pure Blood
In Mind and Body the Change is Wonderful.

After the depression, the stagnation, the despair over some blood disorder, it is fine to wake up to what S. S. S. has accomplished for you after a few days' use. It puts the nerves and blood in harmony; it arouses the cellular activity of the liver, kidneys, lungs, and other excretory organs to remove from the blood the body wastes that cause nearly all sickness.

This means that all decay, all breaking down of the tissues, is checked and repair work begins. S. S. S. has such influence on all local cells as to preserve their mutual welfare and afford a proper relative assistance to each other. More attention is being given to catalytic medicine than ever before and S. S. S. is one of the highest achievements in this line. For many years people relied upon mercury, iodine or potash, arsenic and other "drugs" as remedies for blood sickness, but now the pure, vegetable S. S. S. is their safeguard.

You can get S. S. S. in any drug store, but insist upon having it. The great Swift Laboratory in Atlanta, Ga., prepares this famous blood purifier, and you should take no chance by permitting anyone to recommend a substitute. And if your blood condition is such that you would like to consult a specialist without charge, address Medical Dept., The Swift Specific Co., 537 Swift Bldg., Atlanta, Ga.

LOS ANGELES, CAL., AUG. 31.
Long Beach has added a new fish to its list of curiosities, caught from the pier. It has these specifications:

Six inches long, two inches wide, same width whole length. No bones except rib. Mouth of a toad. Nears where tail ought to be. Fills with water when it swims. Long Beach pioneers "never saw the like."
