ONE PERIOD A DAY FOR GYM EXERCISES

HIGH SCHOOL ARRANGES SCHEDULE WHICH WILL BE FOLLOWED THIS TERM.

Arrangement is being made in the high school to use one period a day for gymnastic exercises, for those students who are not able to take part in general athletics.

R. E. Chloupeck and Clarence Tubbs of the manual-training department have volunteered to manufacture dumbbells and Indian clubs free of charge, providing material is furnished for their manufacture. The Domestic Science department will make gymnastic suits at little cost, and it is thought by those connected with the school that this important physical training can be given to students at very little cost or inconvenience.

Clarence Tubbs will have charge of this department and one period each day will be spent in the high school gymnasium, in valuable and interesting exercises.

The period in which this will occur has not yet been decided upon but as soon as this can be arranged and apparatus made, physical culture will become an important factor in the daily routine of high school life.

BRITISH SAILORS ANXIOUS TO MEET GERMAN FIGHTERS

MEN ARE CHAFING AT THE BIT AND WANT TO GET BUMP AT THE ENEMY.

LONDON, Sept. 21.—(By mail to New York).—Sailors with the British fleet are chafing at the bit, judging by letters they are sending home to their relatives. Following are three samples of the letters that are being received every day from the sailor lads.

"We are having a rather trying time up here, closed up around our guns all day long and on the alert for emergencies. Whether the Germans will tackle us or not is a matter of indifference to us as I do not believe any of the ships would be blown away under the fire from German ships. I don't believe they could hit us if we were all clustered together, but at the same time we are all of one wish and that is to have a bump at 'em. Let 'em come is what we say."

Another reads: "We are still dancing on the ocean wave on the lookout for the enemy but we begin to fear he is not going to show up. It is sickening to think of our fine fleet going to waste for want of something to fight. The Germans appear to be in a blue funk. We have seen one or two of their cruisers and scouting vessels, but they are always in a hurry to be off when they see us. We have given them every encouragement to come out and fight but they positively won't. I suppose they are waiting for someone to come along and buy their fleet second so they will have the claim of a moral victory in not having it captured."

A third follows: "After a period of serving as escorts for transports we are now to have a change but I can't say it is a change for the better. Germans who will fight are as scarce as sixpences in a sailor's pocket after two days ashore. They are a cowardly lot, after all their bragging, to hide behind their forts and never give us a chance to knock holes in them. Can you imagine a British fleet acting like that?"

The 114-K box and crate factory at Eugene is rushing the completion of their plant.
