County Given Ratio of 80.

Assessor C. P. Strain has received word from the state board of equalization that his assessments in this county have been accepted as representing 80 per cent of the real valuation of the property. The tentative ratio given this county was 75 and last year it was 77. Assessor Strain contended this year for an 81 per cent ratio and feels that the increase from 75 to 80 has been worth his effort. Only four counties in the state were given higher ratios. These ratios are used as a basis for equalization between the counties in apportioning the state taxes. The board also uses them as a basis for determining the assessed valuation of the public service corporation property within the different counties. If the public service property in this county is assessed as high as last year, the total assessed valuation of the property in the county will be close to \$50,000,000.

Canal Trade Protected.

PANAMA, Nov. 23.—Strict orders have been received to preserve neutrality throughout the Panama zone. Hereafter no information will be given by anyone relative to the cargoes carried by the ships using the waterway and entering the terminal ports. These orders have resulted partly from President Wilson's recent neutrality proclamation and partly from the efforts of local British diplomatic and consular agents to learn what ships carried coal and other probable contraband through the canal for possible transfer at sea to German warships.

FLAMES SWEEP AWAY LEADVILLE TENDERLOIN

LEADVILLE, Colo., Nov. 21.—The Leadville tenderloin district, famous for its saloons and dance halls in the pioneer days of violence and riotous celebration of sudden wealth, was swept away by fire. The damage was not heavy, as most of the buildings were flimsy wooden shacks which had stood since the boom days following the discovery of silver in the hills.

GOVERNMENT PHYSICIAN IS LOOKING AFTER INDIANS RED PEOPLE ARE BEING TREATED FOR EYE, EAR AND THROAT DISEASES. Indians of the Umatilla reservation can hear, see, smell and taste better than they could a few weeks ago, the improvement of their senses being due to the presence of Dr. Phillips of the Indian service who came here for the express purpose of looking after the eyes, ears, noses and throats of the Indians. He will remain here perhaps another month upon his work. More than fifty operations for trachoma have been performed on local Indians by Dr. Phillips, who has been assisted by Dr. T. M. Henderson, local physician for the red people. Trachoma, commonly known as granulated eyelids, has been prevalent among the local Indians for some time. It is a contagious disease and its spread was one of the chief reasons for the coming of the federal physician. The operations consisting in rolling the eyelids and squeezing out the granules. Dr. Phillips has also removed the tonsils and adenoids of 25 or more Indians during his stay here. Little ear trouble was found. Gaelic League Is Divided. DUBLIN, Nov. 23.—The war has caused a serious division in the Gaelic League in Ireland. At a meeting of the executive committee a resolution was brought forward protesting against the merging of Irish interests with those of the British empire in the present crisis. The mover quoted a speech of Dr. Douglas Hyde, in San Francisco in 1906, to the effect that the movement was not merely a linguistic one, but aimed to "place a new nation on the map of Europe." Dr. Hyde, who presided, ruled the resolution out of order, saying that if it should be passed the Gaelic League would go to pieces in less than a month. He said he had received a resolution from New York, to which he was replying that the business of the league was to secure the language, games, music and customs of Ireland, and that it left politics to political bodies.
