**CAN CATARRH BE CURED? IF NOT, A VISCIOSUS SEQUENCE.**

The Mother neglects to teach the child to blow his nose; some tissue behind the nose enlarges and the child has to breathe through his mouth—Adenoids—the arch or roof of the mouth goes up, the partition between the nostrils slides, buckles or bends and he will have nasal catarrh until the interior of the nose is made like it was before this happened. The catarrh extends to the ears, he may escape ear disease but later on he will have diminished hearing. If you wait until you are Hallowed at you never again will hear like you did a few years ago.

**Bell Gets Short Sentence.**  
Though he was convicted by a federal jury upon three different counts of attempted subornation of perjury, William H. Bell of this city was yesterday let off with only a nominal punishment. He was sentenced to ten days in jail by Federal Judge Rudkin. It was not that the court was inclined to look lightly upon his offense but because circumstances seemed to justify leniency, according to a letter received this morning by Supt. Swartzlander from Deputy U. S. Attorney Rankin. The man's advanced years, he being 66 years old, the fact that he had been in jail since January 8 and the further fact that he was unable to raise \$500 bail combined to induce the government attorneys to recommend a nominal sentence. The jury found Bell guilty of giving Irene Oliver, an Indian girl, money three different times, one dollar the first
