BANK DEPOSITS IN N.
Dakota Make Record

PARIS, Nov. 13—Bank deposits in French commercial banks have reached a new high, it was announced today, the highest since the banking system was re-established.

A large number of investors have been drawn into the market, and the demand for new deposits has been greater than ever before.

The highest level of deposits was reached on November 13, when the total reached 5,000,000,000 francs. This is an increase of 1,000,000,000 francs over the previous high, set on October 29.

The increase is due to a number of factors, including the improved economic situation in France, the increased confidence in the banking system, and the desire of investors to hold their money in a safe and secure manner.

The increase in deposits has also had a positive effect on the stock market, as the increased demand for new deposits has been met by a corresponding increase in the number of new shares issued.

The total number of new shares issued in November reached 300,000,000, the highest level since the beginning of the year. This is an increase of 50,000,000 over the previous high, set in October.

The increase in new shares issued is due to the improved economic situation in France, the increased confidence in the banking system, and the desire of investors to hold their money in a safe and secure manner.

The increase in new shares issued has also had a positive effect on the stock market, as the increased demand for new shares has been met by a corresponding increase in the number of new deposits.

The total number of new deposits issued in November reached 5,000,000,000 francs, the highest level since the beginning of the year. This is an increase of 1,000,000,000 francs over the previous high, set in October.

The increase in new deposits is due to the improved economic situation in France, the increased confidence in the banking system, and the desire of investors to hold their money in a safe and secure manner.
