THE BEST METHODS OF IRRIGATING ALFALFA ARE TOLD BY EXPERT

EXPERIMENTS CONDUCTED IN 1914 RESULTS IN HELPFUL INFORMATION.

Bulletin is issued by the Government, Showing How Frequent Fields Should be Irrigated—Experiment Carried Out at Station on the Project Near Hermiston.

Facts concerning the best method of irrigation of alfalfa as determined by the experiment station near Hermiston have just been made known by the agricultural department.

Frequency of irrigating alfalfa.—In 1914, an experiment was conducted to determine the relative desirability of irrigating alfalfa once a week, once in two weeks, and once in three weeks. The field which was irrigated once a week for 24 weeks received 9.7 acre-feet of water per acre and produced 5.57 tons of hay per acre. The field given 12 bi-weekly irrigations in 24 weeks received 5.3 acre-feet of water per acre and produced 5.39 tons of hay per acre. A third field, which was irrigated 8 times in 24 weeks—once every three weeks—was given 4.4 acre-feet of water per acre and fielded 4.6 tons of hay per acre. Thus it is seen that 24 irrigations produced only 0.27 ton more hay per acre than 12 irrigations. In other words, an increase of only about 500 pounds of hay per acre resulted from 12 additional irrigations and 4.4 acre-feet of additional water per acre. This increase in yield was certainly not sufficient to pay for the extra water and labor necessary in irrigating the field 12 times.

It appears that to irrigate only once in 3 weeks is not frequent enough. The field which was irrigated once in two weeks yielded about a ton per acre more than the field which was irrigated once in 3 weeks. Thus, 12 irrigations during the season produced a ton more hay per acre than 8 irrigations did. The results of this experiment indicate that alfalfa on the sandy soils of the project should be irrigated about every two weeks during the growing season, and that it does not pay to irrigate alfalfa as frequently as once a week.

Specific Requirements.—In order to get satisfactory results in irrigating the sandy soils of the project some special methods are required. According to R. W. Allen, superintendent of the Unasilla experiment farm, the following are particularly important: (1) Irrigation furrows should be short—from 100 to 200 feet in length. (2) These furrows should be from about 20 inches to not more than 30 inches apart, so that the water will quickly moisten the soil between the furrows. (3) The furrows should be fairly shallow, so that the surface soil will be properly wetted at each irrigation; and well opened, so that the water will flow freely. (4) Only a small quantity of water should be applied at each irrigation; where more than 5 inches is applied, large losses are to be allowed to run over the land after the surface is well wetted, as a continued flow results in large percolating losses. (5) Frequent light applications of water give better results than infrequent heavy applications. (6) Comparatively large irrigation streams should be used in order to cover the land as quickly as possible.

A MEDICINE OF MERIT. A proprietary medicine, like everything else that comes before the public, has to prove its merits. The law of the survival of the fittest applies in this field as in others. The reason for the tremendous success of Lydia E. Pinkham's Vegetable Compound is because it has been fulfilling a real human need for forty years, so that today thousands of American women owe their health and happiness to the marvelous power of this famous medicine, made from roots and herbs—nature's remedy for woman's ills.—Adv.

LABEL SUITS BROUGHT AGAINST GERMAN SHIP

BOSTON, April 1.—Three marine libel suits against the interned German liner Kronprinzessin Cecilie, the celebrated "gold ship" which was forced to turn back from Europe when the war opened, with a gold cargo estimated at \$11,000,000, were on trial today before U. S. district Judge Hale. The Guaranty Trust Co. of New York is suing the vessel's owners for failing to deliver \$5,000,000 in gold. Charles W. Hantout of New York and Maurice Hansen of Belgium are suing, respectively, for \$5000 and \$200,000 for inability to land in Europe. Hansen's property was destroyed by the German army.

A woman never meets her ideal man until she has passed the don't worry age.

French Remedy For Stomach Troubles

The leading doctors of France have for years used a prescription of vegetable oils for chronic stomach trouble and constipation that acts like a charm. One does not will convince. Severe cases of years' standing are often greatly benefited within 24 hours. So many people are getting surprising results that we feel all persons suffering from constipation, lower bowel, liver and stomach troubles should try Mayr's Wonderful Remedy. It is sold by leading druggists everywhere with the positive understanding that your money will be refunded without question or quibble if ONE bottle fails to give you absolute satisfaction.

CRUISE OF TIMBER IS MADE IN FORESTS OF OREGON-WASHINGTON

DURING LAST FIELD SEASON AREA OF 115,649 ACRES COVERED IN STATE.

77,010 acres in Washington—Forest Service is carrying on intensive cruising and mapping in localities where Government timber may be in demand.

PORTLAND, Ore., April 6.—According to an announcement made today by the district forester of Portland, the results of the 1914 cruise of timber on the national forests of Washington and Oregon have just been compiled, and show that during the last field season an area of 115,649 acres was covered in Oregon and 77,010 acres in Washington.

It has been the practice of the forest service for some time to carry on intensive cruising and mapping in localities where there was likely to be a demand for government timber. The object of the work is to obtain definite and detailed information regarding the topography and the timber and other resources on each tract examined. During 1914 work was carried on in four different localities in Oregon and two in Washington, the crews doing the work varying in number from four to 15. The most extensive area covered in Oregon was east of Mt. Scott on the Crater forest in southern Oregon, where a crew of ten men covered an area of 51,852 acres. An area of 45,998 acres was cruised in the Breitenbush country on the Santiam forest, Oregon, just west of the Cascade divide. Of the two projects in Washington, that carried on in the neighborhood of Squire creek on the Snoqualmie forest in Snohomish county covered 55,820 acres; while that on the Bogachiel river on the Olympic forest in western Washington covered only 21,190 acres, yet was the most difficult and expensive work of the season.

The cost of the work varied from ten to twenty-seven cents per acre, depending upon the ruggedness, brushiness and inaccessibility of the country. In most of the projects the cost per thousand feet cruised was less than half a cent. On some of the projects, particularly those in heavy timber, west of the Cascades, the cruising and mapping is carried on under severe hardships and handicaps, which make the cost much higher than in the park-like yellow pine forests east of the Cascades. On the Bogachiel project in the Olympic mountains, for example, the cruisers were able to run only a mile or so a day, and as they moved camp, had to build a trail ahead of them in order to get their equipment in.

It is probable that during the coming season another 200,000 acres will be mapped and cruised by the forest service in the two states, since it is part of the plan of the administration of the national forests to take stock of their resources and make a good topographic map of areas hitherto unmapped.

Operator Saves Train.

POTTSVILLE, Pa., April 1.—The action of Joseph Ziegler, a Philadelphia & Reading telegraph operator, saved the morning express, bound north from this city, from being wrecked near a cut at Wetherill junction. A five-ton boulder had rolled down from the mountainside and lodged on the tracks.

After half an hour spent in a vain attempt to pry the huge rock loose and roll it over the embankment, Ziegler, nearly overcome by exhaustion, dragged himself to the telegraph tower and flashed a message to Pottsville just as the train was leaving the Pottsville station.

It's a safe bet that the man who barely escapes being run over by an automobile doesn't call the driver a chauffeur.

JAPANESE NURSES CARING FOR WOUNDED FRENCH SOLDIERS

Here is where the Occident has come to the Orient. These Japanese nurses and surgeons, shown in this photograph are in a French hospital where they have given wonderful

Don't forget that all "RED-FERN CORSETS" are fitted, perfectly on your figure by our Expert Corsetiere, Miss Kiniburgh. She is here to stay, too, so if you have a complaint to make later, you will be taken care of.

Slender—yes, but graceful

You may be genuinely winsome in your slenderness if rightly corsetted. A pretty, slight hip curve made by the corset gives slenderness a pleasing attractiveness.

Redfern Corsets

The new Redfern line has several models that possess the qualifications necessary for shaping appropriately a slender form.

We always advise a fitting, even when duplicating a satisfactory model, for the reason that the slightest variation in the figure calls for an equally slight variation in the corset.

May we serve you in the way to bring the best results?

C. B. Miller to G. M. Jasper, \$6,000; a tract of land, title descriptive.
Mary and John H. Gentry to Barbara A. Sturgill \$550; lots 7 and 8, block 2 in Ireland's addition to Milton.

Chas. W. Records to Melissa E. Messenger \$200; the NW, 1-4 of SW, 1-4 and lot 15 of the SW, 1-4 of Sec. 4, T. 5 N., R. 28 E., W. M., containing \$1.49 acres.

Susan and Thos. Martin to E. F. Pearl, \$1; lots 7, 8, 9, 10, 11 and 12, block 37, in town of Freewater.

J. T. Huston to L. G. Huston \$450; a parcel of land in the city of Ukiah.
Maxwell Land & Irrigation Co. to Geo. W. McCauley \$1; 20 acres land, title descriptive.

Geo. W. McCauley to H. R. Andley \$10; the S, 1-2 of NW, 1-4 of SE, 1-4 of Sec. 25, T. 5 N., R. 28 E., W. M., subject to a mortgage of \$650.
Alfred Schneidert et ux to David A. Peebler \$12,000; all of lot 9, block 5 in the town of Pendleton.

David A. Peebler to Alfred Schneidert, \$30,000; the SE, 1-4 of Sec. 5 and the W, 1-2 and the NE, 1-4 of Sec. 7, T. 5 N., R. 31 E., W. M.

Washington State Wins.
SEATTLE, Wash., April 1.—The girls' debating team of Washington State College defeated the University of Washington girls' team in the Seattle debate of the triangular contest between Washington, Whitman and Washington State Colleges. The judges' decision in favor of the state college was unanimous.

This gives to Washington State College first place in the girls' contest, which won from Whitman Friday night, while Whitman defeated Washington.

"Philippine Independence" was the subject of the debate. Washington State supported the negative.

DRINK HOT TEA FOR A BAD COLD

Get a small package of Hamburg Breast Tea, or as the German folks call it, "Hannburger Brust Thee," at any pharmacy. Take a tablespoonful of the tea, put a cup of boiling water upon it, pour through a sieve and drink a teacup full at any time during the day or before retiring. It is the most effective way to break a cold and cure grip, as it opens the pores of the skin, relieving congestion. Also loosens the bowels, thus driving a cold from the system.

Try it the next time you suffer from a cold or the grip. It is inexpensive and entirely vegetable, therefore safe and harmless.

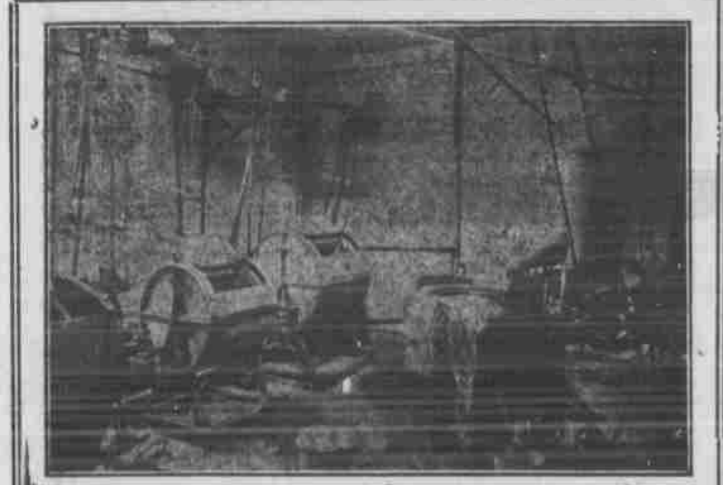

RUB BACKACHE AND LUMBAGO RIGHT OUT

Rub Pain and Stiffness away with a small bottle of old honest St. Jacobs Oil

When your back is sore and lame or lumbago, sciatica or rheumatism has you stiffened up, don't suffer! Get a 25 cent bottle of old, honest "St. Jacobs Oil" at any drug store, pour a little in your hand and rub it right into the pain or ache, and by the time you count fifty, the soreness and lameness is gone.

Don't stay crippled! This soothing, penetrating oil needs to be used only once. It takes the ache and pain right out of your back and ends the misery. It is magical, yet absolutely harmless and doesn't burn the skin.

Nothing else stops lumbago, sciatica and lame back misery so promptly!

Reliable Cleaning and Pressing

We have the best equipped plant in Pendleton for doing this work right. Our big investment and years of experience are our guarantee that we will satisfy you for, to continue receiving your patronage we realize we must give the best service always, and be responsible for all work sent us.

Get the best work possible and always be protected, by sending your cleaning and pressing to

FELL'S

206 1/2 E. Alta St., Phone 160
120 W. Court St., Phone 412.

But nevertheless, the rain has been enjoyed.

Mr. and Mrs. T. A. Lievalen have moved to their ranch for the purpose of completing their spring work.

Mr. and Mrs. G. M. Morrison and children spent the day in Pendleton. Mr. and Mrs. Alexander McKenzie of Walla Walla were in town Friday.

Mrs. Charles Schatz held the spelling contest at the school house Friday afternoon.

Mr. and Mrs. Bert Kirby were guests at the home of Mr. and Mrs. Frank Krebs Wednesday evening.

Mrs. J. W. Spencer and daughter, Beulah, spent Saturday in Athena.

Thomas Coffee, son of Mr. and Mrs. Coffee of this place, was married Thursday morning at 10:30 o'clock. His bride was formerly Miss Lois Bartlett of Milton.

Kyle McDaniels went to Milton Saturday.

BILLY SUNDAY OPENS REVIVALS AT BATERSON

PATERSON, N. J., April 5.—Billy Sunday and his soul-saving brigade arrived here today to open a revival of several weeks. Sunday has been resting at his home at Winona Lake, Indiana, since his recent campaign at Philadelphia. He will stay here six weeks.

DOCTORS SAID HE HAD DROPSY

Some time ago I had an attack of dropsy which finally settled in my kidneys and bladder. I doctored with the doctors and they claimed I had dropsy. I tried other remedies and got no relief from any of them. My condition was such that I was unable to work for about two months and the annoying symptoms caused me a great deal of trouble and pain. I was hardly able to turn over in bed. Seeing one of your Almanacs, I decided to give Dr. Kilmer's Swamp-Root a trial and after taking several bottles I cannot say too much in praise of your Swamp-Root as the results in my case were truly wonderful. Yours very truly,

ROBERT BALLARD, Mansfield, Pa.
Sworn and subscribed before me, this 7th day of May, 1912.
RAY C. LONGBOOTHUM, Notary Public.

Letter to Dr. Kilmer & Co., Binghamton, N. Y.

Prove What Swamp-Root Will Do For You. Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention the Pendleton Daily East Oregonian. Regular fifty-cent and one-dollar size bottles for sale at all drug stores.

HEAD STUFFED FROM CATARRH OR A COLD

Says Cream Applied in Nostrils Opens Air Passages Right Up.

Instant relief—no waiting. Your clogged nostrils open right up; the air passages of your head clear and you can breathe freely. No more yawning, snuffing, blowing, headache, dryness. No struggling for breath at night; your cold or catarrh disappears.

Get a small bottle of Ely's Cream Palm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream in your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's just fine. Don't stay stuffed-up with a cold or nasty catarrh.
