

DR. DARRIN SAYS:

Bad Acting Stomachs and a Disordered Digestive System Can be Made to Act Right.

DON'T BE DISTRESSED.

Constipation, Biliousness, Headache, Indigestion, and Torpid Liver Can be Relieved and Cured.

How many times you hear people say: "I cannot eat this and I cannot eat that—it doesn't agree with me."

Dr. Darrin for many years has made a specialty of treating all diseases of the digestive tract, such as acute and chronic gastritis, catarrh of the stomach and bowels, intestinal colic, appendicitis, diarrhoea, dysentery, constipation, piles, and all rectal troubles.

The doctor gives free consultation and examination to all at his office in the Hotel St. George.

STOMACH TROUBLE CURED. To the Public—When Dr. Darrin was here some years ago, I placed myself under his treatment for an old chronic stomach trouble on which I had spent a great deal of money in trying to cure.

THIS FLY-TRAP WILL HELP REDUCE PESTS DURING THE SUMMER

GOVERNMENT ISSUES BULLETIN DESCRIBING HOW TO FIGHT THE MAGGOT.

Contrivance Will Practically Prevent Breeding of the House-fly—How the Trap is Built is Described So That Every Household May Have One for the Summer.

WASHINGTON, May 14.—(Special.)—A maggot trap which will practically prevent the breeding of the house-fly is described in a new bulletin of the U. S. department of agriculture, No. 296, "A Maggot Trap in Practical Use; An Experiment in House-fly Control."

The principle of the trap is simple, it is easy to construct, and the expense is said to be probably less in the long run than the investment which many farmers now make in screens for their dwellings, and sprays for their livestock.

The successful operation of this trap rests upon several facts connected with the habits of the housefly which have been thoroughly established by observation.

At that time a pronounced tendency to migrate is evident. In consequence if the manure is placed upon a platform with a lattice-work bottom the larvae, while migrating, will fall through the openings into the water in the basin below.

Another difficulty experienced arose from mosquitoes using the water in the basin in the cistern to breed in. This was overcome by cleaning out the basin at regular intervals and by sprinkling a little oil over the surface of the water in the cistern.

Properly constructed, such a trap offers no obstacles to the convenient and economical handling of manure. It is essential, however, that each day's addition to the heap should be sprinkled with sufficient water to keep the manure moist but not enough to cause leaching.

Strength comes from well digested and thoroughly assimilated food. Hood's Sarsaparilla tones the digestive organs, and thus builds up the strength.
