## Now Are the Days Children Need Care

### SUMMER HEAT DANGEROUS TO LITTLE ONES IF BOWELS ARE NEGLECTED.

A mother cannot do better for her child than to train it from early infancy to regular habits, not only as a preventive against much of the illness to which children are more or less subject, but also to insure their health in later life. Normal activity of the bowels is the basis of sound health. This is especially true with children in hot weather. Do not neglect any tendency they may show to constipation, but promptly administer a gentle laxative, that will carry off the congested waste without shocking the system.

An excellent remedy for this purpose is the combination of simple laxative herbs with pepsin known as Dr. Caldwell's Syrup Pepsin and sold in drug stores for only fifty cents a bottle. It does not contain opiates, narcotics, or harmful habit-forming drugs of any description, acts easily and naturally without griping or other discomfort and is positive in its effect.
