Receiver for Pueblo Bank. WASHINGTON, June 30.—Comptroller of the Currency Williams announced the appointment of former Congressman H. H. Seldomridge of Colorado as receiver for the Mercantile National bank of Pueblo, Colo.

BROOD VI OF CICADA FAMILY VISITING OLD FRIENDS ONCE AGAIN

AFTER A WELCOME ABSENCE OF 17 YEARS THE PESTS ARE NOW BACK.

Northern and Central States Become Stamping Grounds of the Locust—He's Been Away Since 1898 and Will Depart This Time Not to Return Till 1932.

WASHINGTON, June 30.—After a welcome absence of 17 years, Brood VI of the cicada is visiting old friends in northern and central states, between the Hudson and Mississippi rivers and the interior counties of Atlantic coast states, as far south as the upper part of Georgia. Brood VI is the well known 17-year locust. He's been away since 1898 and when he departs this time about the beginning of July, he'll not be expected back before 1932. And he won't be missed, for as any farmer can tell you, he's a tarmel nuisance.

The peculiar habit that gives this insect his name causes it to arouse great interest each time it reappears. Also it arouses fear for the safety of trees; but as a matter of fact the actual damage done is slight, accomplished by the female of the species, which is deadlier than the male. The female cuts the mark of the tree to make a deposit for her eggs.

A careful canvass of the whole cicada area was made by the bureau of Entomology with the assistance of the state entomologists in 1898. These reports caused Michigan and Wisconsin to be included in the territory that has reason to expect the visitor each time he comes from wherever he's been for 17 years.

Ordinary repellent substances, such as kerosene emulsion or carbolic acid solutions seem to have very little effect in preventing the depositing of eggs, but recent experiences with Bordeaux mixture or lime wash show them to be fairly effective. The cicada avoid trees sprayed with these preparations, especially if there are other trees in the neighborhood.

The most reliable means of protecting nurseries or young orchards is by collecting the insects in bags or umbrellas from the trees in early morning or late evening, when they are somewhat torpid. Such collections should be undertaken at the first appearance of the cicada and repeated each day.

If pruning is made necessary by the female insect's ravages, the worst affected branches should be removed. The less injured limbs may be coated on the wounded parts with grafting wax or moderately hard soap. These protective coverings should be renewed at least once a year, preferably in the spring, until the wounds are healed over entirely. It may be expedient in the case of a badly wounded recently budded or grafted tree, to cut it back nearly to the bud or graft, so that an entirely new top may be made.

In the case of older trees the main object or treatment is to secure the rapid healing of the wounds and prevent their being used as points for secondary infection by other insects. The worst injured branches in such trees should also be cut out, so that all the vigor of the plant may be directed to the remaining wood. The healing process may be accelerated by thorough cultivation and the use of fertilizers on the land about the trees attacked.

Prairie dogs, jack rabbits, ground squirrels, and crawfish are now grouped together under the head of "undesirable citizens" and extensive campaigns for their speedy extermination in many parts of the country have been made by the bureau of biological survey of the department of agriculture.

War was declared on the prairie dogs after they had made themselves obnoxious by interfering with the projects of the reclamation service in the west. The burrowing rodents have caused extensive washouts in dikes and fills, resulting in heavy damages in the Strawberry Valley project of the reclamation service near Provo, Utah. The campaign against them has already resulted in their complete extermination over large forest areas in Colorado, Arizona and Utah. Most of them were killed by poison, and predatory birds and animals exterminated those remaining.

In Oregon and Washington, investigations are being made with a view of dealing with moles which have been interfering seriously with the cultivation of crops.

As a result of campaigns against the ground squirrels in portions of California national forests, ranchmen and land owners have been encouraged to cooperate with the bureau and also to carry on independent campaigns. As a consequence, on thousands of acres which once supported squirrels in abundance, it is now difficult to find more than an occasional animal. Similarly, successful poison baits were prepared for the Richardson ground squirrel, which has become extremely destructive in North Dakota.

Other experiments have dealt with the extermination of rodents which hinder reforestation by digging up and devouring seeds or gnawing the bark of saplings. Special experiments were conducted in the national forest near Ocala, Florida, and at the Converse nursery in Southern California. In response to requests for aid from farmers in southern Idaho and eastern Oregon and Washington, the department has assisted in destroying jack rabbits which have been doing heavy damage. In one small region, by the use of extermination baits, over 50,000 rabbits were destroyed. Experiments also have been conducted in destroying crawfish, which do great damage in Mississippi and Alabama.

SPORTS

Ingle Arrives Here for Bout With Anderson

Accompanied by his trainers, William Erb and J. Sullivan, George Ingle, Seattle lightweight, arrived in Pendleton last night to finish his training for his bout with Buddy Anderson at the Oregon theater on Monday evening, July 5. Ingle declares he is physically fit now to enter the ring for 20 rounds, having been training hard for three weeks. However, he is not loafing on the job but was up at 5 o'clock this morning and took a seven mile jaunt out the Wild Horse road.

Ingle is down to the required weight now so will not have to weaken himself to cut off pounds. He will work out every afternoon through Sunday in the Commercial gymnasium from 2 until 3 o'clock and Anderson will follow immediately afterwards. Fans are invited to watch them.

Ingle expects to win from Anderson Monday. He has been cleaning up all of the lightweights around Seattle in short bouts and figures he can outlast the Vancouver boy. Anderson however, has been training hard and expects to make this bout the beginning of his comeback.

Penland Leads Twilighters in Hitting Column

Will Penland of the Baptist team, was the leading hitter of the Twilight league, getting four hits in eight times at bat for an average of .500. Geraunt of the Methodists was second, his record being eight hits in 19 times up for an average of .421. Hal Corby of the Presbyterians, was third with .419 and the following other players hit for high averages: Chryst, .389; Hinderman, Friedley and Freeman .375 each, Thompson .343, Snyder, B. Ulrich, Boyden, Evans, Clarence Penland, Bowers, Milne and Wells .333 each, Buchanan and H. Morris .308, Hayes and Mason .300. Siebert hit for 1.000 but was only up once. The Christians had a team batting average of .285, the Methodists .276, the Presbyterians .262 and the Baptists .250. Richardson and Huey were the only two players having a perfect fielding average. The Christians led in fielding as in batting as a team, their average being .857. The champion Methodists were second with .842, the Presbyterians third with .778 and the Baptists were last with .753. The averages are not complete for

GITANO HEIGHT IN SAN MARINO AND RULERS

San Marino, the smallest republic in the world and the oldest state in Europe, with an area of only thirty-eight square miles and a population of about 11,000, recently flashed into the limelight by declaring war against Germany and Austro-Hungary. Curiously enough the oldest document which defines the status of this tiny republic is a declaration of war which San Marino made against what was then the Germans. In the eighth century she declared war on Charlemagne. It is said that Charlemagne died before the news of San Marino's defiance reached him. San Marino lies about twenty-five miles south of Ravenna and sixteen miles from the Adriatic. It is distinguished by four rocky peaks, all fortified. According to tradition it was founded by Saint Marinus and a band of Christians fleeing from the persecutions of Emperor Diocletian about the year 300. San Marino is governed by a general assembly of sixty members from which two regents are elected to exercise executive power. The republic has an army of thirty-nine officers and 950 men.

\$1,635,000 Hidden In This Year's Goodyear Tires

Here are amazing facts: Goodyear Fortified Tires contain five costly features found in no other tire. They have other features not common. If we omitted those features, this year's probable output would cost us \$1,635,000 less. We could add that much to our profits. And you would never know it until troubles came.

This year's improvements alone will cost us \$500,000 yearly. Most of this goes into extra rubber—all into extra tread. And we shall spend \$100,000 this year to find other betterments still.

"TIZ" FOR SORE, TIRED FEET--AH!

"TIZ" IS GRAND FOR ACHING, SWOLLEN, SWEATY, CALLOUSED FEET OR CORNS.

Ah! what relief. No more tired feet; no more burning feet; no more swollen, bad smelling, sweaty feet. No more soreness in corns, callouses, bunions.

No matter what ails your feet or what under the sun you've tried without getting relief, just use "TIZ." "TIZ" is the only remedy that draws out all the poisonous exudations which puff up the feet. "TIZ" cures your foot trouble so you'll never limp or draw up your face in pain. Your shoes won't seem tight and your feet will never, never hurt or get sore and swollen. Think of it, no more foot misery, no more agony from corns, callouses or bunions. Get a 25 cent box at any drug store or department store and get instant relief. Wear smaller shoes. Just once try "TIZ." Get a whole year's foot comfort for only 25 cents. Think of it.

Chafing and Percolating by electricity offers the greatest convenience and economy imaginable. You really don't know what a saving in time and trouble it will effect in your daily routine if you have this equipment. They are always ready to perform emergency service. We carry them in great variety and at low prices. J. L. VAUGHAN,

When you buy a watch, you don't merely say, I want a Watch. You want to be safeguarded by a name that stands for reliability—standard quality.

The same method will protect you against inferior quality in Tents.

WILLAMETTE TENTS

represent the best materials, most skilled workmanship and highest all-around quality. For 31 years we have upheld the standard of tent-making.

Go to your dealer and tell him you want a genuine "Willamette" Tent. Be sure the "Willamette" trade mark is on it. It means the same guarantee of Tent QUALITY, as 18-karat means on a gold watch.

The leading dealers in town sell "Willamette" Tents.
