Acroplane Makes Record

BUFFALO, N. Y., Aug. 26.—Under the eyes of Lieutenant Mellwin, of the United States flying corps and three members of the British royal flying corps, aeroplane records were smashed here a few days ago by the latest model of the Curtis machine. The tests disclosed that the plane is capable of carrying two men and 900 pounds of explosive. With 1200 pounds aboard it sped at 85 miles an hour and broke the world's altitude record. The new machine is 160-horsepower tractor, designed especially for bomb throwing. It is the result of experiments conducted for months to meet the demand of the British government.

PURE, RICH BLOOD MADE BY HOOD'S

Pure blood enables the stomach, liver and other digestive organs to do their work properly. Without it they are sluggish, there is loss of appetite, sometimes faintness, a deranged state of the intestines, and, in general, all the symptoms of dyspepsia. Hood's Sarsaparilla makes pure blood, and this is why it is so very successful in the treatment of so many ailments. Get it today.

Vacation
In Portland, with side trips outside, will give you an enjoyable vacation. Make the Multnomah your headquarters. Service better, rates consistently lower.
50 rooms per day, \$1.00
100 rooms with bath, per day 1.50
150 rooms with bath, per day 2.00
200 large outside rooms, bath, per day 2.50
Evening persons in room, additional 1.00

The British officers who took part are Flight Commander Busted and Lieutenants Prentiss and Jenkins. They represent the British government at the Curtis plant. With Pilot Ray V. Morris and Commander Busted and 900 pounds dead weight, the new machine rose 800 feet. Carrying Morris, Busted and Lieutenant Prentiss it went 8200 feet, with an additional 800 pounds aboard. The previous record with passengers was made by Stephen McGordon last June, who attained 5517 feet. Only three men were aboard McGordon's machine. The tests were conducted on the outskirts of Buffalo and pronounced satisfactory. The Curtis officials will not say how big an order they have for these new machines.

Electric Lights on Baby Buggy.
CLEVELAND, Aug. 25.—When Robert Sheldon Mathews, Jr., 2, goes for an airing at night he rides in what is probably the only electrically lighted baby carriage in the world. In the top of the canopy is an eight-candle power electric light. A red and green light are on either side of the footpiece and in the center is a brilliant stream of light. Baby Robert never enjoyed riding in the dark. His cries disturbed his fond parents. So Robert's father conceived the idea of wiring the perambulator.

Own Progeny Spurned.
ATLANTIC CITY, Aug. 26.—Arrested before Recorder Gaskill on the charge of neglecting her two little children and given the alternative of caring for them or going to jail, Mrs. Mamie Bader scornfully declared that she would accept the jail sentence. When her year-old child was held up to her by a little niece she pushed the child away and then accompanied an officer back to her cell. Recorder Gaskill, unwilling to send the woman to jail without giving her every opportunity of complying with the order, withheld sentence. The woman was deserted by her husband some time ago and since then, the police charge, has become addicted to safe life.

Tree Felled With Boy.
BAKER, Ore., Aug. 25.—Louis E. Rogers defied Claude Bowman to chop down a tree limb while he nestled up amongst the leaves. Bowman chopped it down. Now Rogers is wearing many bandages at his home at 2224 Seventh street. They were attending the annual union carpenters' picnic at Spring Creek, and Rogers in boyish glee climbed the tree until he found a safe place in the branches 20 feet from the ground. Then he called to those be-

low to cut the tree. Rogers thought Bowman was using the butt of the ax against the tree, and made no effort to come down until the tree fell. He was underneath the big stick when it crashed to the ground.

City Attorney Resigns.
ROSEBURG, Ore., Aug. 26.—Asserting that the members of the city council had treated him unfairly when they refused to consider a plan for partial settlement of his claim, Attorney Abraham tendered his resignation. He said he would seek redress in the courts. At a previous session of the council, Mr. Abraham presented a bill of \$500 for services rendered in defending the city in the case brought against it by local persons opposed to the railroad bond issue. The council considered the bill excessive and it referred to a special committee for investigation.

Pledge President Support.
BOSTON, Aug. 26.—President Wilson was assured of the united support of 24 state executives in any action he may make in the present crisis in a resolution adopted by the governors' conference this afternoon.

Chalky soils yield peas, turnips, barley, clover and wheat.

VOICES

Miss Doris Reber, talented young vocalist who has been in Chicago studying music, has decided to return to Pendleton for Round-up week and yesterday telegraphed her parents, Dr. and Mrs. D. N. Reber, that she would arrive in Pendleton on September tenth.

Mrs. Alice Butler, head of the department of domestic arts at the high school, is expected to arrive in Pendleton within the next few days. She has been spending most of the summer in the O. A. C. room of the Oregon building at the Panama-Pacific exposition.

Mrs. Leon Cohen and Mrs. Omer E. Smith motored to Walla Walla and returned yesterday.

Mrs. Frank B. Hayes and little son, Burke, arrived home on the early morning train from Portland where they had been for two weeks as guests of Mrs. Oliver P. Murton.

Miss Mildred Berkeley and Misses Edith and Claire Raley went over to Walla Walla this morning to spend the day.

Mr. and Mrs. Fred Wheeler, who have been visiting at the home of Mr. Wheeler's brother, Carl S. Wheeler, left this morning for their home in Iowa.

Mrs. Chester F. Miller of Dayton, Wash., is in the city visiting at the home of Mr. and Mrs. J. E. Mullins on Monroe street.

CRATER LAKE WILL BE MADE BIG PLAYGROUND

PORTLAND, Ore., Aug. 26.—Crater Lake, hidden away in the southern Oregon mountains, is to be dragged from its seclusion and exploited to the world as one of America's greatest play-spots. Stephen Mather of California, assistant to Secretary of the Interior Lane, in charge of the bureau of national parks, has just seen it. He was impressed. He will seek to have the wonders of this lake appreciated as much by all the people.

Mr. Mather flitted through Portland on a tour of the national parks. From here he started for Rainier national park, and afterward will visit Glacier National park. All of these have received attention from the interior department, as well as from the railroads. Now Mr. Mather has seen Crater lake and has declared open admiration for it and wondered why it has not been so extensively exploited and developed as the others.

Mr. Mather was escorted through the park by Superintendent Will G. Steel and by E. O. McCormick, vice president of the Southern Pacific company in charge of traffic. Mr. McCormick accompanied him north and went with him to Tacoma.

Not Exactly Prudent

ST. PAUL, Minn., Aug. 26.—With the jealousy between Minneapolis and St. Paul at a red heat because Minneapolis was occupying second place, and St. Paul first place, in the American association baseball standing, William F. Buckley stood at a street corner in St. Paul, praising the Minneapolis team. St. Paul police took him to Central station, "for safe keeping."

Events in the War One Year Ago Today

- Hard fighting at Lille. Decided city has fallen. Declared to make Paris perfectly entrenched camp.
- French offensive movement between Vosges and Nancy continues fifth day. Losses of Germans reported very heavy.
- German attacks on Meuse repulsed with great vigor by the French but attack by British on superior force fails.
- Russian forces in field reported to be 8,000,000 and attack on Berlin believed possible.
- German steamship, William der Grosse sunk by British cruiser High Flyer.
- Austria announces victory over Russians near Krasnik after three days' battle, five Russian corps spread over fifty miles being defeated and compelled to flee toward Lublin.

PRESERVING POWDERS FOR KEEPING FRUITS USUALLY DANGEROUS

HOUSEWIVES ARE WARNED AGAINST USE BY AGRICULTURE DEPARTMENT

Contain Salicylic Acid Which is Well Known as Poisonous Substance and Which Frequently Leads to Derangement of the Digestion—No Excuse for Running Risks.

WASHINGTON, Aug. 25.—With the season of preserving and canning fruit at hand, many housewives who like to put up their own fruit are urged to use some preserving or coloring compound. The argument is that this makes the work much easier and insures the keeping quality of the food. As it happens, the principal ingredient in many of these powders is salicylic acid, which is well known as a poisonous substance.

In cases of acute articular rheumatism and certain other diseases salicylic acid is useful as a medicine when properly administered but may be a dangerous ingredient in food. Other powders and preserving compounds contain boric acid and are frequently sold under fanciful names at prices much in advance of their real value. The worst feature about these powders is that, while they may prevent the decay of the fruit or vegetable, they also encourage uncleanly or careless work. In addition if they are eaten with food in excessive quantities they may very well have a bad effect upon the health. The housewife who takes pride in her work will realize that heat, sugar and clean, clean, clean, that she needs to put up excellent fruits and vegetables that will keep perfectly. Therefore, there is no excuse for running any risk by using preserving powders. The department of agriculture has issued many bulletins and pamphlets showing how to put up fruits and vegetables and these it will be glad to supply without cost.

Spray Celery Carefully

In order to get celery in proper condition to market, it is necessary for the grower at certain times to spray the plants with Bordeaux mixture to prevent the destruction of the crop by blight. This mixture contains copper sulphate and if it is used carelessly in spraying the celery will be injured. The stalks and the plants or run down between the stalks and leave copper sulphate on the stalks used for eating. This deposit of copper may be so large as to be injurious to health and the food and drug regulations are very strict about the use of salts of copper in foods. It, therefore, behooves growers to spray their celery in such a way that the mixture will go on as a fine spray or mist rather than in streams. This excessive application of copper sulphate does not occur with efficient apparatus working under high pressure—150 pounds or more. Spraying, even with such apparatus, should be stopped however, as soon as the leaves are thoroughly covered with the mist or fog. The leaves of celery should not be eaten under any circumstances and deposits of copper on them can be disregarded. At any rate, the housewife, before serving celery, should break up the bunches and thoroughly scrub the stalks. This will remove practically all of the copper that may be deposited by the Bordeaux mixture spray and will eliminate danger of bad effects to the consumer.

Produce Infertile Eggs

Farmers are being urged by the poultry specialists of the department of agriculture and also by the various state agricultural colleges to produce infertile eggs by removing roosters from the flocks of hens as soon as the eggs for hatching have been secured. This suggestion also might well be followed by amateurs or others who raise poultry on a small scale to supply their own household with eggs. It is particularly useful for owners of small chicken yards who follow the practice of putting down eggs in water glass for winter consumption. The chief reason for producing infertile eggs is the fact that an infertile egg keeps good very much longer than one which has in it a germ fertilized by the male bird. It is estimated that one-third of the loss in eggs in this country, which amounts annually to millions of dollars, is due to the fact that the eggs have been fertilized. In the case of a fertile

The Centaur Company, *Chas. H. Fletcher* Pres.

egg, very little heat will start the germ to develop much as it begins to hatch out under the hen. In uneven summer heat the germ may start to hatch and then when the temperature falls may die, and this makes the red spot or blood ring in an egg. If a fertile egg is kept at 103 degrees Fahrenheit, at the end of 24 hours the germ will begin to develop, and after three days the blood vessels of the embryo chick will be clearly distinguished in the yolk. On the other hand, an infertile egg under the same temperature will show merely slight change and continue to be good food. At the same time, any egg, fertile or infertile, should be kept as cool as possible as heat will cause any perishable food to deteriorate rapidly. Removing the rooster from the flock has no effect whatever on the laying habits of the hens, although there is still a popular belief that a rooster is an essential in the flock. The department has suggested the following rules for handling eggs on the farm and these can be followed profitably by any egg raiser.

1. Keep the nests clean; provide one nest for four hens
2. Gather the eggs twice daily.
3. Keep the eggs in a cool, dry room or cellar.
4. Market the eggs at least twice a week.
5. Sell, kill or confine all male birds as soon as the hatching season is over.

Russia Fleets Uprisings.
NEW YORK, Aug. 25.—Government officials at Petrograd are in daily fear of revolutionary uprisings, according to American Vice Consul Zimmerman at Rostov, Russia, who arrived here from Copenhagen on the steamer Hellig Olav. Zimmerman stated that inflammatory posters denouncing the government and advocating revolution have appeared broadcast in the Russian capital.

WOMAN WANTS TO HELP OTHERS

By Telling How Lydia E. Pinkham's Vegetable Compound Restored Her Health.

Miami, Okla.—"I had a female trouble and weakness that annoyed me continually. I tried doctors and all kinds of medicine for several years but was not cured until I took Lydia E. Pinkham's Vegetable Compound. I hope my testimonial will help other suffering women to try your wonderful medicine."—Mrs. M. R. MILLER, Box 234, Commerce, Okla.

Another Woman who has Found Health in Lydia E. Pinkham's Vegetable Compound.

Lindsborg, Kansas.—"Some years ago I suffered with terrible pains in my side which I thought were inflammation, also with a bearing down pain, backache, and I was at times awfully nervous. I took three bottles of Lydia E. Pinkham's Vegetable Compound and am now enjoying good health. I will be glad to recommend your medicine to any woman suffering with female trouble and you may publish this letter."—Mrs. A. L. SMITH, R. No. 3, Box 60, Lindsborg, Kansas.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

VESSEL PASSES SAFELY THROUGH WAR-ZONE

The Red Star liner Lapland has reached Liverpool after running safely through the war zone. It was rumored that the vessel had met the same fate as the Arable but these reports were proven untrue when the ship reached port without a scratch. It is believed, however, the Lapland had been marked for destruction.

DESPITE HIS CRIES MAN SHOT FOR BEAR

REDDING, Cal., Aug. 26.—Despite the fact that he yelled loudly, insisting that he was not a bear, four companions of D. K. Eddy of Kennett, took eight shots at him while on a hunting expedition and one of them finally clipped him in the leg. Eddy was in a dense patch of brush and the four hunters, 150 yards away, were sure he was a bear. After being carried four miles on a stretcher by his companions, it was said Eddy would recover. His leg was broken above the knee by the last bullet fired at him. The members of the hunting party were Modesto Montaldeo, Vernon Crossen, Andy Shields and Ben Wilson, all of Kennett. It is not known whose bullet hit Eddy, but each man fired twice.

U. S. Gunboats to Haiti.

WASHINGTON, Aug. 26.—The gunboats Sacramento and Marieta were ordered to Haiti by the navy department, upon the suggestion of Rear Admiral Caperton that there might be a fresh native outbreak there.

Cut This Out—It Is Worth Money

Cut out this advertisement, enclose 5 cents to Foley & Co., 2335 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing:
