WOMEN MAY BE STRONG and enjoy life whether in the home or business world if they can keep at bay those ailments peculiar to their sex.

If every woman realized how Lydia E. Pinkham's Vegetable Compound, that simple remedy made from roots and herbs, goes to the root of the trouble and overcomes such symptoms as backache, headaches, nervousness, and irritability, they would be healthier, happier and stronger.

If you suffer from any form of female ills why don't you try it. It will pay you to do so.—Adv.

WHO PAYS THE WAR BILLS?

Money makes the mare go, and it takes money likewise to make the war go. The allies are negotiating for added hundreds of millions, while Germany proudly reports "the largest financial operation in the world's history," a borrowing of 12 billion marks.

Governments borrow, but people pay. The burden is on the backs of toiling men, women and children. When a loan is subscribed at home the people supply the money direct, and shoulder taxes to repay themselves.

Whether the government borrows abroad or at home the money must be wrung from the people's pockets. War mortgages the industry and labor of a people and the fruits of their toil as well as their toll, time, energies, life.

The pay for the wars their governments make not only with hardship but with enslavement. Deprivation and starvation are part of the price of war the innocents must pay.

Bankruptcy, loss of a people's savings, destruction of industrial capital, waste of utilities, devastation, are measured in human soil and in human suffering.

Governments borrow lightly, and people pay heavily. What benefits are the people themselves, who are paying for this war, going to receive from their investment? They are all stupidly paying and "going it blind."

Wars involve contests between peoples as to who shall pay the more. Thus the victors may be the greater losers.—St. Louis Post-Dispatch.

COW TESTING ASSOCIATION IS FORMED IN VINCENT DISTRICT

VINCENT, Freewater, Ore., Oct. 5.—One of the first cow testing associations in eastern Oregon, and the second one in the state was organized last week by farmers in this section of Umatilla county, and the adjoining territory in Walla Walla county, Washington.

The following officers were elected for the ensuing year. Bert Coyle, president; R. E. Bean, vice president; J. O. Russell, secretary; Verna Brown, treasurer; with the following board of directors: R. H. Wellman, Lou Hodgen, W. H. Phillipi, Bert Coyle, J. O. Russell, Verna Brown and R. E. Bean. The members of the board of directors will

meat early this week when arrangements will be made to secure a first class tester, secure necessary outfit, etc. It is planned to start this work about November 1st.

There have been more than 500 cows entered in the association, being divided among 30 dairy ranchers, the tester visits each ranch once each month, tests each cow for butter fat, and figures cost of feed. By doing this the poor cows can be eliminated and the standard of each herd improved.

This is a pronounced step for progressive dairying in this section of Oregon and Washington, and while there are many such organizations in the eastern dairy states, the west has been slow in falling in line.

Strong, professor at Harvard University, who has been directing the anti-typhus campaign of the American Red Cross sanitary commission in Serbia during the last six months returned on the steamer Duca de Gili Abruzzi and declared that the Serbian army is free from typhus and is in as good physical condition as any army in the world.

He said the total number of deaths from typhus in Serbia had been between 30,000 and 150,000.

Shortly before he sailed, Dr. Strong was decorated with the order of San Sava by the Serbian government.

Bigger Militia Favored.

WASHINGTON, Oct. 5.—At the opening session of the conference on national defense here, Colonel J. Palmer, past commander-in-chief of the Grand Army of the Republic, urged as a means of preparedness an increase in the militia, which, he said, could be attained by offering proper compensation for services as an inducement to young men.

He also urged building of "coast defenses that will look dangerous whether they are or not," and said that his idea of preparedness was based on the motto, "Trust in God and keep the powder dry."

Rattlesnake Trade Hurt.

BROWNSVILLE, Tex., Oct. 5.—Mexican bandit outrages have put a sudden stop in this section to the somewhat extensive business of rattlesnake catching.

Large-sized rattlers abound in the brush along the border and curriers sold them to shows and parks all over the country. Mexicans ordinarily do the snake catching but since the Mexican outrages have investor the brush the snake catchers will not venture into the brush for fear of being shot as bandits.
