AGED WOMEN IS KILLED IN FALL FROM AN AEROPLANE

SAN DIEGO, Dec. 16.—Mrs. T. A. Comstock, 76, was killed and Aviator G. S. T. Meyerhoffer was painfully injured when a wing of their aeroplane collapsed and precipitated them from a height of 100 feet into the bay. A

hunch was rushed from the warship Oregon. Both were taken aboard where efforts to save the woman's life were futile. She was the oldest woman to ever make an air flight here.

HOOD RIVER, Ore., Dec. 16.—The controversy between the City of Hood River Library commission and the county court that has been pending in the circuit court for several months on account of the refusal of the county court to pay Miss Nory's salary, came to a close when John Baker, attorney for Hood River county, filed a motion, which was allowed, withdrawing the county's answer to the complaint from the files and expunging it from the records.

REDFIELD HAS PLAN.
(Continued from page one.)
The competition we now forbid. It seems possible that by using the existing machinery of the treasury department and the department of justice we may restrain this foreign "unfair competition" on both sides of the sea. I recommend, therefore, that such legislation be enacted as will give to the foreign representative lives of the above named departments such added powers and increased personnel as they may need for this purpose, and that it be enacted in "unfair competition" or under circumstances which tend to create a monopoly in behalf of the foreign producer in American markets shall be forfeited. I also recommend that legislation supplemental to the Clayton anti-trust act be enacted which shall make it unlawful to sell or purchase articles of foreign origin or manufacture where the prices to be paid are materially below the current rates for such articles in the country of production or from which shipment is made, in case such prices substantially lessen competition on the part of the American producers or tend to create a monopoly in American markets in favor of the foreign producer, and that it be made unlawful for any person to buy, sell or contract for the sale of articles of foreign origin, or to fix a price for same or to make a rebate upon such price, conditioned upon the purchase thereof not using or dealing in wares produced or sold by the competitors of the manufacturer or seller, where the effect is to substantially lessen competition in the production in the United States of such articles, or tends to create a monopoly in the sale of such articles in American markets in favor of a foreign producer.

COOPERATION IN FOREIGN TRADE.
I deem it of special importance that business concerns should be allowed to cooperate in foreign trade. The present law plays into the hands of the larger concerns and shuts out small ones from important markets. It may be said that small manufacturers could not in any case successfully enter the foreign field. This, however, ignores the fact that in many lines and specialties there are producers of moderate size abundantly able to compete as regards the cost and character of their products but unable to assume alone the considerable expenditure over a continued period that would be required to obtain a firm foothold in foreign markets for their somewhat limited

products. Such a concern ought to be permitted to cooperate with another in similar or different lines in order to share the expense of introducing their goods abroad. There are lines of industry classified under one head in which the individual concerns may each make separate specialties through their general products are in common. Provision should be made due safeguards against monopoly, whereby such concerns may, with due safeguards against monopoly, cooperate in the foreign field. To refuse this for any fancied fear of monopoly is to say that the large concerns shall alone hold the lucrative foreign markets and that the far larger number of smaller houses with their many employes shall be shut out from them. Such a policy can commend itself to no one. The whole matter should be placed under the supervision of the Federal Trade Commission and should be subject to full publicity. Either of these safeguards should be sufficient; both of them will certainly be so. It is, of course, not intended that this cooperation shall extend into the domestic field. It is necessary that it shall exist as regards the foreign field as it is important that it should not go to excess in the domestic one. One should be done; the other avoided. Under the supervision of the Federal Trade Commission the necessary good can be accomplished and the unnecessary evil can be prevented.

Cooperation in Establishing Banks Abroad.

It is important that our banks should be permitted to cooperate, subject to the supervision of the federal reserve board, in establishing foreign branches or in owning stocks of banks operating in foreign countries. The present law operates to make it possible only for large banks of great power to undertake the important work of financing American commerce in foreign fields. In other words, the law works in sole favor of the great banks. Great credit is due those American bankers who have taken the first forward steps in establishing foreign branches. They are true pioneers of American commerce abroad. The work, however, is of such national importance that it should not be confined to any one or any few large institutions. It is not for their permanent good that it should be so confined. The country requires not one or a few, but numerous American-owned banks abroad. There are many banks in the United States of less than major size, yet abundantly strong. These should be permitted, under proper safeguards, to act jointly in such

WHY FAMOUS PASTRY COOKS USE KC BAKING POWDER

The patrons of our first class hotels and restaurants are exacting—they demand the best. Women go where the pastry and cakes are noted for their excellence. Men are attracted by hot bread and biscuits—when fresh and moist and light.

The pastry cook with a reputation uses K C Baking Powder because he knows that results are certain; every time everything is as good as his best.

Then, too, with K C Baking Powder he can mix the various kinds of batter before the rush of the meal begins and bake as needed so that every order goes to the table fresh and hot, yet the last he bakes are just as good as the first.

The reasons behind these reasons is that K C is really a blend of two baking powders. One commences to give off leavening gas as soon as moistened. The other requires both moisture and heat to make it active. Dough or batter will remain in a partially leavened condition for hours, and when put in the oven, will come up as light as if mixed a moment before.

For cookies, pancakes, doughnuts and the like, which cannot all be baked at once, K C is indispensable. For all baking the doubleraise makes doubly certain.

Follow the example of the professional cook and your baking will be equal to his.

COOKING WITH ELECTRICITY

Cooking with Electricity is the very latest and best way.

It makes no dirt and has no odor.

It is very cheap and so much handier.

Then we have the cook stove which has an oven that can be regulated.

Then we have the plate and chaffing dish. So many people use Electricity to prepare quick meals.

Also other dishes which can be prepared at the table and can be kept hot.

It will only be a short time until we use Electrical cooking altogether.
