2 NEW SCHOOLS MAY BE ADDED TO U. OF O. BY THE REGENTS

NORTH PACIFIC COLLEGE OF DENTISTRY PETITIONS FOR AFFILIATION.

Other is School of Optometry for Which Need is Seen—University Now Has Seven Professional Schools—\$40,000 Building Authorized at Meeting.

UNIVERSITY OF OREGON, Eugene, Jan. 21.—Still further development of the State University's rapid expansion in professional education may come next June when additions of two schools will be acted upon by the board of regents. One is a school of optometry, for which the optometrists of the state have petitioned. The other is the North Pacific College of Dentistry, at Portland, which has petitioned for affiliation.

The creation of a school of optometry and the admission of the North Pacific Dental College were put up to the board of regents at its meeting Tuesday. The board elevated the department of journalism into a school and the department of architecture into a school. This gives the state university the following professional schools at this time: Journalism, medicine, law, education, commerce, architecture and music. Professor Eric W. Allen, head of the department of journalism, thus became a dean, as did Professor Ellis F. Lawrence, head of the department of architecture.

The regents also created the University's extension and correspondence study work into a school with Dr. Joseph Schaefer as dean.

A new idea in education was presented by President P. L. Campbell to the regents Tuesday. It is an idea that for the present is perhaps original with Oregon. President Campbell in his report expressed it this way:

"The last generation saw the democratization of public school education. This generation is seeing the democratization of high school education; for example, in Portland 65 per cent and in Eugene 91 per cent of last year's eighth grade graduates entered high schools. The next generation will see the democratization of university education.

"Such democratization is to be sought fully as vigorously as the democratization of elementary education. The modern university aims to make effective workers as well as clear thinkers of its students. The old ideal of university education for a few picked leaders has given place to the broader conception of higher education made universal."

President Campbell then explains that the University faculty plans dur-

ing the coming year to inaugurate a much more inexpensive living for State University students. It is hoped that the present average cost of a year at the University may be nearly cut in two for those for whom strict economy is necessary. The regents authorized a \$40,000 building to house the school of education, the work of which has trebled during the last two or three years. The students trained in this school of education are now doing work in nearly every standard high school of the state. The graduating class of 1916 will show an increase of 25 per cent over that of last year. The credit of a professorship of Spanish and of new positions in education, architecture, law, commercial and industrial service, commerce, sociology, printing, rhetoric, public speaking and music were recommended and will be up for final action in June. Only three salaries were increased. The regents approved the plan of an all-Oregon historical pageant to be given in commencement week in June.

WILL PLAY ROLE OF HERA

NEW YORK, Jan. 21.—Preparations for the gorgeous "Ball of the Gods," which is to be held at the Hotel Astor on the evening of February 11, 1916, under the auspices of the Society of Beaux Arts Architects, are rapidly progressing and very great interest taken by a large number of prominent people in the artistic and social world. The invitations are now out and it is expected that this would be even more beautiful than the wonderful Venetian Fete held two years ago. A large number of prominent architects, painters and sculptors, are in charge of all the arrangements for the pageant and act as patronesses. The cast of characters is now being fitted. Mrs. John Jacob Astor will be Hera, Mrs. Alexander D. Pratt will be the Goddess Isis, The JOURNAL will represent an abandoned temple on the island of Cyprus, to which the Sibyl will summon by incantation, in their turn the Gods of EGYPT, Hindustan and finally Greece. As the Egyptian gods disappear the great Triad of Brahma, will appear, and before them will be played an episode from the Ramayana. Then the Spirits of the Night will wait the Hindu Gods from the stage, and heralded by Aurora, the blue Muses will then appear escorting Apollo, the 12 Olympian gods will follow, each one escorted by its attributes and vestments. The personifications of Hera, the huntresses of Artemis, the sea nymphs of Poseidon and all the long list of Pagan mythology.
