## PNEUMONIA CLAIMS 10 PER CENT OF DEATHS

DISEASE IS DISTINCTLY A COLD WEATHER INFECTION IN THIS COUNTRY.

(Issued by United States Public Health Service.)

Ten per cent of the deaths in the United States result from pneumonia. It is estimated that during the past 30 days this rate has been doubled in some sections. Tuberculosis and heart disease, each causing one-ninth of all fatalities, are the only diseases which outrank pneumonia among the legion of the men of death, but in certain cities pneumonia is steadily increasing and even has surpassed the mortality from tuberculosis. Seventy per cent of all cases occur between December and May. It is distinctly a cold weather infection, seemingly brought by winter blasts, but especially prevalent during the winter season only because its victims are rendered more susceptible at that time by exposure, debilitating influences and the presence of predisposing infections.

Pneumonia principally affects those at the extremes of life, but no age is exempt. It is invariably a germ disease. The predisposing and exciting organisms are so numerous that it would be futile to attempt their enumeration. Many of them are constantly present in the mouths and throats of healthy persons and it is only through the aid which they unwittingly extend to them that they are transformed from harmless organisms to one of man's most powerful enemies.

The presence of other diseases is the great predisposing cause of pneumonia. They prepare the soil for invasion. Holding first rank in this category is influenza. The increased incidence of pneumonias at this time being largely due to the present epidemic of influenza. Individuals suffering from this infection are peculiarly susceptible to respiratory complications and should properly observe every hygienic rule. Inflammation of the upper air passages, pharyngitis, bronchitis and tonsillitis, often predispose to the development of the disease, particularly among the aged and infirm. The acute contagiousness of childhood, more especially measles and whooping cough, frequently prepare the way for pneumonia. Anyone who through neglect or carelessness permits the spread of these infections is therefore open to the severest condemnation. Exhausting diseases of whatever nature, is often sufficient to so reduce our resistance that we are unable to cope with organisms which should be easily overcome, and hence predispose to the infection.

Debility, either temporary or chronic, developing from any cause, increases susceptibility. Because of this the disease most often attacks those at the extremes of life. Among debilitating influences must be mentioned cold, exposure to penetrating winds, and the chilling of body surfaces as a result of wetting.

The combination of lack of food and fatigue proves particularly disastrous during the winter season and is a bad condition to be avoided whenever possible. Bad housing, mental or physical harassment, and overwork are alike the advance agents of the infection. Overcrowding, in street cars, theaters, and other public places, is unquestionably in part responsible for the spread of pneumonia in cities, as far greater opportunity is thus offered for the dissemination of the predisposing diseases through indiscriminate coughing and other means of droplet infection, as well as the directly injurious effects which inevitably result from exposure to such environment. The overheating of rooms is also seemingly harmful. Promiscuous expectoration may be, and probably is, a factor in infection and consequently should be avoided by every citizen. A remaining most important agent should be mentioned—alcohol. It is in truth the handmaiden of pneumonia, and there is none more certain or more sure of success, especially if liberally and continually used.

While the foregoing facts constitute in part our knowledge of the reasons for the widespread dissemination of an infection which carries with it a mortality of from ten to thirty per

cent, it should be remembered that our scientific data are not yet complete. There are proteins connected with immunity, predisposition, and the occurrence of epidemics which are yet to be solved. It is known that pneumonia frequently attacks those who are perfectly well, and who apparently have observed every hygienic rule. This is due to the increased virulence of the organism or to other causes is unexplained. It is, however, recognized that avoidable of the factors so briefly enumerated will in large part diminish individual susceptibility and therefore the incidence of the disease.

## SLIDE BURIED PART OF STALLED TRAIN

TACOMA, Wash., Feb. 7.—While Northern Pacific train No. 2, which left Seattle Tuesday night, was stalled in the deep snow one mile west of Stampede Pass, Wednesday afternoon, suddenly and without warning a huge snowslide struck the forward portion of the train, completely burying the engine, baggage car and a portion of the combination smoker and chair car. It was learned last night.

The slide broke through the windows of the smoker, completely filling that compartment with snow and catching four passengers. Passengers in other cars were unaware of what transpired until a cry of "Help!" rang out.

Coroner M. J. Rose of Ellensburg, immediately rushed to the assistance of the imprisoned passengers, crawling and digging in through the window and with the assistance of other passengers helping out the injured men.

Except for bad cuts and bruises the passengers were not injured. The engine crew were hastily dug out of the snow with no injuries.

Engine, baggage car and chair car were left leaning over an angle of 25 degrees at the edge of a 1000-foot embankment. The passengers arrived in Ellensburg last night.

Consipation.

When constive or troubled with consipation take Chamberlain's Tablets. They are easy to take and most agreeable in effect. Obtainable everywhere.—Adv.

Farmer Shot Pigs Rather Than Feed Them Dollar Wheat

MANSFIELD, Wash., Feb. 6.—E. J. Carroll shot 115 head of hogs during the worst part of the storm. The pigs were crowding into the pens and smothering, and nothing could be done to care for or feed them, so he took his gun and put them out of their misery.

He estimates that the loss would not be heavier than if he had fed them dollar wheat and had to sell at the present market price. Some of the pigs weighed more than 100 pounds. They were hauled out into the field and will be buried in the spring.

## PERSONAL

Announcements of the marriage of Miss Sibyl Clopton, former popular Pendleton girl, and Charles Lewis Applegarth, Jr., on Wednesday, February second, in Baltimore, were received by Pendleton friends today. The announcement is made by Mr. and Mrs. Charles Samuel Jackson of Portland, whose niece the bride is.

The Baltimore Sun of February third contained the following account of the wedding.

Miss Sibyl Clopton, daughter of the late Mr. and Mrs. Frank Boyd Clopton, of Pendleton, Oregon, and Charles Lewis Applegarth, Jr., 4214 Greenway, Guilford, were married at 11 o'clock yesterday morning in St. Michael and All Angels' Protestant Episcopal church by the Rt. Rev. Charles Fiske, Bishop Coadjutor of Central New York. Only the immediate families were present and the bride was attended only by Mrs. George Ransy Debnam, Jr., sister of the groom, as matron of honor.

The bride wore a gown of white panne satin and tulle, embroidered in silver, and carried a shower bouquet of lilies of the valley. Mrs. Debnam wore a gown of pink taffeta and a picture hat and carried a French bouquet of pink roses and violets.

After the ceremony a seated wedding breakfast was served the wedding guests in the home of the groom's mother. The bride and groom went to Atlantic City, and will later go for a month's visit to the Pacific coast. They will make their home here.

Mr. Applegarth is connected with the C. L. Applegarth Company, packers, and Mrs. Applegarth is the great-granddaughter of Judge John Bacon Clopton, one of the old jurists of Virginia, and is the niece of Charles Samuel Jackson, owner of the Portland, Ore., Journal.

The ladies of the Maccabee Social Club will be entertained tomorrow afternoon at the home of Mrs. Nettie Saling, 112 Thompson street.

How Mr. Davis Got Rid of a Bad Cough.

"Some time ago I had a very bad cough," writes Lewis T. Davis, Blackwater, Del. "My brother McCabe Davis gave me a small bottle of Chamberlain's Cough Remedy. After taking this I bought half a dozen bottles of it but only used one of them as the cough left me and I have not been troubled since." Obtainable everywhere.—Adv.

HELIUM DOUBLY DRY WHEN PUMP BREAKS IN THE CITY WELL

ROOFS OF WAREHOUSES BE LONGING TO FARMERS UNION DAMAGED.

Weight of Snow is Too Much for Them—Schools Are Dismissed on Thursday Because of Water Shortage and Storm—Other News Notes of the Helix Section.

(Special Correspondence.)

HELIX, Ore., Feb. 7.—Helix was a doubly dry town for a few hours Thursday, owing to breakage of the pump in the city well.

The roofs of the warehouse belonging to the Farmers Union and Tuma-a-lum Company's lumber sheds were damaged by weight of snow.

Wm. Davidson has been unable to make rural delivery since Tuesday.

The Helix schools were dismissed Thursday on account of water shortage and Friday on account of the deep snow.

Mrs. Victor Mason, librarian, reports more than the usual number calling for books the past month.

Hugh Smith has returned from Twin Falls, Idaho.

Ira Scott has returned from Lacrosse, Wash., where he has large land interests.

E. E. Giest has been in Stanton and Vansycle districts attending to warehouse interests the past few days.

Flo Clark is assisting Mrs. Leslie in the central office.

Mrs. John King is home from a visit to relatives in Freewater.

Mrs. F. P. Dean is visiting in Walla Walla, her former home.

Mrs. Pearl Alsop and children visited Mrs. Cook of Cold Spring Wednesday and Thursday.

Mrs. M. D. Smith is confined to her home with asthma.

Mrs. N. Myers, landlady of the Golden West Hotel, Attalla, Wash., was a Helix visitor Thursday.

The infant daughter of Mr. and Mrs. Vernon Kerley was seriously sick yesterday, but is improved today.

Donna, small daughter of Mr. and Mrs. Dee Le Roy, has recovered from a week's illness.

LUCKY SHE DIDN'T HEAR.

Jones observed an old lady sitting across the room.

"For heaven's sake," he remarked to Robinson, "who is that extraordinarily ugly woman there?"

"That," answered Robinson coldly, "is my wife."

Jones was taken back, but quickly recovered himself.

"Well," he said persuasively, "you just ought to see mine."

BOILED DOWN ICICLES ARE USED FOR WATER

VANCOUVER, Wash., Feb. 7.—The most destructive, disagreeable and dangerous storm ever experienced by this city has left Vancouver isolated from the world, without water, without lights, without car or ferry service and with every industry paralyzed.

The water for the city is usually furnished by an electrically operated pump, but when the electric lines went down a water famine was imminent. Some persons filled bathtubs and buckets with water to tide them over, but others are compelled to boil down icicles for water.

The wealth of France is estimated at \$50,000,000,000.

Has Used Chamberlain's Cough Remedy for 20 Years.

"Chamberlain's Cough Remedy has been used in my household for the past twenty years. I began giving it to my children when they were small. As a quick relief for croup, whooping cough, and ordinary colds, it has no equal. Being free from opium and other harmful drugs, I never felt afraid to give it to the children. I have recommended it to a large number of friends and neighbors, who have used it and speak highly of it." writes Mrs. Mary Minke, Shortville, N. Y. Obtainable everywhere.—Adv.

FOREST FIRE LOSSES AMOUNT TO \$10,000

SALEM, Ore., Feb. 7.—A total of 26,742 acres of merchantable timber was burned over and a total loss of \$9,352,500, based on the stumpage value sustained during 1915 in Oregon, was the result according to the report of State Forester Elliott, made public.

Damage from timber or slashing fires to houses, orchards, farm fences, logging equipment and such items totaled \$19,755,500. The logging equipment loss was only about \$1000, however.

There were a total of 1255 fires, of which 371, or 296 per cent, are de-

PRINCE AND PRINCESS OF WIED.

Prince William of Wied and the Princess, for whom a triumphal entry into Turin was planned by Austria and Germany. The prince was emperor of Albania after the Balkan wars, but could not compel the chieftains to recognize his authority. He abdicated in 1914 and resumed his commission in the Kaiser's household cavalry.

COAL SHORTAGE GROWS SERIOUS IN PORTLAND

PORTLAND, Ore., Feb. 7.—With the prolonging of cold and stormy weather the coal situation in Portland continues to grow more serious and unless the railroad companies are able to secure the passage of the freight trains from the east, dealers in eastern coal will have to close their yards until conditions are normal. Reports have been circulated that there were plenty of coal in the bunkers of the various companies, but this has been declared untrue by the dealers. There is a large supply of coal coming to Portland from Washington, but this will not be sufficient to fill the increasing demands.

Robert L. Adams, manager of the Mendota Coal company, declared that his supply was almost exhausted.

Dealers who are making deliveries are asking the people whether they have enough fuel to last for a few days and are delivering to only those places where fuel is most needed. Florists have run low in their supply, but great losses to their plants have been avoided by the timely arrival of a few tons of coal.

The people living in the suburbs where traffic is practically at a standstill because of the snow blockade, will suffer most unless conditions change. It is impossible to take either a wagon or an auto truck through the deep snow in the streets. The Portland Gas & Coke company has been unable to fill orders for fuel be-

RHEUMATISM IS EASILY RELIEVED BY CLEANSING THE BLOOD

S. S. S. Gives Quick Relief by Toning Up the Blood.

Yes, but how? A natural question. The answer is that you must cleanse your blood by stimulating it to healthy, vigorous action, so that it will throw off the germs and impurities that cause Rheumatism. The action of the wonderful blood purifier, S. S. S., is to practically renew the life blood, giving it vigor, stimulate the flow, making it throw out the germs and the poison impurities. The excruciating pains of Rheumatism, whether it is the shooting, stabbing Sciatica, the gripping, agony or muscular Rheumatism, or aching arms and legs that break up sleep, will be entirely relieved by S. S. S. Don't use nostrums and drugs. Take the blood bath—Nature's blood tonic, S. S. S. Get it at any drug store, but insist upon S. S. S. Let us tell you about blood diseases. Send for booklet, "What the Mirror Tells" or if yours is a peculiar case, write Swift Specific Co., Atlanta, Ga., but begin treatment at once.
