SIR ROGER CASEMENT IS QUEER MIXTURE OF DREAMER, POLITICIAN

MAN CAPTURED AS TRAITOR LONG ON PAYROLL OF BRITISH GOVERNMENT.

(By J. Hennessy Murphy, President United Irish League, in the Portland Journal.)

A glance at the career of Sir Roger Casement will open up a range of reflections that will go to the consideration of the difference between a queer mixture of the dreamer and protagonist and the practical politician.

In 1895 Casement was his majesty's consul at Lorenzo Marques; from 1895 to 1905 he occupied the same position for the Portuguese possessions in West Africa south of the Gulf of Guinea in the Gabon, and consul for the Congo Free State. His exposure of the inhumanities in the latter place made him a Knight of the Bleeding Heart. In 1906 he was his majesty's consul at Santos and in 1907 his majesty's consul for Haiti and San Domingo, but still continued to reside at Paris, Brazil.

Little was heard of him until a few years before the present war began; he had turned his attention to Sinn Fein literature, a sort of an idealism where such vulgar things as government are only for vulgar minds, and the real Irishman a being who lives in an Utopia in the sea dreaming away his life, in the hills and valleys, mountains and dales, in communion with his ancient kings and queens, chiefs and bards, heroes and scholars, leaving the women to cut the turf, plow the fields and attend market, while the men built up a society of

Near and Far Sight IN ONE PAIR OF GLASSES.

Can you see distant objects clearly through your reading glasses Or are you compelled to take them off every time you look off at a distance? Then you need KRYPTOK Glasses.

KRYPTOK combine near and far sight in one solid lens. The lower part is adapted for close vision, the upper part for far vision.

KRYPTOK GLASSES THE ONLY INVISIBLE BIFOCAL

The smooth, even surface of KRYPTOK Glasses is absolutely free from the vision-blurring lines, seams, or shoulders of old-fashioned bifocals. They cannot be distinguished from single-vision lenses. Yet KRYPTOKS enable you to see both near and far objects with perfect clearness. We recommend KRYPTOK because they are the only bifocals without lines or blur of any kind.

some kind or another on the foot of the gods. Much of the old annals of ancient Ireland are preserved in the German universities where Casement pored over them, while his countrymen sweated and toiled in forum and field for a place in the sun.

It will be seen that in the strenuous years when Irishmen at home were working themselves out of a racial, economic and religious feudalism, winning an extension of the franchise, county self government, the settlement of the age long land question and home rule, Casement was in the South seas and in South America, on the payroll of England, dedicating his talents to the uplift of the benighted and oppressed heathen, leaving his native land to go to the dogs, for all he cared; and that after the Irish peasant had been changed from the worst living to the best fed, most comfortably housed and contented peasantry in all Europe, and Ireland about to enter

into the self governing countries of the world, Casement, who never lifted a finger to the liberation of his country, now essays to betray her while she is fighting to retain the liberties so long and so hard fought for.

Under normal conditions, John Bull would likely appoint a commission in lunacy to pass on the Irish Don Quixote's conduct, but these days are not normal.

end the nuisance of removing your reading glasses every time you look across the room or at a distance. They relieve the tiring strain upon your eyes caused by frequently looking through your reading glasses, at objects three or four feet away. KRYPTOKS are solid lenses without seam, line or blur. They are the only bifocals with smooth, even surfaces—no age-revealing, vision-blurring lines, seams or shoulders.

The Best Possible Investment

Buying a Buick Motor car is closely akin to buying a good farm or a good bond. A Buick Motor car is what the bankers call a cash asset. There are thousands of bankers who would just as soon lend money on a car load or a train load of Buick Motor cars as on the best farm land.

The man or woman who buys a Buick Valve-in-Head motor car takes no chances. There is no risk involved. It is an investment that is safeguarded at every turn, and one that will yield as great a return—in health, in pleasure, in satisfaction of ownership, in prestige, and in freedom from doubt and worry—as any investment that could possibly be made.

Buick Motor cars have backing of the most substantial sort. They are constructed on engineering principles that were conceived when the motor car industry started, and which have gained steadily in public favor and the best expert opinion ever since. They are endorsed by the more than a quarter of a million men and women who use them.

A Buick Valve-in-Head motor car is a strictly gilt-edge investment.
