FACILITIES ARE EXTENDED

SCHOOL DIRECTORS ADOPT RESOLUTION REGARDING TEACHERS TRAINING.

At a special meeting of the school directors last evening called for the purpose of meeting with the secretary of the Normal school committee of the Commercial club, the board after consultation with secretary Gwinn and Superintendent Park unanimously passed a resolution extending to the state board of regents every facility of the district for the establishing of expert training rooms for the training of the senior members of the normal school.

Under this plan the most expert teachers possible to obtain will be constantly in charge of the room and only those pupils that have completed four years of high school and in addition thereto have as graduate students spent one full year in study of methods and review of the subjects will be eligible to teach in the presence of the expert and under her direction and during the second year of graduate work that is during the second year of study beyond the high school.

In passing it may be well to notice that more than 75 per cent of the teachers in Oregon are today teaching with less training and education than that required for the senior Normal class whose members are alone eligible to practice teaching.

CHARLES HERZOG

Rumor has it that Charles Herzog, manager and shortstop of the Cincinnati Reds, is to become a member of the Chicago National League team. The price which the Cubs are to pay for Herzog is not given but it is said to be a large amount of money and one or two ball players. It is a known fact that the Cubs have been scouting for a shortstop. August Hermann, president of the Cincinnati club, emphatically denies the rumor stating that Chicago has nothing to trade and that he has not considered the question of any other manager than Herzog.

W. M.; and that part of the Columbia river embraced between the center of the channel thereof and the abutting lands above described.

Petitions containing sixty names have already been filed with the county court and others will follow as fast as they are taken in the county. It is understood that those passing the undertaking do not desire to submit the issue to a vote unless it shall be found that a substantial majority of property owners and voters are in favor of the development.

The proposed port is to be known as the Port of Umatilla and W. W. Harrah, one of the prime movers, gives the following information:

"The object of the port is to provide water transportation for our locality. Not only are docks and wharves required on the Columbia river, but a suitable road must be built from these into the area of the port to carry the outgoing and incoming tonnage to and from the river boats.

"As a community we are committed to the utilization of the river as a means of freight transportation. It is well known that the federal government has expended millions of dollars to provide an open river and although this is now accomplished the wasted expense will be practically freight roads we reach out and hold of the water transportation now awaiting us at our back door.

"The entire movement is designed to carry the benefits of the open river toward the heart of Umatilla county and initially provide transportation to the Cold Springs country which it has so long and so badly needed."

ETHEL SERGENT

NEWARK, N. J., July 14.—When Private Louis Bausemer of Company H, First New Jersey Infantry, was called to border duty at Douglas, Ariz., his fiancée, Miss Ethel M. Sergeant, was heart-broken until she found a way to overcome the difficulty and marry the man of her choice.

She is going to be married by mail, and the wedding contract, drawn up by her lawyer, is now speeding southward where it will be signed by the lucky soldier and sent back to Newark. And when the boys come marching home she can marry again in the regular way.

The signed marriage certificate is recognized as legal and binding and takes the place of the marriage license as a record for the registrar of vital statistics.
