**GOATS WERE TOO FAST FOR ROUND-UP ROPERS**

Animals So Small Contestants Could Make No Time in Catching Them, So Directors Eliminate Feature.

Since the Round-Up there has been some questioning as to the reason for not having the goat roping contest as advertised in advance of the show. The directors state that they did not abandon this feature until the day before the Round-Up and only did so then when they became convinced that it would detract from rather than add to the exhibition.

They tried the goats out several times and it was found that they were so small and fast that it was almost impossible for a roper to make any time in catching and tying them. Rather than risk a failure of the event the directors cut it from the program. However, in order not to disappoint the ropers they added the prize money in this event to the purse in the steer roping. In consequence the steer roping purse was a most handsome one.

## What Does Catarrh Mean?

It means inflammation of a mucous membrane somewhere in the head, throat, bronchial tubes, stomach, biliary ducts or bowels. It always means stagnant blood—the blood that is full of impurities. Left alone, it extends until it is followed by indigestion, colds, congestion or fever. It weakens the system generally and spreads its operations until systemic catarrh or an acute illness is the result.

## Peruna

Is the nation's reliable remedy for this condition. It restores appetite, aids digestion, checks and removes inflammation, and thus enables the membranes, through which food is absorbed, to do their work properly. Forty-four years of success, with thousands of testimonials, have established it as the home remedy—Ever-Ready-to-Take. Its record of success holds a promise for you.

## BABY GIRL'S FACE MASS OF SCALES

Got Worse. Spread Into Hair and Down Chest. Slept Badly. Hair Became Thin and Dry.

## HEALED BY CUTICURA SOAP AND OINTMENT

"When my baby girl was a month old I began to notice a slight looking out on her face and neck. Thinking it was merely a baby rash I continued using common soap and powder. This seemed to do no good and the rash steadily got worse. It spread into her hair and down her chest and the skin was red and inflamed. She scratched her face and neck continually and was very irritable and slept badly. Her hair became thin and dry and her face was a mass of scales.

"The trouble lasted about two months. My mother had used Cuticura Soap and Ointment so I got both. The first application afforded great relief and in two weeks the breaking out had disappeared and she was completely healed." (Signed) Mrs. Ed. Ross, Brockway, Mont., Aug. 11, 1915.
