WE MUST ADD \$175 TO THE HUDSON SUPER-SIX

on next December 1st

Here is an issue which we can't evade. So we meet it fairly and frankly, but give you this advance warning. Every Super-Six will be sold at present prices while they last. If you can get one, get it.

The Super-Six of the present series is built from materials contracted last year. There are only 3500 more to go out, including open cars and enclosed cars. And part of them are sold.

The next production—starting December 1—will be like the present models. The changes, if any, will be only minor refinements. But materials for that series were contracted this year, and at prices enormously advanced.

So the cars now in process are the only Super-Sixes we can deliver at the present Hudson prices. The advance will be \$175 per car.

NEXT YEAR'S RULING CAR.

Next year, as this year, the Hudson Super-Six is certain to hold its supremacy. The Super-Six is controlled by our patents—the motor which added 80 per cent to efficiency. So other cars can't use it.

The Super-Six now holds all the worth-while records. All the world's stock car records up to 100 miles.

It holds the 24-hour record of 1819 miles. It won the Pike's Peak hill climb—the world's greatest event of its kind.

In September it won the ocean-to-ocean record. It went from San Francisco to New York in 14 hours 59 minutes less time than the next best record.

It won all these records because of endurance. Because this invention has so nearly eliminated all friction, vibration and wear.

So every man who knows the facts must concede the Super-Six supremacy. very test has proved it. If you want such a car—even for next year—now is the time to get it, if you can.

A UNIQUE SITUATION.

Diamonds in Europe are no longer prized for their beauty and artistic merit.

Modern warfare with shells plowing deep and armies burrowing deeper, renders it hazardous for a man to possess wealth in his home or in the field.

Word comes to us that the demand for diamonds is unprecedented in Germany, far above normal—in all the warring countries exceptional.

This condition records the realization of man that only in diamonds are their fortunes safe.

Diamonds are transportable on their person and have an increasing international value.

Within the next three years diamonds will have increased in value more than in any three years in history.

The center of the diamond cutting industry has been entirely destroyed by the contending armies and the new supply of diamonds has been cut off.

Anticipating the condition of the diamond market I have invested in a diamond stock larger than has ever been shown in Pendleton. I have made a special effort to get rings for \$25, \$50, \$75, \$100, and to those interested in the purchase of diamonds owe it to themselves to see my collection.
