DIG UP A BIG TOOTH OF PREHISTORIC MASTODON

Well Preserved, Though Found in Cut Far Below the Surface of the Ground.

COTTONWOOD FALLS, Kans., Dec. 25.—A big tooth, which is supposed to have come from the jaw of some mastodon of prehistoric ages, has been unearthed by T. E. Nichols of this city, by men employed in making a deep cut on Diamond creek, one and a half miles northeast of El-

dale. The trench had been sunk to a depth of fifty-three feet and had passed through an eight foot gravel strata when the big tooth was found. A soapstone formation was encountered just beneath it.

The tooth is well preserved. It weighs over three pounds, measures a foot and three inches in circumference around its base and is three inches in height from its base to the points of the teeth. It is oblong in shape, its width being three and one-half inches. There are six flanges or points to the tooth, which extend upward in regular pairs, there being

about three or four inches of the root intact, but the lower parts are broken off. It is believed the tooth belonged to a carnivorous or flesh-eating animal because of the flanges or sharp points.

After finding the tooth another bone only a few feet away was uncovered by another workman. It is a large flat, round-shaped bone which resembles a kneecap.

CHICAGO MAYOR ORDERS BIG CUT IN OFFICIAL JOBS

Lay Off 25 Per Cent of Your Employees, He Tells Bureau Chief—Facing a Bankrupt Treasury.

CHICAGO, Dec. 27.—"Lay off 25 per cent of your employees to save money."

This order was issued to city hall department heads by Mayor Thompson today as the first step in a series of sweeping changes which are expected to take place. The city hall payroll contains some 20,000 names. Commissioner of Public Works

Moorhouse was the first to receive the order and he transmitted orders to his subordinate bureau heads requiring the retrenchment program to be placed in operation at once.

City Engineer John Erickson, superintendent of Water Pipe Extension Lucas, Acting Superintendent of Streets Felix Mitchell and heads of bureaus employing the bulk of the city's men were notified to act at once. Before the end of this week it is estimated that 4000 city hall job holders will be jobless. The city is facing a bankrupt treasury.

Amusements

What the press agents say about Pendleton's present and coming attractions.

Naughty Rebecca and her companions will appear at the Oregon theater December 28 and will spread ounces of joy and sunshine with their pranks. Naughty Rebecca's popularity cannot be doubted if the crowded houses which have greeted this hilarious farce all along the line are any criterion to go by. Two plotting wives, temporarily giddy husbands, a sporty old gentleman with a prudish old fashioned wife are responsible for much of the fun of the comedy concoction. Mix with the foregoing one irresponsible college youth one clever cunning bewitch little housemaid

MAKING IT PLAIN

The Pure Food and Drug Laws aim to protect the public by preventing mis-statements on the labels of preparations but some people continue to accept "extracts" of cod livers thinking they will get the benefits of an emulsion of cod liver oil.

The difference is very great. An "emulsion" contains real cod liver oil, which has had the hearty endorsement of the medical profession for many years, while an "extract" is a product which contains no oil and is highly alcoholic.

Scott's Emulsion guarantees the highest grade of real Norwegian cod liver oil, skillfully blended with glycerine and hypophosphites. Scott's is free from the false stimulation of alcohol and is endorsed by good physicians everywhere.

ITCHING ECZEMA ON BOY'S NECK

In Small Water Blisters, Itching Became Burning Torturing Pain, Skin Cracking Open.

HEALED BY CUTICURA SOAP AND OINTMENT

"Eczema first appeared in small water blisters forming a crust on my boy's neck and around his left ear. The surrounding surface of the skin would be reddish, feverish looking spots and the itching was very violent. After a time the itching gave way to a burning, torturing pain and the skin was red, dry and hard, cracking open and causing frightful sore eruptions.

"He was treated but without any result and the rash spread to all parts of his body. Then we used Cuticura Soap and Ointment. After a time good results were evident and after treating for about six months with the Cuticura Soap and Ointment he was healed."
