BONE DRY DRAFT IS PRESENTED TO THE LEGISLATURE

PROHIBITION OF THE MANUFACTURE, TRADE OR IMPORTATION OF LIQUOR MADE ABSOLUTE.

'Possession' clause is left up to committee, care taken not to inconvenience legitimate use of alcohol in measure.

Drafts of the bone-dry prohibition law have been presented to the legislators at Salem by the committee which prepared it, consisting of ex-governor West, J. P. Newell, Ada Wallace Unruh and O. B. Bradley. Prohibition of the manufacture, trade or importation of liquor is made absolute but the "possession" clause is left up to the committee. One draft has it in and other omits it.

The meat of the law is contained in the first section, which is an embracing in its prohibition on intoxicating liquor as affecting the manufacture, individual or common carrier.

Provisions for the use and sale of alcohol follow in logical sequence, with a statement of the law as affecting the common carrier and the introduction of liquor into the state for medicinal, mechanical, scientific or sacramental purposes.

The bill submitted for the consideration of the legislative committee carries an emergency clause, which means that its provisions would be in full force after being signed by the governor.

Provision is made for the repeal of present statutes which conflict with the proposed law but in order that violations of the present prohibition law may not go unpunished it is provided that acts now in force shall be continued in force for the purpose of prosecution and punishment.

The committee has not seen fit to insert a "possession" clause in this section, but a substitute draft of the section was given to the alcoholic traffic committee with such a provision so that the committees would have both of them.

Possession section included.

This substitute section is identical with the section quoted above save that the clause, "and on and after January 1, 1918, it shall also be unlawful for any person to have in his possession within this state any such liquor," appears after the first sentence.

If the legislature should insert this provision in the act it would mean that those possessing stocks of liquor in their homes would have about 11 months to dispose of it.

GUMP BOY A WRECK FROM THAW'S BEATING

Was Forced to Kiss, Toss, Hands, Cheeks and Lips of Tormentor After Enduring Severe Lashing.

KANSAS CITY, Jan. 12.—De W. F. Kuhn declared Harry K. Thaw's alleged whippings made Frederick Gump a mental and physical wreck. It is asserted the boy's back is wetted and bruised.

The boy told Kuhn that Thaw used two whips and lashed him for an hour until he finally fell exhausted, pleading for mercy. Thaw forced him to kneel and kiss his toes, his hands, cheeks and lips, saying: "I am your slave for four years. You are master. I will obey your orders."

While breakfasting Thaw made Gump kneel beside his table, saying: "Thank you, master," continually while eating. Dr. Kuhn alleged that Thaw is the same type as Jack the Ripper.

NEW IRRIGATION LAW.

(Continued from Page 1.)

Upon a majority vote of the land owners outside of the limits of an incorporated city or town and upon a majority of the land owners within the limits of the city or town signing a petition for the organization of a district, the city or town may be included in the district.

The holders of bonds shall, under the new law, have a lien on the irrigation works and other property of the irrigation district in addition to the lien on the lands in the district.

Bonds for an irrigation district shall bear upon their face a certificate of the clerk of the circuit court showing that the procedure for organization of the district and the procedure for the issuance of bonds has been confirmed by the courts, bonds may be issued for the payment of interest on any issue of bonds for the first five years after their issuance. This feature is similar to the Idaho statute which has proven very satisfactory and has aided the sale of bonds.

Outstanding bonds may be redeemed by the issuance of other bonds with the consent of the bond holders.

The board of directors will be authorized to cancel any unaided outstanding bonds.

that after an examination and under certain restrictions, bonds of the district will be available for investment

by banks, trusts, and insurance companies and may be deposited as security for the performance of any

contract at such times as the bonds of any county, city or other municipality may be deposited. The proposed law does

not provide for investment of state school funds in the bonds.

Land owners, under the redraft, may vote at district elections by proxy authorized by power of attorney.

A provision is included that the plans and estimates of the district engineer must be approved by the state engineer before a bond election can be held.

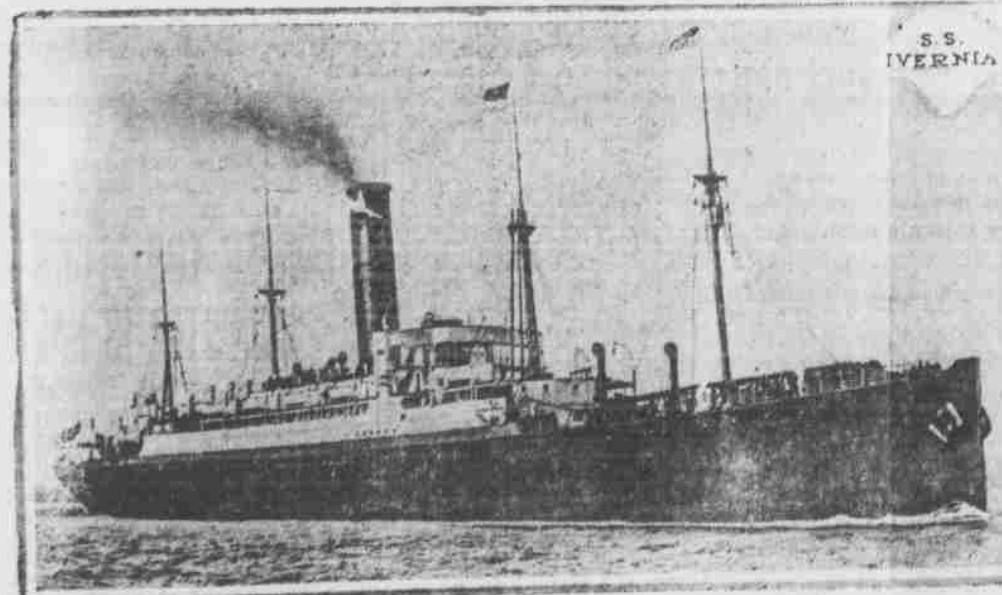

The necessity of issuing bonds in payment of the value of water or other property rights acquired is eliminated by the provision that while every acre in the district shall be required to pay the same as every other acre, a corresponding reduction in the lien against an irrigator for district improvements may be made, to cover the property rights acquired by the district.

Present Laws Lack Uniformity. The present laws, according to the report made by the committee to the state congress, lack uniformity and have become amended so much that they have become conflicting and cumbersome. The statute is now contained in four separate volumes and the committee deemed further amendment undesirable.

The members of the committee working out the new legislation were Percy Cupper, assistant state engineer, chairman; Jay H. Upton, Albert E. Elder, O. Laurgaard and Claude C. McCulloch.

Districts in Umatilla county which will be affected by the new law are the Paradise and Teel districts and a district near Echo which is to be organized under the Western Land & Irrigation company.

IVERNIA SUNK BY SUBMARINE, 153 IS MISSING

LONDON, Jan. 12.—The British Admiralty has announced that the transport Ivernia, which formerly was a Cunard liner of that name, has been sunk in the Mediterranean by

a submarine, with a loss of 12 soldiers and thirty-three of the crew. Before being taken over by the government the Ivernia was in the New York branch of the Cunard service.

She made her last trip to New York in August, 1914. Since that time her movements as a troop carrier have been known only to the military authorities and the admiralty.
