EGGLESS SALAD DRESSING.
To make salad dressing without eggs mix 1 teaspoon dry mustard, 1 or salt, 1 tablespoon sugar, 1 of flour, 1-2 cup vinegar, 1-2 cup water. Cook and thicken with milk, cream or butter. Use yellow cake coloring if you wish to color it.

ORANGE MARMALADE.
Orange marmalade that costs but 3 1-2 cents a glass to make. Scrup 2 oranges and 2 lemons. Cut them into shreds with a sharp knife. Then to every cup of fruit take 2 cups of water and put into a covered bowl. Let stand twenty-four hours. Boil fifteen minutes and again let stand for twenty-four hours. To this amount of fruit add 5 pounds granulated sugar. Boil until it jells, which takes from thirty to forty-five minutes. This made fifteen glasses. Cover with paraffin.

TO WASH CROCHETING.
When washing crocheted or knitted articles first sew them in a pillow slip and then proceed to wash them. Squeeze the bag in the soapy water, but do not rub or wring it; simply press out as much water as you can, and then hang the bag in the air to drain and dry. When it is thoroughly dry, rip open the pillow-case and the articles will be found in good shape.

DARNING UNDERWEAR.
Never darn fine woolen underwear with wool. It will shrink and pull out a hole larger than the original. A loosely-twisted knitting silk is excellent for the purpose. When washed the darn will have almost the same thickness as the knitted goods.

MORE HYACINTHS AND LARGER.
If, after bringing hyacinths to the light, the pots are placed once a week in very warm water in which some manure has been dissolved, and allowed to stand with the water half way to the top of the pots till the earth is saturated, the blossoms will be very large and luxuriant.

A MENDING APRON.
Among the many new apron patterns there is one which is extremely simple and practical, and just the thing to wear when doing the family mending.

The apron is made of two large pieces of white dotted Swiss, cut round at the bottom and sewed together at the edge. A slit is made in the center of the front piece from the waistband to within eight inches of the bottom. The edges of the opening are hemmed. This forms an apron which is also an enormous pocket, in which the sewing materials may be placed—out of reach of baby's inquisitive little fingers.

TO CLEAN FEATHER PILLOWS.
Feathers that have lain for any length of time in pillows should be washed. To do the work in the best possible manner, open one corner of the pillow and pour boiling water in upon the feathers. This makes them a wet mass and they are much more easily handled. Remove them and then wash them thoroughly with soap and water, being careful to rinse them in several waters. Then put them back in the washed cover and hang in the sun where they will dry and be light and fluffy. In this way none of the feathers is lost.

AN UNUSUAL PILLOW SHAM.
A pillow sham that is quite unusual is made of fine white linen, ornamented with three fllet crochet insets. The sham measures about fifty-nine inches long and twenty-two inches wide and is finished with a deep hemstitched hem. The square fllet insets should be set about two inches from the top and about six inches from the bottom, measuring from the hem.

BIG ENROLLMENT INCREASE
IN AGRICULTURAL CLASSES

There has been a fifty per cent increase in the enrollment in agricultural classes this semester. The work will include two courses along practical agricultural lines—vegetable gardening for freshmen and poultry keeping for sophomores. These courses will be given on the home project plan, which is recognized as the best method for agricultural instruction.

In the vegetable gardening class, each student will plan and raise his own garden at home, under the supervision of Mr. Fendall, instructor. A hotbed will be constructed at the high school where the students will raise plants for transplanting in their own gardens. This work affords an excellent opportunity to study the principles of plant growth and soil management. Each student will keep complete records of his work.

Each student in poultry keeping

will be required to hatch a setting of eggs of some standard breed of chicken, keeping a complete record of all his work. The students will plan and build coops and houses which they need. Their work will be done in correlation with the manual training work.

The work in gas engines is handled by the agricultural instructor, although it is included under manual training subjects. The gas engine laboratory is equipped with two Holt motors loaned by E. L. Smith, a three-horse Stover engine loaned by McCook & Bentley, and a three-horse Associated engine and a Maytag gasoline washup machine, both loaned by McClintock & Simpson. A Caterpillar tractor will soon be added to the equipment. The practical side of the work is given most emphasis.

PROVIDES EXTENSION
LIEN LAW TO DEBTS
FOR HARVESTING ETC

Bill Introduced by Martin Says That A Statement of Any Agreement As to Price Must Be Filed by the Person Doing the Work.

(East Oregonian Special.)
SALEM, Jan. 19.—Provisional for extension of the lien law to debts for harvesting and threshing, for labor for harvesting and threshing, and for horseshoeing are contained in three bills introduced in the house Wednesday by Ivan Martin of Marion county.

The bill covering the harvesting and threshing debts provides that a statement of any agreement as to price to be paid must be filed by the person doing the work. The name of the person for whom the work was done, a description of the land and the amount of grain handled is to be included in the statement, which must be filed within thirty days from completion of the work.

A statement containing certain information descriptive of the work must be filed in the same period in the case of labor in harvesting.

Under the blacksmith lien amendment, a blacksmith may by filing notice of his intention within sixty days after the work is done, establish a lien on the animal on which the work was done. The filing fee provided for is 25 cents to be paid to the county clerk or recorder.

SUPPLY and DEMAND

The DEMAND for all classes of merchandise is greater than ever before and the SUPPLY is growing short. Hence the advance in price on every article of merchandise is steadily increasing. BUYING EARLY, before the prices had advanced very great, enables us to offer you merchandise at just about the same old prices of past seasons. NEW SPRING MERCHANDISE ARRIVING DAILY.

IF IT'S NEW ALEXANDER'S WILL HAVE IT.

Dress
Skirts

AMERICANS SCORE AGAIN.

St. Paul Firm Gets Another Rail Contract From China.
BEKING, Jan. 19.—The Chinese government has contracted with the Siemens-Carey Co. of St. Paul for the construction of an additional 300 miles of railway. The line is to run from Chow-kiakow, in Hunan province, through Nanyangfu to Slang-yangfu, in Hupeh province. The work has been begun by surveyors.

Several months ago the Chinese government gave contracts to the Siemens-Carey Co. for the construction of more than 2000 miles of railways at a probable cost of more than \$100,000,000.

Last October the Japanese and Russian governments made protests against certain of these contracts, on the ground that their prior rights were infringed.

COURT RULES LOVE CAN PROSPER IN RAINSPOT

CAMDEN, N. J., Jan. 19.—Love can dwell even in a rain spot and be contented, according to an opinion handed down here today by Vice-Chancellor Leaming.

When Mrs. Belvedere Clark married Howard Clark she had no idea

BABY MARLOWE TESTIFIES AGAINST FRIEND

NEW YORK, Jan. 17.—Details of the alleged misbehavior of Mrs. Pearl Elizabeth Hyman Nolker, of St. Louis, with men of four different nationalities in New York and Paris are being given by Albertine Marlowe, the attractive seventeen-year-old daughter of Mr. and Mrs. Walter D. Marlowe, formerly of St. Louis, in her deposition in the divorce action brought by Robert E. Nolker, wealthy president of the Aero Club of St. Louis.

"Baby" Marlowe, as Mrs. Nolker and her friends knew Mrs. Nolker's protegee, was but one of five dependents. But she was by far the most important subpoenaed and occupied the witness stand from 11 a. m. to 4 p. m. continuously, save for a brief adjournment for luncheon.

she would have to abide in a grist-mill, she said. However, shortly after the ceremony Clark built a "nest" for his wife in the mill—and one of the vintages of the Year One at that, she testified. Whenever it rained, Mrs. Clark said, even an umbrella failed to protect her, so she left.

You Needn't keep on feeling distressed after eating, nor belching, nor experiencing nausea between meals, Hood's Sarsaparilla cures dyspepsia—it strengthens the stomach and other digestive organs for the proper performance of their functions. Take Hood's—Adv.

25 CENTS DESTROYS
YOUR DANDRUFF AND
STOPS FALLING HAIR

SAVE YOUR HAIR! MAKE IT THICK, WAVY AND BEAUTIFUL—TRY THIS!

Thin, brittle, colorless and scraggy hair is mute evidence of a neglected scalp, of dandruff—that awful scourge. There is nothing so destructive to the hair as dandruff. It robs the hair of its lustre, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die—then the hair falls out fast. A little Danderine tonight—now—any time—will surely save your hair.

Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter, and after the first application your hair will take on that life, lustre and luxuriance which is so beautiful. It will become wavy and fluffy and have the appearance of abundance, an incomparable gloss and softness; but what will please you most will be after just a few weeks' use, when you will actually see a lot of fine, downy hair—new hair—growing all over the scalp.

If it were not for the neutral nations grand opera would have to go into the discard.

BACKACHE—KIDNEY TROUBLE.

Get This Out—It is Worth Money. DON'T MISS THIS! Cut out this slip, enclose with 5c and mail it to Foley & Co., 2842 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for bronchial and la grippe coughs, colds and croup; Foley Kidney Pills, for lame back, weak kidneys, rheumatism, bladder troubles; and Foley Cathartic Tablets, a wholesome and thoroughly cleansing cathartic for constipation, biliousness, headache and sluggish bowels. You can try these three excellent remedies for only 5c. Tallman & Co.

UNDER THE
CAPITOL THE
DOME

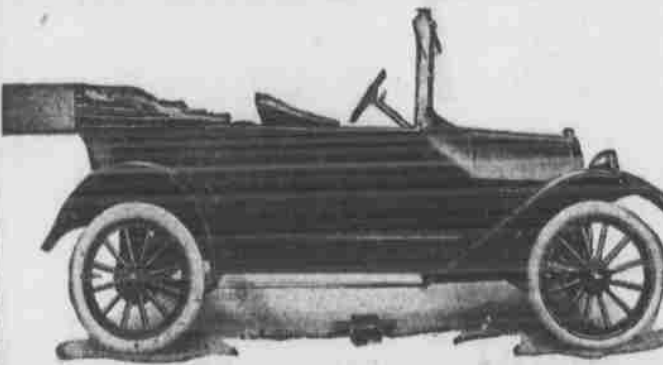

WASHINGTON, Jan. 19.—Opposition of Sen. Borah of Idaho, almost blocked the effort made to have the senate endorse the action of President Wilson in sending notes to the belligerent powers with regard to peace. Senator Hitchcock, of Nebraska, asked for immediate consideration of a resolution by which the senate "strongly indorse and approves the action taken by the president." The resolution further stated that "this action represents the overwhelming sentiment and desire of the people of the United States." Senator Borah objected strenuously and the resolution was referred to the committee on foreign relations. Senator Borah said he did not mean his action to be a criticism of the president, but stated that he did not believe in too hasty action, explaining that he had only read the president's note as published in the newspapers that morning.
