

THEY SHALL NOT PASS

To every clothier with ideals to defend these times fling a stern challenge. Woolen fabrics today are worth 150 per cent more than in 1914. Silks and satins have risen from 40 to 50 per cent in price. It costs 100 per cent more to put a linen canvas into a coat today than it did three years ago. Haircloth, thread, tape, buttons, every item of clothes-making, all show the same upward trend. Nothing but all wool and the stand-

ards that belong with all wool, let prices soar as they may—that is the Hart, Schaffner & Marx resolve and determination. We like the spirit that rejects any compromise which means a half step downward. That looks upon its plighted word to the public, not as a scrap of paper, but as an inviolable covenant of quality. That disdains any parley, or truce with part-cotton and its sinister allies—simply the ringing defiance:

THEY SHALL NOT PASS Hart Schaffner & Marx Clothes

NEW POLICY IN INDIAN AFFAIRS IS WORKED OUT

Is Far Reaching in Effects and Means Practically the Dawn of a New Era in Indian Administration.

Through a "Declaration of policy in the administration of Indian affairs" just issued by Cato Sells, commissioner of Indian affairs, some plans of interest to local people are made known. The following is the statement in detail as sent from Washington on April 17, a copy having been received by Major E. L. Swartzlander: During the past four years the efforts of the administration of Indian affairs have been largely concentrated on the following fundamental activities—the betterment of health conditions of Indians, the suppression of the liquor traffic among them, the improvement of their industrial conditions, the further development of vocational training in their schools, and the protection of the Indians' property. Rapid progress has been made along all these lines, and the work thus reorganized and revitalized will go on with increased energy. With these activities and accomplishments well under way, we are now ready to take the next step in our administrative program.

The time has come for discontinuing guardianship of all competent Indians and giving even closer attention to the incompetent that they may more speedily achieve competency.

Broadly speaking, a policy of greater liberalism will henceforth prevail in Indian administration to the end that every Indian, as soon as he has been determined to be competent to transact his own business as the average white man, shall be given full control of his property and have all his lands and moneys turned over to him, after which he will no longer be a ward of the government.

Pursuant to this policy, the following rules shall be observed:

1. Patents in Fee: To all able-bodied adult Indians of less than one-half Indian blood, there will be given as far as may be under the law full and complete control of all their property. Patents in fee shall be issued to all adult Indians of one-half or more Indian blood who may, after careful investigation, be found competent, provided, that where deemed advisable patents in fee shall be withheld for not to exceed 49 acres as a home.

Indian students, when they are twenty-one years of age or over, who complete the full course of instruction in the government schools, receive diplomas and have demonstrated competency will be so declared.

2. Sale of Lands: A liberal ruling will be adopted in the matter of passing upon applications for the sale of inherited Indian lands where the applicant retains other lands and the proceeds are to be used to improve the homesteads or for other equally good purposes. A more liberal ruling than has hitherto prevailed will hereafter be followed with regard to the applications of noncompetent Indians for the sale of their lands where they are of sane mind and feeble and need the proceeds for their support.

3. Certificates of Competency: The rules which are made to apply in the granting of patents in fee and the sale of lands will be made equally applicable in the matter of issuing certificates of competency.

4. Individual Indian Moneys: Indians will be given unrestricted control of all their individual Indian moneys upon issuance of patents in fee or certificates of competency. Strict limitations will not be placed upon the use of funds of the old, the indigent, and the invalid.

5. Pro Rata Shares—Trust Funds: As speedily as possible their pro rata shares in tribal trust or other funds shall be paid to all Indians who have been declared competent, unless the legal status of such funds prevents. Where practicable the pro rata shares of incompetent Indians will be withdrawn from the Treasury and placed in banks to their individual credit.

6. Elimination of Ineligible Pupils From the Government Indian Schools: In many of our boarding schools Indian children are being educated at government expense, whose parents are unable to pay for their education and have public school facilities at or near their homes. Such children shall not hereafter be enrolled in government Indian schools supported by gratuity appropriations, except on payment of actual per capita cost and transportation. These rules are hereby made effective, and all Indian bureau administrative officers at Washington and in the field will be governed accordingly.

This is a new and far reaching declaration of policy. It means the dawn of a new era in Indian administration. It means that the competent Indian will no longer be treated as half ward and half citizen. It means reduced appropriations by the government and more self respect and independence for the Indian. It means the ultimate absorption of the Indian race into a body politic of the nation. It means, in short, the beginning of the end of the Indian problem.

In carrying out this policy, I cherish the hope that all real friends of the Indian race will lend their aid and hearty cooperation.

CATO SELLS, Commissioner.

Approved: FRANKLIN K. LANE, Secretary.

THE MAN CAN CARRY, WITHOUT MUCH exertion, a steel rail which one man could not lift, but in building railroads the tracklayers do not call for one man to volunteer to do ten men's work. That idea is left for advocates of the volunteer system as applied to National defense.

AMERICAN WANTS SON TO KILL FIVE GERMANS

PARIS, April 28.—Richard Blount Jr., son of a wealthy patent medicine manufacturer of St. Louis, is the first American to enlist in the Foreign Legion of the French army since the United States entered the war. His father had a factory in Brussels, and chauffeur for United States Minister Brand Whitlock, using the Blount family car.

"I want my son to account for five Germans," said the elder Blount today.

NERVOUS SPELLS

And Combination of Troubles Relieved by a Combination of Medicines.

A quotation from one recent letter: "I have been taking Hood's Sarsaparilla and Peppin's Pills as a course of medicine and find this combination has worked like a charm. They told me I had neuralgia, and certainly I was in a very low and discouraging state of health. I suffered extremely with nervous spells and had neuralgia pains so I could not sleep nights."

"Those nervous spells were awful! I heard about taking Hood's Sarsaparilla and Peppin's Pills—one before meals, the other after—the suggestion struck me favorably so that I have taken the medicines carefully and faithfully with most pleasing results."

"It is a long time now since I have had one of those severe nervous spells. I can do a good day's housework, can work in my garden and walk a mile."

"Four-Ninety" Touring Car \$635

F. O. B. PENDLETON.

The Chevrolet Four-Ninety Touring Car is a car of ideal economy. It gives you the most value for your money. The Chevrolet delivers the maximum power to the rear wheels. It accomplishes this feat through simplicity of mechanism. This compels directness of action. The result is more power and speed and less fuel and expense.

The path of Chevrolet power is short and direct. The vaporized fuel enters directly into the valve-in-head motor. The impact of explosion strikes full against the piston head. It is an act of face-to-face co-operation.

The fullness of the force is exerted immediately on the rear wheels. No fraction of a second or horse-power is unduly spent. The unit power plant type of construction does the business.

And the result is, of course, that you ride faster and farther on one gallon of gasoline in this particular model. That is economy. And that is what you will find in the Chevrolet Four-Ninety.

CLOSELY GUARDED

LONDON, April 28.—Telegraphing from Copenhagen regarding the workers' demonstration before the Swedish Diet in Stockholm on Saturday while the food situation was being discussed, the Exchange Telegraph correspondent wires:

Throughout the delivery of the speeches in the Riksdag the crowds outside were quiet, but occasional cries for a republic and a revolution were to be heard.

This demonstration has caused an enormous sensation in Stockholm, and rumors of a revolution are persistent throughout the country. Fresh demonstrations of a far more serious character are expected on May 1. The royal castle is being strictly guarded by a corps of marine infantry.
