In the entrance hall splashing red cross banners and white flowers were used with good effect, while the auditorium was a bower of yellow lupin. During the afternoon four groups of songs arranged by Mrs. F. E. Boyden were given, including solos by Mrs. Ralph Saling, Miss Esther South, Mrs. E. L. Burroughs and Miss Nellie Anibal. Miss Mary Clarke gave several piano solos.

250 CASES SWISS CHEESE SHIPPED FROM STANFIELD

Big Order from San Francisco Filled By Newly Established Company of Swiss Farmers.

Two hundred and fifty cases of Swiss Cheese, the first shipment to be made by the newly established Swiss Cheese Company at Stanfield, will leave Stanfield Monday for San Francisco. The order for the cheese was placed after a sample of the company's product had been submitted and declared first class.

The Swiss Cheese company is owned by eight Swiss farmers and dairymen on the Furnish project, who among themselves own 250 cows and are adding to their herds constantly. They report a splendid market for Swiss cheese but have difficulty securing enough cows for milking purposes. Aside from obtaining milk from their own cows the owners of the creamery buy milk from others, paying \$2 per hundred for four per cent milk.

The Swiss company has a modernly equipped plant and the cheese is made in five pound bricks, there being 24 bricks to the case. A. L. Steiner is manager of the plant.

The Mutual Creamery Co. of Stanfield is an old established plant and is managed by Adolph Sahli. This company turns out 1000 pounds of cheese a month and would do a heavier manufacturing business if more milk could be obtained.

Four or five new herds of cows are to arrive on the project next month from Puyallup, Astoria and Auburn. These cows will materially increase the milk supply on the project.

SMOKE BOMBS BATTLE GERMAN SUBMARINES

Vessels Passing Through War Zone Adopt Unique Methods to Escape.

NEW YORK, May 25.—Smoke bombs designed to protect merchant vessels from submarine attacks, are now being used on vessels passing through the war zone, according to information brought to an American port today on a French ship. The bombs are thrown by hand and on striking the water ignite and throw out a dense cloud of black vapor which hangs low over the water like a fog, screening the movements of a vessel in danger of attack.
